In addition to many First-Class Certificates and Awards of Merit for Novelties.

Those who desire to have in their gardens the highest quality of Vegetables and Flowers will find the following letter of exceptional interest.

To James Veitch & Sons, Ltd., Chelsea.

The Gardens,

Tring Park, Tring.

August 18th, 1910.

Dear Sirs,

I feel that I ought to write and say that, considering the wretched seasons of last and again this year, the seeds with which you have supplied Lord Rothschild have given us great satisfaction. Considering the difficulties which have arisen this season we have been very successful in getting a good germination. I thought you ought to know this as we are not in the best of districts for soil.

Yours faithfully,

(Signed) ARTHUR DYE,

Head Gardener to

The Right Hon. Lord Rothschild, G.C.V.O., P.C.

Any varieties in cultivation not mentioned in this List can be supplied at the usual Advertised Prices.

VEITCH'S GARDEN PEAS.

VEITCH'S
ACME PEA.

A sowing may be made about the end of November on a warm, dry, well-sheltered border; but for a first crop, the best plan is to sow in January, in turf or narrow boxes; place in gentle heat and plant out when hardened off and the weather is mild enough. Sow early sorts early in February, and again towards the end of the month for succession. The first week in March a general sowing should be made of the second early and main-crop varieties and continued once a fortnight till the beginning of July. Peas like a rich deep soil, and will do remarkably well in old Celery trenches.

EARLY PEAS.

VEITCH'S SELECTED EXTRA EARLY.—The finest of first early round Peas, compact and uniform in growth with well-filled pods. Height $2\frac{1}{2}$ ft. . . . per quart, 1/6

"The haulm was literally covered from top to bottom with splendid pods of good-flavoured peas.—Mr. W. H. ALLEN, Gardener to L. CURRIE, Esq."

"Selected Extra Early Peas sown the first week in February, picked the first week in June, were a perfect sight, all appeared to hang in pairs.—Mr. F. GIBBS, Gardener to Mrs. MOUNSEY."

VEITCH'S ACME (Veitch's Early \times Stratagem).—A valuable addition to the first early section. We can with confidence recommend it for first early work, as it comes into full bearing towards the end of June and continues to yield for a long period. The pods, produced freely in pairs, contain seven to nine peas of excellent colour and flavour. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY. Height $3\frac{1}{2}$ ft. Per quart, 2/-

"Acme Pea is a marvel, I had a record crop.—Mr. W. HOTHER, Gardener to Col. ALLISON."

"Very good, pods well filled with peas of excellent colour and flavour.—Mr. THOMAS LODGE, Gardener to the Hon. HERBERT GIBBS."

"Your Acme Pea is a grand sight. It will be my early Pea for the future.—Mr. A. YEOMANS, Gardener to G. STUART OGILVIE, Esq."

"I have to-day posted you from here my usual list of seed requirements for the 37th season. I have invariably found the seeds supplied me by your firm of the very best quality, true to name and description.—Mr. D. MELVILLE, Gardener to His Grace the DUKE OF SUTHERLAND, K.G."

EARLY PEAS—continued.

VEITCH'S CHELSEA GEM PEA.

VEITCH'S CHELSEA GEM—An extra early dwarf variety of great merit, compact short-jointed habit; early as American Wonder, it gives a much larger crop, bearing an abundance of handsome pods. The pods, produced in pairs, are remarkably well filled, and contain eight to ten good-sized peas of first-rate quality. **FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY.** 1½ ft. 3 0

"For both early and late supplies there is no other Pea that I have grown equal to Chelsea Gem.—Mr. T. ARNOLD, Gardener to the Right Hon. EARL BATHURST."

VEITCH'S LANGLEY GEM (stock limited).—A splendid acquisition, pods of a dark green colour, usually produced in pairs, and containing eight to ten large peas of superior quality; excellent for pot work and the early border, per pint, 2/6

"One of the best Peas ever sent out.—Mr. J. ANDERSON, Gardener to F. NETTLEFOLD, Esq."

"A most desirable acquisition.—Mr. E. F. HAZELTON, Gardener to the Right Hon. the EARL OF DERBY."

VEITCH'S EXONIAN—A very early wrinkled variety of first-rate quality, in use about a week before William I. **FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY.** 3½ ft. 1 9

"The best cropper for early work out-of-doors; it can always be depended upon to produce the second crop, and this year we have had a third flowering season.—Mr. H. NOBLE, Gardener to LADY SMYTH."

VEITCH'S EARLIEST MARROW—A very superior extra early marrow Pea which comes very quickly to maturity, with high quality and productiveness. The plant is a splendid cropper, producing abundantly deep green well-filled pods; it should not be sown until warmth is in the ground. The peas are of excellent colour and flavour when cooked 4 ft. 2 6

"The very best in cultivation.—Mr. W. EMBERTON, Gardener to the Right Hon. the EARL BROWNLOW."

"Remarkably early and productive, its most valuable property, however, being its excellent quality when cooked.—Mr. THOS. COOMER, Gardener to the Right Hon. LORD LLANGATTOCK."

"Veitch's Acme and Earliest Marrow are two Peas of the highest quality, heavy croppers, with tightly-filled pods, but do better on light than on heavy soils.—W. H. MORTON." *Garden Life.*

"I have to-day (June 18th), gathered Peas from your Earliest Marrow sown on March 14th in an exposed position.—Mr. K. RIGG, Gardener to H. H. GORDON, Esq."

American Wonder Improved—A first early variety, fine flavour and good cropper; excellent for forcing and the early border 12 in. 2 6

"Peas were all splendid. I believe there are no other varieties to compare with your American Wonder Improved and Chelsea Gem in their respective positions.—Mr. E. PLATT, Gardener to E. LAMB, Esq."

"I posted my first Seed Order to your firm in the Spring of 1871. I have felt so well satisfied with the same uniform excellence and quality of the seeds supplied that my orders have been yearly entrusted to you ever since.—Mr. W. CRUMP, V.M.H., Gardener to EARL BRANCHAMPTON."

PEA, VEITCH'S SELECTED GRADUS.

EARLY PEAS—continued.

	Per qt. Height. s. d.	
Gradus (Selected).—A distinct early wrinkled marrow, with large well-filled pods, averaging eight fine deep green peas of excellent flavour; a prolific cropper and sure bearer. An excellent variety to follow Chelsea Gem and Acme. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY	3 ft. 3 0	
Bountiful or Improved Eclipse .—Round blue, very productive, long pointed pods, well filled with peas of good flavour; valuable for autumn sowing	3½ ft. 1 9	
Early Giant .—One of the earliest wrinkled varieties; large dark green pods, containing eight to nine peas of fine flavour	3 ft. 3 6	
English Wonder .—An early dwarf wrinkled marrow, ready for use early in July	15 in. 2 3	
Excelsior (Selected).—A first early variety, with large pods well filled with dark green peas of excellent flavour. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY	18 in. 2 6	
Little Marvel .—Excellent early wrinkled marrow, very productive and of splendid flavour. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY	18 in. 3 0	
Primo .—The distinctive merits of this new variety are its extreme earliness, vigorous constitution and splendid quality; it is very hardy and recommended for early sowing	3 ft. 3 0	
Ringleader or First Crop .—Very early round white Pea, which may be sown in December and January	2½ ft. 1 6	
The Pilot .—One of best hardy early round-seeded Peas, producing deep green pods of the Gradus type, well filled with peas of fine flavour; practically as early as Eclipse; recommended for autumn and spring sowing. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY	3 ft. 2 9	
Laxtonian (new).—A good early dwarf wrinkled marrow, with dark green pods, well filled with peas of excellent flavour per pint, 2/6 18 in. —		
The Sherwood .—Very productive variety, with deep green pods containing eight to ten peas of excellent flavour; recommended in place of English Wonder	18 in. 2 9	

Thomas Laxton.—A large-podded variety, very early, good cropper, and of excellent flavour. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 3 ft. 2 6

William Hurst.—Dwarf and early variety of good quality 1 ft. 2 6

William the First Improved.—A very superior free-cropping early sort, with deep green pods, of good quality 3½ ft. 1 9

Per qt. s. d.	Per qt. s. d.	Per qt. s. d.
DICKSON'S FIRST AND BEST 1 3	EARLY MORN 2 6	EARLY SUNRISE 1 6

"I have some enormous crops of Peas of your varieties, such as Earliest Marrow, Gradus, Duke of Albany, &c., and are well filled out in pods. They have been very much appreciated.—Mr. W. CAMM, Gardener to W. ASTOR, Esq.

VEITCH'S PEAS FOR SECOND AND GENERAL CROPS.

VEITCH'S CRITERION.—This exceedingly fine main crop Pea comes into use somewhat in advance of Champion of England, partakes much of the character of Ne Plus Ultra, and is valuable on account of its fine quality and free-cropping properties. The pods are of a deep olive-green shade, exceedingly well filled, and contain from seven to nine peas, which are of a fine deep green colour, and remain a long time fit for use 5 to 6 ft. 2 6

"Criterion for continuous bearing, heavy cropping and flavour, is ahead of all other kinds I know.—Mr. N. KNEELER, Home Farm, Laveistoke, Hants.—*Gardeners' Chronicle*."

"I have four grand rows of Criterion Pea bearing a tremendous crop of excellent quality.—Mr. C. H. WHEELER, Gardener to the Right Hon. LORD MASHAM."

"One of the best main crop Peas ever sent out, an enormous cropper.—Mr. A. WILSON, Gardener to the Most Hon. the MARQUIS OF ABERGAVENNY."

VEITCH'S PRESTIGE.—An exceedingly handsome Pea with unusually large pods, which contain from nine to ten green peas of excellent flavour. The straight broad pods, in pairs, are of a dark green colour, very attractive appearance, and can confidently be recommended for the exhibition table or for private use. Haulm very robust and resists mildew well. Very prolific, and ready for use the first week in July. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 3½ ft. 3 0

"The heaviest cropper. A long row here has been a surprise to many visitors.—Mr. THOMAS HAY, Gardener to the Most Hon. the MARQUIS OF LINCOLN." "

"The haulm of your Prestige Pea is very strong and not liable to mildew. The crop is a marvellous one.—Mr. JAMES WHYTECK, Gardener to His Grace the DUKE OF BUCCLEUCH."

VEITCH'S LORD ROSEBERY.—This excellent variety for main crop and late use is of vigorous constitution, strong branching habit, producing an abundance of long slightly curved pods, chiefly in pairs, closely filled with eight to ten large peas of splendid quality and exceptionally sweet flavour. Sown the end of March, it was in full bearing the end of July. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 4 to 5 ft. 2 6

"Most noticeable for its heavy crop and splendid flavour.—G. WYTHES," *The Garden*."

"A splendid acquisition, its constitution so vigorous and branching that it seems deliant of that bane of Peas—mildew. The crop is prodigiously heavy.—Mr. W. STRUGNELL, Gardener to the Right Hon. W. H. LONG, M.P."

"One of the best main crop Peas of recent introduction.—G. WOODGATE," *The Gardeners' Magazine*."

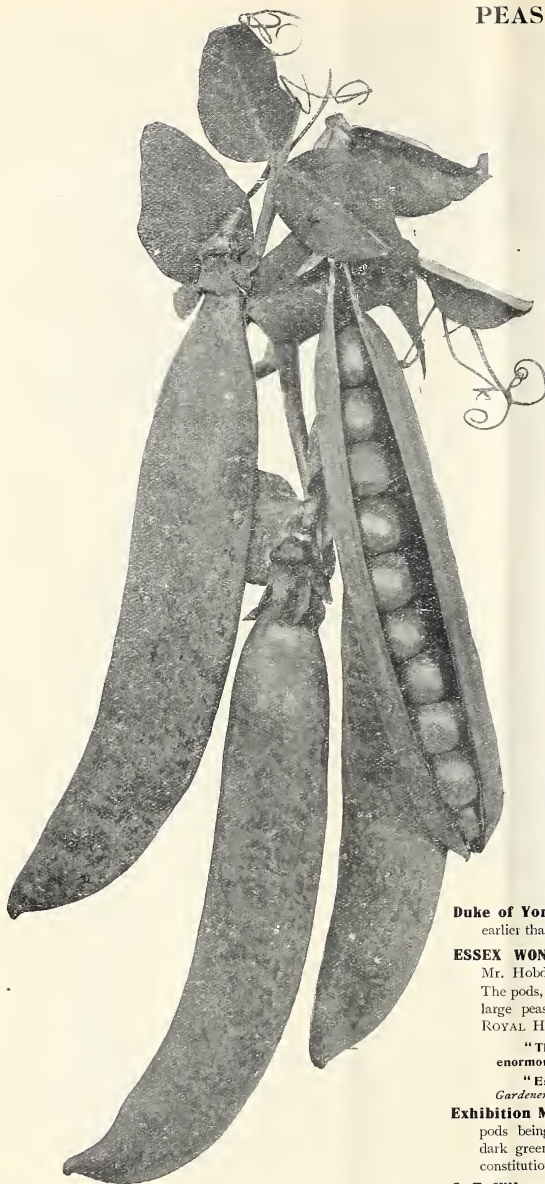

PEA, VEITCH'S PRODIGY.

VEITCH'S ACQUISITION.—Produces an extremely heavy crop of peas of delicious flavour. The plant bears continuously a crop of from eight to twelve pairs of dark green pods. A very marked characteristic of this variety is its freedom from mildew 3½ ft. 3 0

VEITCH'S PRODIGY.—Splendid green wrinkled marrow of robust growth, bearing an abundance of extra long pods, containing nine to eleven large peas of excellent quality and delicious flavour. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY. . . 5 ft. 2 9

"By same post I send my seed order for the 35th time, which is the number of years I have been in this situation. My connection with your firm now goes back to 50 years.—Mr. GEO. GRIFFIN, Gardener to BARON DE RUTZEN."

PEAS FOR SECOND AND GENERAL CROPS—continued.

VEITCH'S MAIN CROP PEA.

Per qt.
Height. s. d.

VEITCH'S MAIN CROP.—This magnificent variety or exceptional merit has fully realised the good opinion formed of its excellent qualities. The plant is of robust constitution, of free-branching habit of growth, the haulm strong and vigorous, and carries an abundant crop which remains a long time fit for use, and withstands drought better than any other mid-season variety. The pods, slightly curved, are of large size and handsome appearance, containing nine to eleven peas of rich colour and delicious flavour. **FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY** 3 ft. 2 9

"A grand Pea. Here on the south coast it is difficult to get Peas that resist drought and mildew, but out of several varieties we had, **Veitch's Main Crop** did by far the best.—Mr. G. HALL, Gardener to the EXORS. of LOUISA LADY ASHBURTON."

"One of the best main crop Peas I have ever grown.—Mr. G. BRISTOL, Bailiff to Mrs. LAMBERT."

Alderman Selected.—Handsome exhibition variety, large deep green pods, very prolific and of excellent quality. **FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY** 5 ft. 2 6

"**Veitch's Alderman** is worth a place in every garden, both for quality and quantity.—Mr. E. ABRAHAM, Gardener to W. G. WHITFIN, Esq."

Champion of England Improved.—A greatly improved form of this well-known Pea, an abundant cropper of fine flavour, excellent for general use 5 ft. 2 3

Daisy (Selected).—A dwarf marrow, a fine cropper and of excellent flavour, recommended for pots and the early border. **AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY** 18 in. 3 0

Dr. Maclean, Improved.—A valuable marrow of vigorous habit, very prolific, bearing large handsome pods; recommended for small gardens 3 ft. 1 9

Duke of Albany (Veitch's Selected).—A heavy-cropping variety of robust growth, with very large, handsome, well-filled dark green pods; peas of excellent quality; splendid for exhibition and general use. **AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY** 5 ft. 2 6

"**Duke of Albany** is a first class Pea and worthy a position in any garden. To follow this, **Prodigy** is excellent.—E. BECKETT." *Gardeners' Magazine.*

Duke of York.—Heavy-cropping variety of excellent quality, a little earlier than Duke of Albany 4 ft. 2 3

ESSEX WONDER.—We recommend this fine new variety, raised by Mr. Hobday, of Romford, as an abundant and reliable cropper. The pods, which are of a deep green colour, contain eight to nine large peas of excellent flavour. **AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY** 5 ft. 3 0

"The new Pea **Essex Wonder** has been splendid, yielding an enormous crop.—Mr. A. TURNER, Gardener to E. G. PRETTYMAN, Esq., M.P."

"**Essex Wonder** is a grand Pea of medium height.—E. BECKETT." *Gardeners' Magazine.*

Exhibition Marrow.—For show purposes this variety is unrivalled, the pods being large, broad and well-filled, handsome in shape, of a dark green colour, and of superior quality; the plant is of robust constitution and resists the mildew well 3½ ft. 3 0

G. F. Wilson.—Fine wrinkled green marrow of branching habit, an excellent cropper of fine quality 4 ft. 2 0

Gladiator.—A very free-cropping variety of robust habit, bearing in pairs an abundance of long curved, handsome pods exceedingly well filled; a fine market Pea of good quality. **FIRST CLASS CERTIFICATE** 3 ft. 1 6

Kelvedonian.—A fine green wrinkled variety of the Champion of England type, but superior, both in cropping and size of pods 4½ ft. 2 6

PEAS FOR SECOND AND GENERAL CROPS—continued.

	Height.	Per qt. s. d.
Masterpiece. —A grand prolific marrow Pea. The deep green pods which are slightly curved, are well filled and perhaps longer than Main Crop, and the quality is all that can be desired	3 ft.	2 6
Prince of Wales. —An excellent white wrinkled main crop variety, very productive; recommended for small gardens	3 ft.	1 6
Prizewinner. —Large deep green pods, well filled with peas of splendid quality, fine for exhibition	3 ft.	3 0
Rentpayer. —A very fine Pea of the Stratagem class, bearing a grand crop of long, broad, straight pods which are closely packed with large peas of superior flavour	2½ ft.	2 9
Quite Content. —A very fine exhibition variety with long straight pods, should be sown thinly per packet, 1/6 and 2/6	5 ft.	—
Renown. —A remarkably handsome variety, bearing large well-shaped pods filled with nine or ten peas of excellent quality. A most prolific bearer and recommended either for table use or exhibition	3 ft.	2 9
Senator or Improved Charles 1st. —Excellent cropper, with well-filled narrow pods, containing eight to nine peas	3 ft.	2 6
Stratagem Improved. —Dwarf wrinkled marrow of sturdy compact habit, a very heavy cropper, producing large, dark green, well-filled pods, containing eight to ten peas; very superior stock	2 ft.	2 6
Telegraph. —A very handsome round-seeded long-podded variety, and an excellent cropper of robust habit; valuable for exhibition	5 ft.	1 6
Telephone. —A splendid exhibition main crop variety, pods long and well filled, the haulm is robust and resists the mildew	5 ft.	1 9
VEITCH'S PERFECTION. —Extra fine wrinkled marrow, an excellent cropper, of most delicious flavour, and without doubt the finest Pea of its class in cultivation	3 ft.	2 0

	Per qt. s. d.		Per qt. s. d.

DUCHESS.	2 6	YORKSHIRE HERO	1 6

VEITCH'S LATE PEAS.

VEITCH'S CHELSONIAN.—One of the most prolific in cultivation, specially recommended for late cropping; of strong and vigorous growth, and branching habit. The pods of a dark green colour, similar to the well-known Ne Plus Ultra, but larger, are well filled with peas of delicious flavour. Continues bearing till late in the season, and has become a most popular variety. **FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY** 6 ft. 2 6

"A grand acquisition, an abundance of pods of delicious flavour. We are gathering (September 25th) with the promise of a continuance for some time. I find this variety very free from mildew.—Mr. A. BULLOCK, Gardener to E. J. WYTHES, Esq."

"I still rely on Chelsonian Pea and grow it in quantity.—Mr. G. SUMMERS, Gardener to the Right Hon. the EARL OF SCARBOROUGH."

"Possesses all essential qualities to stamp it as one of the best introductions of recent years.—Mr. W. FRIBBICK, F.R.H.S., Gardener to Sir C. SEELY."

"One of the best croppers and the quality is of the very best.—Mr. J. CORBETT, Gardener to the Most Hon. and Rev. MARQUIS OF NORBANK."

"Sown on June 13th, is now (September 10th) just turning in, and looks promising to keep up a supply for some time. I consider this variety indispensable.—Mr. A. JEFFRIES, Gardener to J. BALFOUR, Esq."

VEITCH'S DWARF MAMMOTH.—A heavy-cropping Pea of excellent quality; a continuous bearer, of dwarf vigorous habit, producing large well-filled pods; a superior exhibition variety 2½ ft. 2 6

"Veitch's Dwarf Mammoth filled better than any other on the cold east coast, of good flavour, and good for exhibition.—Mr. R. DRAPER, Gardener to the Most Hon. the MARQUIS OF LONDONDERRY."

VEITCH'S CHELSONIAN PEA.

"The difference between your seeds and those bought elsewhere is quite remarkable. I should never buy seeds elsewhere. The rows of Peas are perfect and without a break. They have caught up others sown several weeks earlier.—Mrs. KENNARD, Farnham Royal."

VEITCH'S AUTOCRAT PEA.

LATE PEAS—continued.

VEITCH'S AUTOCRAT.—This grand blue wrinkled Pea still maintains its position as the finest and most reliable variety for late use. Its robust habit, freedom from mildew in seasons of prolonged drought, its heavy and continuous cropping, and the superb quality and flavour of the peas when cooked, place it in the first rank of garden peas, and it should be grown in every garden. **FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY**

Height. Per qt.
s. d.

"Autocrat Pea surpasses all other late Peas.—Mr. A. A. FREY, Gardener to Miss E. J. WOOD."

"The most reliable variety in commerce for mid-season and late work.—Mr. S. KERRY, Gardener to C. PARKER, Esq."

"Stood the prolonged drought better than any other.—Mr. H. BERRY, Gardener to Sir JOHN AUB, Bart."

"I have grown your Autocrat Pea here and in Herefordshire for the past fourteen years along with most of the reputed late sorts, none of which have been its equal for colour, flavour, heavy and continuous cropping.—Mr. G. HUTT, Gardener to the Right Hon. Sir W. HART DYKE, Bart."

"Masterpiece and Autocrat are still hard to surpass for late supplies, as each possesses a fine constitution, and seldom mildew if not overcrowded, and plenty of moisture is given, these will frequently continue to bear good crops till quite late in November.—E. BECKETT, *Gardeners' Magazine*."

Goldfinder.—A splendid late variety of the Ne Plus Ultra class; a heavy cropper of excellent quality . . . 6 ft. 1 9

Late Queen.—Very reliable variety for late use, fine broad pods well filled with peas of excellent flavour . . . 3½ ft. 2 6

Maclean's Best of All.—A superior green wrinkled marrow Pea, very prolific, and of finest quality . . . 3 ft. 2 0

Ne Plus Ultra.—Fine dark green, abundant bearer, remaining a long time fit for use; one of the best late Peas . . . 6 ft. 1 9

Peerless Marrowfat.—A fine variety with large well-filled dark green pods . . . 3 ft. 3 0

Sturdy.—Splendid late variety, of robust growth, a great cropper and continuous bearer; pods contain eight to ten large dark green peas of excellent quality . . . 3 ft. 2 3

"From sowings made June 6th I have gathered good dishes of Autocrat and Sturdy Peas for the past six weeks (October 29th). The quality is excellent.—Mr. T. E. BENDALL, Gardener to S. G. LEATHAM, Esq."

Sugar or Edible-Podded . . . 5 ft. 2 0

The Gladstone.—Splendid for main crop and late use, large handsome curved deep green pods, excellent exhibition variety . . . 4 ft. 3 0

Walker's Perpetual Bearer.—A reliable late variety . . . 3½ ft. 1 9

 Peas, Beans, &c., offered by the quart can be supplied by the pint or half-pint.

VEITCH'S BROAD BEANS.

Sow Early Mazagan in November for first crop, or in boxes in January, transplant when hardened off. Sow main crop varieties in February, March and April for succession, in strong, deep, rich soil, the rows 3 ft. apart.

	Per qt. s. d.
VEITCH'S IMPROVED LONG-POD. —The earliest and finest of the Long-pod section, of vigorous habit, perfectly hardy, exceedingly productive, bearing in clusters an abundance of long well-filled pods, each containing seven to ten beans of fine flavour	2 10
Beck's Dwarf Green Gem. —Very prolific and early, of dwarf branched bushy habit	1 3
Early Long-pod. —A well-known good early sort of fine quality	0 8
Early Mazagan. —Hardy, for autumn, January and February sowing	0 8
Green Long-pod, Improved. —Very superior to the ordinary Green Long-pod with large deep green pods almost equal in size to Improved Long-pod	1 6
Monarch Long-pod, Improved. —Very productive variety with perfectly straight pods, containing seven to nine beans of excellent quality; one of the best for main crop	1 0
Johnson's Wonderful Long-pod. —Very productive well-known variety	0 9
Leviathan. —Bearing immense pods 13 to 15 in. long, of fine quality.	2 0
Seville Long-pod. —An early variety with long pods	1 6
Windsor, Broad Improved. —Very large handsome pods, filled with large beans of fine quality; one of the best varieties for general crop	1 3
Windsor, Taylor's. —A well-known prolific sort for general use	0 9
Improved Green Windsor. —Very large pods of a deep green colour	1 3
Green Long-pod. —A well-known very prolific variety with deep green pods	0 10

DWARF FRENCH OR KIDNEY BEANS.

Sow on a warm, dry, well-sheltered border the last week in April for early supply, and at intervals of a fortnight for succession, in rows $1\frac{1}{2}$ to $2\frac{1}{2}$ ft. apart according to the habit of the sort. For forcing, make sowings from November to March.

	Per pt. s. d.
VEITCH'S EARLY WONDER. —This excellent variety is quite distinct in habit, shape of pod, and colour of seed. We can highly recommend this Bean for forcing on account of its dwarf compact habit, earliness and free-bearing qualities, the plant appearing one mass of deep green pods which are very tender and of excellent flavour	2 0

"I picked your Early Wonder Bean in seven weeks from time of sowing.—Mr. E. SMITH, Gardener to Mrs. J. SELIGMAN."

"I do not think it can be beaten for first early forcing.—Mr. F. EDWARDS, Gardener to Sir HENRY HARBEN."

VEITCH'S EARLY FAVOURITE. —This most desirable early variety for forcing or general use, producing an immense crop of very long pods of superior quality, is a cross between the well-known Ne Plus Ultra and Mohawk, with the size and productiveness of the one and the delicate flavour of the other. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY; ALSO AWARD OF MERIT AS A FORCING VARIETY, R.H.S.	2 0
---	-----

"All in every way, and fully ten to fourteen days earlier than any other kind I know.—Mr. F. BEDFORD, Gardener to B. H. BARTON, Esq."

"I have grown Beans inside for thirty years, and have never had better.—Mr. J. TAYLOR, Gardener to H. COLEMAN, Esq."

"Superior to any variety I have ever forced before: on the 2nd February I sowed a batch from which we were able to pick on the 16th March.—Mr. J. TUNNINGTON, Gardener to Col. CHARLESWORTH."

"Comes in quite a week earlier than the older varieties.—Mr. J. VERT, Gardener to the Right Hon. LORD HOWARD DE WALDEN."

VEITCH'S PROGRESS. —A distinct and superior variety, of dwarf habit, bearing an abundant crop of long fine-shaped beans of delicious flavour, adapted for early forcing or the open ground, but most useful on account of its extreme earliness and free-cropping qualities for first supplies in the open. This variety is not readily affected by drought. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY. See illustration, page 10	1 6
--	-----

"A remarkably good Bean for early forcing, in fact the best I have grown.—Mr. W. STRUGNELL, Gardener to the Right Hon. W. H. LONG, M.P."

"I am posting you my seed order for the 31st time. I have found your seeds of a very high standard of excellence, both for germinating power and purity of strains.—Mr. THOMAS E. BENDALL, Gardener to S. G. LEATHAM, Esq."

VEITCH'S IMPROVED LONG-POD BEAN.

VEITCH'S DWARF FRENCH BEANS—continued.

WYTHES' EARLY GEM.

VEITCH'S PROGRESS. See page 9.

Per pt.
s. d.

WYTHES' EARLY GEM.—An improved form of the well-known Sion House French Bean ; an exceedingly fine forcing variety of compact habit, bearing a very heavy crop of well-shaped beans of excellent quality, very tender and of splendid flavour. The plant has a good constitution, and stands the hot dry weather remarkably well. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 1 6

"Distinctly superior to any other variety that I have tried.
—Mr. G. CRADDOCK, Gardener to Col. the Right Hon. M. LOCKWOOD,
P.C., C.V.O., M.P."

"Ten days to a fortnight earlier than other forcing varieties,
a good cropper of sturdy habit, in fact a most reliable Bean.—
Mr. A. BULLOCK, Gardener to E. J. WYTHES, Esq."

VEITCH'S HYBRID.—A robust grower and very prolific, with long erect racemes bearing three to five well-shaped, broad, thick pods which partake somewhat of the character of the Scarlet Runner. As a main crop or late variety it is unsurpassed, and if the beans are picked as they become ready, will continue to bear for a very long period. The seed is quite distinct from all others, closely resembling a small Painted Lady Runner. Should be sown very thinly to allow for full development, and on good ground a few short sticks should be used. Height about 15 in. 2 0

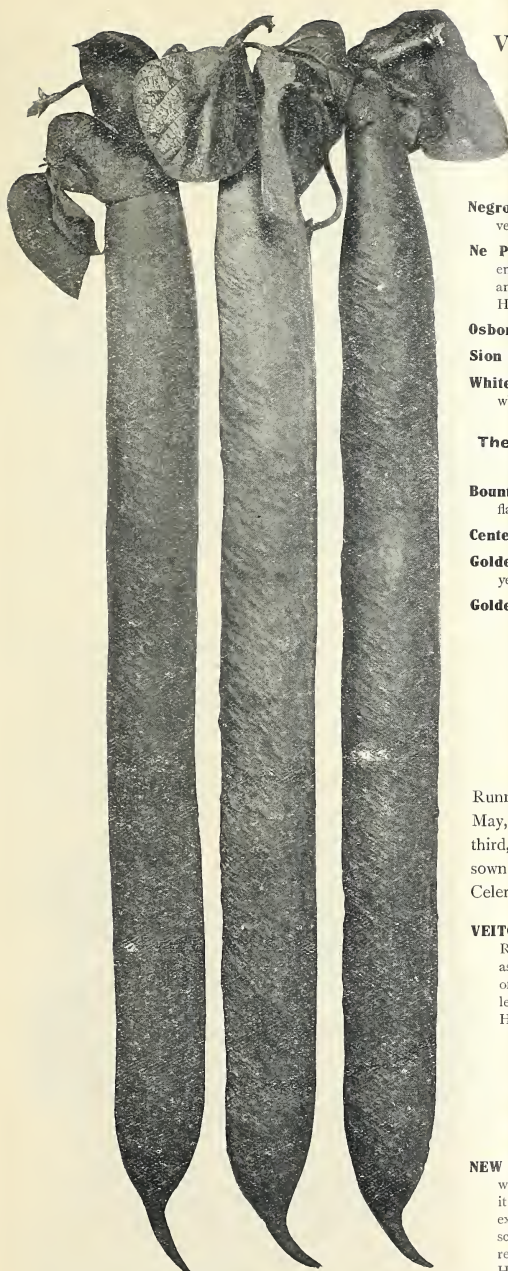

"Growth tall, foliage large, pods long and straight, heavy crop, ready for use July 29th. A very distinct variety that should prove valuable for its lateness and vigour."—*Report of the Royal Horticultural Society.*

Superb Early Forcing.—A distinct variety, admirably adapted for pot culture. It is of dwarf, compact habit, exceedingly prolific and very early. The pods are long and fleshy, of delicate flavour, and very tender ; highly recommended. 2 0

"We forced this Bean extensively, and found it a decided advance on older varieties, being both quicker and producing better-shaped Beans of greater length and substance ; out-of-doors it did equally as well.—Mr. J. C. SMITH, Gardener to P. E. WARBURTON, Esq."

VEITCH'S EARLY FAVOURITE. See page 9.

BEAN, VEITCH'S HACKWOOD PARK SUCCESS.

VEITCH'S DWARF FRENCH BEANS— continued.

	Per qt. s. d.
Canadian Wonder (Selected).—The true large-podded variety, exceedingly prolific; one of the best for general crop and for exhibition	2 0
Magnum Bonum .—One of the best main crop varieties, with long pods of perfect form and splendid flavour	2 6
Negro Long-Podded .—A well-known excellent variety for general crop, very prolific, large fleshy pods; very early	1 3
Ne Plus Ultra .—An excellent variety of dwarf and compact habit, enormously productive both indoors and out, very delicate in flavour, and very early. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY	2 0
Osborn's Forcing .—Dwarf compact habit, recommended for forcing	1 6
Sion House .—Good for forcing and the early border	1 0
White Wonder .—A sport from the well-known Canadian Wonder, with white seed and long fleshy pods of excellent quality . . per pint, 1/6	—

The following have STRINGLESS PODS and are largely used on the Continent and in America:—

Bountiful .—Free-cropping variety, solid thick green pods of excellent flavour	per pint, 1/6	—
Centenary Golden-podded .—Very tender; excellent flavour	1/6	—
Golden Wax-pod or Butter Bean .—A free-cropping sort with golden yellow pods, very fleshy and of excellent quality		2 6
Golden Scimitar .—Excellent large-podded variety of delicious flavour		2 0

EARLY DUN	1 0	MINIATURE HARICOT	3 0
EVERBEARING	2 6	NEGRO MAMMOTH	1 9

RUNNER BEANS.

Runner Beans being tender, should not be sown before the first week in May, another sowing being made at the end of the month, and a third, where a late supply is desired, in June. They do best when sown in trenches 5 to 6 ft. apart, prepared in the same way as for Celery.

	Per qt. s. d.
VEITCH'S HACKWOOD PARK SUCCESS .—The earliest and most prolific Runner Bean in cultivation. On a single raceme may be found as many as thirty beans in various stages of growth, the pods hanging in clusters of from six to ten. The individual pods vary from 9 to 15 in. in length; a remarkable cropper. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY. See illustration	2 6

"The earliest and most prolific Bean I have ever grown.—
Mr. R. RICHARDS, Gardener to H. J. REISS, Esq."

"Have found none to equal this either for crop or table use.—
Mr. A. GIBBS, Gardener to J. W. BOTSFORD, Esq."

"Certainly the best variety I have grown here producing an
abundant crop.—Mr. J. R. TURNER, Gardener to the Right Hon. and Right
Rev. The LORD BISHOP OF LONDON."

NEW WHITE MAMMOTH.—A counterpart of our Hackwood Park Bean but with white seed. Raised by Mr. Beckett, of Aldenham House Gardens, it is without doubt the finest white runner and a grand acquisition for the exhibition table. The fine straight pods are equal to the best of the scarlet varieties. It is an abundant cropper and can be confidently recommended for general use. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY, after trial at Wisley under the name of White Emperor per packet, 1/6 and 2/6

"After growing your seeds for 31 years I have never once had to complain of the quality or productiveness of anything supplied by your house.—
JOHN BOLAND, Gardener to E. C. BLOUNT, Esq."

VEITCH'S RUNNER BEANS--continued.

CHELSEA GIANT WHITE.—A free cropper and continuous bearer. Gigantic, thick, fleshy pods, often measuring 15 in. in length, proportionately broad and of splendid table quality. Excellent for exhibition and general purposes 2 6

"At Barham Court, Mr. Woodward had a long row of Ne Plus Ultra, one half, and Chelsea Giant, a white-flowered variety, the other half. This latter I had not seen growing before, but it was quite double as prolific as the scarlet one. In any case it seems impossible to beat Chelsea Giant as a cropper.—A. D. The Garden.

VEITCH'S MAMMOTH SCARLET.—Abundantly prolific, setting as freely or even more so than the old sort, and bearing in clusters long, broad, thick fleshy pods of a dark green colour, of excellent quality, and particularly tender 2 6

Scarlet.—A well-known productive sort, excellent for general crop 1 0

Scarlet Champion.—An improved variety, with very large pods 1 6

Ne Plus Ultra Scarlet.—An excellent free-cropping selection, long fleshy pods of splendid quality 1 9

Large White.—Good cropper, largely grown for market 1 0

Painted Lady Improved.—An exhibition variety, with large handsome pods, much finer than the ordinary variety 1 6

The following have stringless pods.

Phenomenal.—Very free-bearing green-podded variety of delicious flavour . . . per pint, 1/6 —

"A splendid Bean for private work and home use: the flavour is excellent.—Mr. G. Woodward, Gardener to ROGER LEIGH, Esq."

Wax Flageolet.—Large yellow pods, very prolific per pint, 1/6 —

Princess.—A small white-seeded stringless variety, rather under medium size. The pods may be used when young or until they attain full growth; very tender and delicate in flavour per pint, 1/6 —

Mont d'Or.—Golden Butter Beans, thick fleshy stringless pale yellow pods 2 6

VEITCH'S CLIMBING FRENCH BEAN.

This variety combines the best features of the two types, Dwarf French and Scarlet Runner. The plant grows about 6 feet high, and produces an abundance of long, rather narrow, handsome pods, very fleshy, with all the delicate flavour of the dwarf French Bean. **FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY** 2 6

"Your Climbing French Bean has added further lustre to an already established reputation as a forcing variety.—Mr. W. STRENNELL, Gardener to the Right Hon. W. H. LONG, M.P."

"I always grow Veitch's Climbing French Bean for autumn use. The plants keep in bearing for about six weeks longer than any other kind, and I shall not have any trouble in sending a good dish to table on Xmas Day.—Mr. G. HATCH, Gardener to A. B. H. GOLDSCHMIDT, Esq."

VEITCH'S BEET.

Beet requires a light, deep, rich soil, which should be well manured the previous season. For an early crop sow the first week in April, in drills 12 to 18 in. apart, but the general sowing should be deferred to the latter end of the month or early in May. Thin out to 9 in. apart.

VEITCH'S SELECTED RED BEET.

VEITCH'S SELECTED RED.—A remarkably handsome Beet, deep red in colour, medium size, with an exceptionally small top. Fine flavour, and is strongly recommended I 3

"For evenness of crop, handsome shape, rich red colour, fine grain and delicate flavour in my opinion it has no equal, an ideal Beet for the dining-room and exhibition table.—Mr. G. HURT, Gardener to Sir W. HART DYKE, Bart."

VEITCH'S IMPROVED BLACK.—Very dark colour and excellent flavour, grows to a large size, valuable for early or late use. The best form of dark Beet I 0

IMPROVED GLOBE BEET.

Blood Red.—Medium size, good shape, rich colour and fine flavour Per oz. s. d. 0 6

Cheltenham Green-Top.—Medium-sized fine-shaped roots, with bright red flesh of excellent flavour 0 10

Dell's Crimson.—Specially selected at our Seed Farm, medium size, deep crimson colour and excellent quality; foliage uniform, small and compact, an intense bronzy-purple shade, very effective for bedding purposes, and one of the best for table use I 0

"The perfection of table quality, and not a rogue in a very large breadth of plants.—Mr. WILLIAM CRUMP, Gardener to the Right Hon. EARL DEAUCHAMP."

Egyptian Dark Red Turnip-rooted.—Very useful, rich colour, excellent quality, comes quickly to maturity, valuable for shallow soils; very early 0 9

IMPROVED GLOBE.—Perfect globe-shape; a great improvement on the ordinary turnip-rooted Beets. Very early and of the finest quality, being of a very deep red colour I 3

Middleton Park Favourite.—A fine-shaped Beet, with flesh of a deep crimson colour, and of excellent quality. A selection of the popular Dell's Crimson I 0

Nutting's Dwarf Red.—Medium size, rich dark colour and splendid quality 0 9

Pine-Apple Short Top.—Medium-sized roots of very dark colour and fine flavour I 0

Pragnell's Exhibition.—An exceedingly fine-shaped variety, medium size, of a rich deep crimson colour, excellent quality, and fine flavour; should not be sown too early I 0

Perpetual Spinach or Green.—The leaves are used in the same way as Spinach 0 8

Silver or Sea Kale Improved.—The large white midribs are used as Sea Kale I 0

VEITCH'S NEW SPROUTING KALE.

VEITCH'S EXHIBITION KALE.

BORECOLE or KALE.

Sow in seed-beds, or in drills 9 in. apart, end of March, and again in April; from this sowing plants will be found useful for filling up vacant ground which has been cleared of Potatoes, &c. Plant out in rows 2 ft. or 2 ft. 6 in. apart.

VEITCH'S NEW SPROUTING KALE.—A distinct and valuable addition to this useful class of winter greens. Producing abundantly numerous side sprouts, very tender and of excellent flavour when cooked. The plant, well protected by leaves, will stand severe frosts without injury. The illustration, from a photograph, is taken from a plant cut to show the sprouting character of the Kale. AWARD OF MERIT FROM THE R.H.S. . . . per packet, 6d. 2 0

VEITCH'S EXHIBITION.—Very robust, and produces beautifully curled leaves. Medium height, exceedingly hardy, fine flavour, unequalled for exhibition purposes. . . . per packet, 1/- and 1/6 —
"A very fine strain.—Mr. A. HARVEY, Gardener to J. H. HOULDSWORTH, Esq."

VEITCH'S DWARF LATE CURLED.—Excellent and very hardy. Comes in later than the ordinary Dwarf Green, is of compact habit, and beautifully curled. It stands the coldest season uninjured. . . . 1 0

CHELSEA EXQUISITE CURLED.—Of dwarf, upright growth, forming dense heads of beautifully curled and fringed light green leaves; a most distinct variety, excellent for early use, tender when cooked, and is of delicate flavour. . . . per packet, 1/- —

Asparagus or Buda.—An excellent hardy plain-leaved variety, yielding a supply of sprouts in the spring. . . . 0 10

Cottager's Kale (Selected).—Exceedingly hardy, excellent flavour, a most useful vegetable, producing a large supply of sprouts in spring. Our stock received an AWARD OF MERIT, R.H.S. . . . 0 8

Drumhead.—Hearts like a Drumhead Cabbage, the midribs which extend to almost the outer edge of the leaves, almost equals Asparagus when cooked; very hardy and distinct. . . . 1 0

Dwarf Curled Green.—A very fine hardy Scotch strain, of dwarf growth, excellent for winter and spring. . . . 0 6

Hearting, Read's Improved.—A hardy and distinct variety, with finely curled close heads which resists frost and wet, and stands longer than any other sort before running to seed. F.C.C., R.H.S. 1 0

Labrador Kale.—A fine hardy variety, quite distinct from Buda, per packet, 1/-

VEITCH'S DWARF LATE CURLED KALE.

Tall Green Scotch (Selected).—Hardy, producing a heavy crop. Our stock received an AWARD OF MERIT FROM THE R.H.S. . . . 0 6

VEITCH'S EARLY MARKET BROCCOLI.

VEITCH'S EARLY MARKET.—This exceedingly fine winter variety is in use during January and February. Of very compact habit, the close pure white heads being well protected by the foliage are of excellent quality and can be highly recommended,

per packet, 1/6 —

Backhouse's Winter White —A fine variety, medium-sized heads of excellent quality per packet, 1/- —

Early White Cape or Grange's Early.—Very useful variety for autumn cutting, following the Walcheren; make several sowings 1 0

Per oz.
s. d.

VEITCH'S FINE SPRING WHITE.—A very valuable early variety, coming into use in January and February according to the season. Heads of medium size, beautifully white and compact, well protected, of excellent quality; strongly recommended either for exhibition or culinary purposes per packet, 1/6 —

"I have been cutting for the last two months grand heads, and am still cutting (April 30th).—Mr. J. W. BROWN, Gardener to The Right Hon. the EARL OF ARBINGDON."

"I am at the present time cutting splendid heads of Veitch's Spring White and Early Penzance Broccoli. The first-named is very distinct and valuable, the heads snow-white, of good size, and well-protected.—JOHN CHINREY." *Journal of Horticulture.*

VEITCH'S MAIN CROP.—A magnificent variety of robust hardy constitution, and compact growth, succeeding Veitch's Spring White: large solid snow-white well-protected heads of finest quality. The best variety for main crop per packet, 1/6 —

"A first-rate Broccoli in every respect and a worthy companion to that other first-rate, but later kind, Model.—A. W." *The Garden.*

"Certainly the finest Broccoli I ever saw, the heads are solid and so beautifully compact.—Mr. F. R. HALL, Gardener to the Right Hon. LORD MANNERS."

Adams' Early White.—An excellent variety per packet, 3d. 0 9

Dilcock's Bride.—An excellent hardy variety, of compact growth, with large heads, well protected 1 6

VEITCH'S BROCCOLI.

Sow in well-prepared seed-beds, or in drills 9 in. apart, during March and April, or early in May. When strong enough transplant to final quarters, in good rich soil, allowing 2 ft. each way.

FOR AUTUMN AND WINTER USE.

Per oz.
s. d.

VEITCH'S SELF-PROTECTING AUTUMN.—This valuable Broccoli for autumn and early winter use is of robust upright growth, the heads beautifully white, firm and compact, thoroughly protected by the foliage, and remaining a long time fit for use. It is extremely valuable as a succession to Autumn Giant Cauliflower, per pkt., 1/- 2 0

"What a self-protecting Broccoli should be. Heads perfectly white, large in size and well protected by their own foliage.—Mr. J. EASTER, Gardener to the Right Hon. LORD ST. OSWALD."

"Our standard variety for the past sixteen years, practically a hardy Cauliflower, thereby keeping up a good succession.—Mr. WILLIAM CRUMF, Gardener to the Right Hon. EARL BEAUCHAMP."

"The best variety to give a supply until after Christmas; the heads are well protected, some measuring 10 in. in diameter.—Mr. A. WILSON, Gardener to the Most Hon. the MARQUIS OF ABERGAVENNY."

Michaelmas White. — Large, well-protected heads, of excellent quality; this should be sown in March per packet, 1/6 —

Purple Cape.—A distinct sort of fine flavour; this should be sown in May for autumn use per packet, 1/6 —

Snow's Superb Winter White.—A very superior stock, of hardy constitution, medium-sized heads, remaining a long time fit for use, white, and well-protected; the best winter variety in cultivation per packet, 6d. and 1/- 2 6

Walcheren.—A well-known sort, producing large good-shaped heads; one of the best for successive sowings, which should be made in March and April for early autumn use per packet, 6d. 1 9

BROCCOLI FOR MAIN CROP.

CABBAGE.

Sow early in March and at intervals till May, and plant as opportunity occurs. Sow London or Rosette Colewort in June, for use during the late autumn and winter, when they are invaluable. For spring use, sow Ellam's Early the third week in July, and again with other sorts for succession from the end of July to the middle of August.

Per oz.
s. d.

VEITCH'S INCOMPARABLE.—One of the most reliable Cabbages for the early spring crop. Strongly recommended on account of its freedom from bolting. It is of compact growth, and of excellent flavour . . . per packet, 6d. and 1/- —

VEITCH'S BEACONSFIELD.—An excellent variety, of dwarf habit, conical shape, very tender and sweet, coming into use after Ellam's, a succession between the early and main crop kinds. AWARD OF MERIT FROM THE R.H.S. . . . per packet, 6d. I 6

"Later than Ellam's Dwarf Early, but a very good variety to follow it. It is a dwarf grower, very solid, and just the size liked in a private garden.—G. W. *The Garden*."

VEITCH'S MAIN CROP.—A splendid variety for main crop and general use, ready for cutting after Ellam's Early Spring and before Enfield Market. The broad and conical-shaped hearts attain a large size, stand a long time fit for use, and are of the finest quality. Excellent for spring or autumn sowing . . . per packet, 6d. and 1/- 2 0

"Main Crop Cabbage is a splendid variety. I grew six hundred this year and not one of them ran to seed.—Mr. W. M. Wright, Gardener to Sir S. B. BOULTON, Bart."

VEITCH'S INCOMPARABLE CABBAGE.

"I am sending you my usual order for seeds. This will be the 21st year, and the produce has always been good and up to a very high standard of quality.—Mr. WILLIAM M. WRIGHT, Gardener to Sir SAMUEL BOULTON, Bart."

VEITCH'S MAIN CROP CABBAGE.

ELLAM'S DWARF EARLY SPRING CABBAGE.

VEITCH'S CABBAGE—continued.

VEITCH'S EARLIEST OF ALL.—Exceedingly early, of dwarf and sturdy growth; medium size, good shape; the hearts firm and compact; very tender, and of mild flavour. It is specially recommended for spring sowing, and is not adapted for autumn sowing. Per oz. s. d.

"Veitch's Earliest of All, with a little encouragement in spring, can be had quite as early as the autumn-sown varieties.—Mr. J. F. McLeod, Gardener to J. Pierpont Morgan, Esq."

Veitch's Drumhead Colewort.—A useful variety for autumn and winter use, obtained by crossing Christmas Drumhead and Rosette Colewort; very hardy, of mild flavour. 1 6

Ellam's Dwarf Early Spring.—This remarkably handsome early spring variety is of dwarf, close, compact habit, and grows about 10 in. in height. The hearts are firm, solid, and of excellent quality. As a spring Cabbage it is unsurpassed. Specially adapted for autumn sowing, but should not be sown before the third week in July. It is not recommended for spring sowing. **FIRST CLASS CERTIFICATE FROM THE R.H.S.** 1 0

NATIONAL VEGETABLE SOCIETY, Three Marks were awarded to our stock of Ellam's Cabbage for special earliness and excellence.

"I find your Ellam's Cabbage better than any I have tried elsewhere, it is so hard as well as early and does not run to seed.—Mr. WILLIAM ROBINS, Flore, Weedon."

First Crop.—Early compact variety with solid hearts, conical in shape, with few outer leaves; for those who desire a small Cabbage this variety can be highly recommended. 1 0

Cattell's Reliance.—An excellent variety, medium size, good for main crop or market. 0 8

Colewort, London or Rosette.—Of excellent quality, very hardy, valuable for early winter use; our stock has been very carefully selected. Sow in June. 1 0

Colewort Hardy Green.—Very hardy, useful for late autumn and winter use. 0 8

Drumhead.—A very dwarf stock for garden cultivation. 0 4

Early Dwarf Red.—A splendid dwarf variety, deep blood-red colour; very compact. 1 0

Enfield Market.—Excellent for general crop and market use. 0 6

Heartwell Early Marrow.—Superior main crop variety. 0 8

Little Pixie.—Very early, dwarf and compact. 0 6

Market Garden.—The result of a cross between Ellams' and Offenham, best described as an early form of the latter, and recommended on account of its immunity from bolting. 1 0

Mein's No. 1.—Fine quality, suitable for spring or autumn sowing. 0 8

Nonpareil Improved.—An excellent variety, of finest quality for spring and autumn; one of the best. 0 8

Per oz.
s. d.

Red Dutch.—A very superior stock, of medium size and fine colour. 0 9

Wheeler's Imperial.—An excellent early variety. **AWARD OF MERIT**
FROM THE R.H.S. per packet, 3d. 0 9

Early Offenham.—Excellent for general use. 3d. 0 8

Flower of Spring.—Good for August sowing. 3d. 1 0

Large York.—Fine large market variety. 3d. 0 6

Winningstadt.—Medium size second early. 3d. 0 8

CAPSICUM.

Sow early in March in gentle heat. Prick out in heat as soon as large enough to handle.

Cayenne.—Long red narrow fruit. 0 6

Chili, Mammoth Red.—Improved form with large, handsome bright red fruit. 1 0

Chili, Long Red.—Scarlet, narrow small fruit. 0 6

Long Red.—The well-known sort for pickling. 0 6

Long Yellow.—Handsome long yellow fruit. 0 6

Monstrous Red, Sweet.—Very large bright red, of mild flavour. 0 6

William's Little Gem.—A small-fruited kind, bright scarlet. 0 6

Mixed Varieties 0 6

"Messrs. Jas. Veitch & Sons, Ltd., staged an interesting collection of well-grown and fruited Capsicum plants, which showed, in addition to their edible value, great decorative beauty, especially some of the smaller-fruited ones. The larger-fruited varieties were Mammoth Red, Scarlet Beauty, Chinese, Early Dwarf Red, Long Red, Long Yellow, whilst the smaller ones included Yellow Cherry, Small Round Yellow, the pretty pointed Cayenne Red, and the very ornamental Little Gem. (Silver Banksian Medal)."—*Gardeners' Chronicle*, Sept. 3rd, 1910.

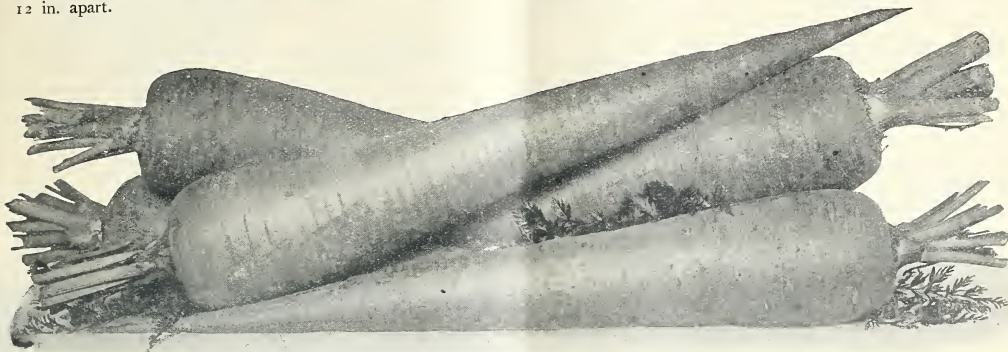

CAYENNE CAPSICUM.

 **Vegetable Seeds** quoted at 6d. to 1/- per ounce can be supplied at 3d. per packet, and those quoted at 1/3 to 2/- per ounce can be supplied at 6d. per packet.

VEITCH'S CARROTS.

Sow the French and Parisian Forcing varieties in a gentle hot-bed early in February; toward the end of the month sow early sorts on a dry well-sheltered border, and again in March for a succession. The general crop should be sown the first week in April in drills 12 in. apart.

VEITCH'S MATCHLESS SCARLET CARROT.

VEITCH'S MATCHLESS SCARLET.—A splendid strain of the intermediate type, but heavier cropping, earlier, and far superior in quality and shape to the old variety. The roots of medium size, symmetrical form and handsome appearance, are of a glowing scarlet colour, the flesh firm, solid and sweet, with very little core; the best variety for main crop, exceptionally suitable for exhibition or culinary purposes I 0

"For main crop or the exhibition table this variety is indispensable.—Mr. T. CHALLIS, Gardener to the Right Hon. the EARL OF PEMBROKE."

"For quality and quantity none better.—Mr. E. RICKS, Gardener to C. T. HOARE, Esq."

"This variety for competition cannot be beaten. I have taken dozens of prizes with it.—Mr. J. BROWN, Gardener to A. A. SEIBS, Esq."

Per oz.
s. d.

VEITCH'S SCARLET MODEL.—The finest selection of the short or stump-rooted type for exhibition or table use, is of vigorous, rapid growth, and remarkably early. The roots are about 6 in. long, regular and symmetrical in shape, thick at the shoulder, tapering gradually to an abrupt stump, the skin is smooth and even, of a bright glossy scarlet colour, the flesh finely flavoured, having, when young, a small light centre changing to red as the Carrot reaches maturity. It deserves to be largely grown I 0

Per oz.
s. d.

"Without a doubt this is the finest short-horn Carrot that it is possible to grow.—Mr. A. BURGESS, Gardener to E. C. FRY, Esq."

"A great favourite here: the description you give of its various splendid qualities in your Catalogue is not in the slightest over-rated.—Mr. J. PITTS, Gardener to Lieut-Colonel Sir AUDLEY NEED, Bart."

VEITCH'S SCARLET MODEL CARROT.

Parisian Forcing.—The earliest variety for forcing. Small dwarf top, and makes a small, almost round, smooth root of bright red colour and excellent quality I 0

Early Nantes.—An excellent early medium-sized stumped-rooted variety of fine quality, with very small core 0 8

French Forcing.—Fine stock, very short, with small top, sweet and tender; suitable for frames or early border I 0

Early Scarlet Horn.—A well-known early summer variety of fine flavour and good colour 0 8

FOR WHITE BELGIAN AND YELLOW BELGIAN see AGRICULTURAL SEEDS, page 99.

"I can say after 30 years your seeds are very good indeed.—M. D. FORD, Gardener to M. H. GOULD, Esq."

VEITCH'S CAULIFLOWERS.

Sow in a frame early in February, and again on a warm border in March and April, planting out when strong enough 2 ft. apart in well-manured, deeply trenched ground. For spring use sow about the 20th of August; transplant and protect through the winter.

VEITCH'S EXTRA EARLY FORCING.—Invaluable for early use.

It is the *beau idéal* of a Cauliflower for the table; beautifully close and white heads, of small medium size. The plant is of particularly dwarf growth and is highly recommended for forcing. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY,

Per pkt.
s. d.

1/6 and 2 6

"I cannot speak too highly of your Early Forcing Cauliflower: sown the end of January in pots, and transferred to the open border without check, beautiful white heads may be had by the end of May.—Mr. H. ROGERS, Gardener to the Right Hon. LORD RENDLESHAM."

"By far the best in the market, no other variety coming in so quickly.—Mr. W. EMERTON, Gardener to the Rt. Hon. EARL BROWLOW."

"So good for forcing, that to be without it is an all-round loss.—Mr. W. STEUGNELL, Gardener to the Right Hon. W. H. LONG, M.P."

VEITCH'S PEARL.—A remarkably handsome main-crop variety, in the way of Walcheren, but perfectly distinct, and a great improvement. The short-stemmed plant, upright in growth, is of robust but compact habit, and produces medium-sized, firm, pure white heads of the finest quality well protected by the foliage

1 6

"One of the very best I have ever grown, pure white, with compact heads and very early.—Mr. THOS. ROBERTS, Gardener to the Right Hon. LORD MAGHERAMORNE."

"Without exception, the best summer Cauliflower following your Early Forcing.—Mr. JOHN PITTS, Gardener to Lieut.-Colonel Sir AUDLEY NEEDLE, Bart."

DANISH GIANT.—A very distinct variety, large white heads of excellent quality sown the first week in April, it is ready the first week in August, or sown in September it can be cut the middle of June

1 6

Dwarf Erfurt Mammoth.—A superior early variety

Per oz.—s. d.
2 0

Early Giant.—An early form of Autumn Giant, fine large white heads of excellent quality

2 0

Early London.—A very fine stock; one of the best for general use and market

1 9

Eclipse.—Excellent for early autumn use

1/-

King of Cauliflowers.—Large, firm white heads and dwarf compact habit

1/-

Snowball.—Dwarf compact-growing, with fine white medium-sized heads, excellent for forcing

1/- and 1/6

Walcheren.—A splendid main-crop variety with large pure white heads; make several successive sowings

1 6

VEITCH'S AUTUMN GIANT.—The grandest Cauliflower in cultivation, with large pure white heads of splendid quality, indispensable in all gardens for autumn use

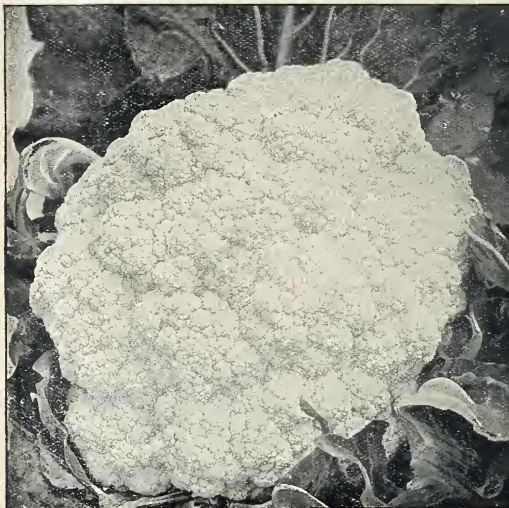

Per oz.
s. d.

2 0

"No Cauliflower to equal it for late summer and autumn use.—Mr. A. GRUBB, Gardener to C. RAPHAEL, Esq."

"Veitch's Autumn Giant Cauliflower, sown in autumn and planted with the earlier kinds in spring, comes in just after the early varieties, and does remarkably well.—Mr. H. TUKE, Gardener to Mrs. HAMLYN."

"It has proved a great boon to the whole gardening community, and it is doubtful if it ever will be equalled, much less surpassed, in its season.—W. G. C." *The Garden*, February 23rd.

VEITCH'S AUTUMN GIANT CAULIFLOWER.

CARDOON.

Large Spanish.—Cultivated for the midrib of the leaf, and used like Celery in soups or stews. Sow in small pots about the middle of April, two or three seeds to a pot, thin to one, and plant out in June in trenches as prepared for Celery. Grow quickly and be careful not to give the plant a check

Per oz.
s. d.

1 0

FRENCH GARDENING.

Having been frequently asked for the French varieties as used by the Parisian market gardeners, we have pleasure in offering the various types of Vegetable as used by them; instructions for growing will be enclosed with each order.

Our Spring Exhibits of Vegetables grown under the French System were Awarded 3 Silver Medals.

"Messrs. Veitch had a very interesting exhibit of Lettuces and Radishes grown under cloches in the French Style. These were very fine and created much interest among visitors. Silver Banksian Medal."—*The Garden*.

"Messrs. Jas. Veitch & Sons, showed a collection of vegetables, including numerous Cabbage Lettuces, Paris Market, Early France, White Passion, Early Favourite, Heartwell and Golden Queen and numerous varieties of Radishes. Silver Banksian Medal."—*Gardener's Chronicle*.

VEITCH'S EARLY ROSE
CELERY.

VEITCH'S SUPERB WHITE
CELERY.

VEITCH'S CELERIES.

When required for exhibition or early use, sow early in February in gentle heat; for main crop, sow on a mild hot-bed the second week of March, and prick out when ready in a bed out-of-doors, giving a little protection from sun and cold winds; a later sowing may be made the second week in April under slight protection. When the plants are 1 in. high, prick out 5 in. apart in a well-prepared bed of dung and leaf-mould 4 in. deep and they will move better, with good balls and without a check. Plant out 12 in. apart in trenches 5 ft. apart, previously well manured.

RED CELERIES.

Per pkt.
s. d.

VEITCH'S EARLY ROSE.—In size, habit of growth and earliness resembles Major Clarke's, but differs in having the white heart and stems delicately shaded with a beautiful pale rose or flesh coloured tint, which renders it particularly attractive. The stems are very solid and crisp, and of a fine walnut flavour. It is chiefly valuable as an early variety, but the heads remain a long time fit for use. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 1/ and I 6

"Early Rose Celery I consider is one of the best either for early or late use, as it stands extremely well.—MR. ANDREW HARVEY, Gardener to J. H. HOULDSWORTH, Esq."

"Solid, crisp and of a delicious nutty flavour.—MR. T. CHALLIS, Gardener to the Right Hon. EARL OF PEMBROKE."

"I have rows 90 yards in length, every plant sound. It is good for early and late use.—MR. W. ATTREE, Gardener to T. MACKIE, Esq."

"Remarkably solid and crisp, and of excellent flavour.—MR. J. SMITH, Gardener to P. E. WARBURTON, Esq."

VEITCH'S DWARF RED.—A distinct variety of dwarf growth, resembling the Sandringham Dwarf. Fine colour, solid and crisp, and excellent flavour I 0

Aldenham Pink.—Fine early variety, the result of a cross between Wright's Giant White and Standard Bearer. The stems are dwarf, pale pink, and very crisp I 6

Clayworth Prize.—Fine flavoured, solid and large; an excellent reliable sort 0 6

Leicester Red.—Compact-growing, medium size, good colour 0 6

Pink Beauty.—A splendid new selection, excellent flavour; very crisp and good I 0

Major Clarke's Fine Solid Red.—Fine for early use. Robust, compact, medium growth, very solid hearts, which blanch easily. Very crisp, of excellent flavour, an extremely useful reliable sort I 0

Standard Bearer.—A splendid red variety of sturdy, robust habit. Grows to a heavy weight, good quality, solid, juicy, and of a fine nutty flavour I 0

Sulham Prize Pink.—A bold growing and crisp sort, medium size and superior flavour I 0

Williams' Matchless Red.—Crisp, juicy, and fine flavoured 3d. and 0 6

WHITE CELERIES.

VEITCH'S SUPERB WHITE.—The most perfect type of White Celery for table use. It may be best described as the true pure white counterpart of the well-known Major Clarke's Solid Red, like that variety is of compact growth, and though coming into use early, remains a long time in perfection. The stems blanch pure snow-white, are perfectly solid, crisp, and of superior flavour. This splendid variety is a most desirable acquisition and, like Early Rose, has become an established favourite; these two are the best representatives of their respective types 1/ and I 6

"Your Superb White Celery is firm, solid, crisp and of beautiful flavour.—MR. G. JOHNSON, Gardener to G. E. GILLET, Esq."

"Splendid flavour, very solid and crisp, and keeping well late in the season.—MR. A. ALDERMAN, Gardener to H. CARBONOW, Esq."

"Undoubtedly the finest in cultivation; its nutty flavour surpasses all.—MR. W. EMERTON, Gardener to the Right Hon. Earl Brownlow."

Incomparable Dwarf White.—Fine nutty flavour. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 0 6

Sandringham Dwarf White.—Very crisp, solid, juicy and of excellent flavour, splendid for early use, 6d. and I 0

White Plume.—Distinct, variegated foliage, blanches naturally, dwarf habit 0 6

Wright's Giant White.—Large, robust, solid, crisp, very hardy, and of superior flavour; the best large white variety 0 6

Celeriac or Turnip-rooted Celery.—For soups and French salads, the roots being used in the same way as Beet 0 6

Celery Seed.—For soups or flavouring per pound, 1/6 —

"This makes the 25th order for seeds since I have been at Bure Homage. I have always found your seeds very good with good crops from them.—MR. BOOTE, Gardener to MRS. RICARDO."

CHERVIL.

This is always in demand in large establishments. Make occasional sowings from March to August.

Curled.—Used in soups and salads 0 6

Tuberous-rooted.—Sow in autumn 1 0

CHICORY.

Useful for winter salads. Sow in May or June; store the roots in November. When forced in a dark position will blanch in the same way as Sea Kale.

Common (*Barbe de Capucin*) 0 6

Large-rooted.—Fine useful variety 0 6

Witloof.—Large-leaved Brussels; an improved sort 1 0

CHOU DE BURGHELEY.

Sow in March and plant out in good rich soil in rows 2 ft. apart. It forms medium-sized heads like a Cabbage, with a small Broccoli in the centre; perfectly hardy, and of fine flavour . . per packet, 1/-

CORN SALAD (Lamb's Lettuce).

Broad-leaved Italian.—The best variety; very useful for salads in the autumn and winter months. Sow from March to September . . 0 9

COUVE TRONCHUDA

(Braganza, or Sea Kale Cabbage).

Sow in March, transplant in rows 2 ft. apart in good rich soil. A very superior vegetable. The head forms an excellent dish in the autumn, and the thick fleshy midribs of the largest leaves may be cooked in the same manner as Sea Kale 1 0

CRESS.

Where a constant supply is required during the winter, a little should be sown twice a week in boxes or pans placed in gentle heat—in the summer sow once a fortnight out-of-doors. American Cress may be sown at any time after midsummer for winter use. Water Cress should be sown in a damp place under a north wall in April.

Plain or Common.—Ordinary per quart, 2/-; per pint, 1/- 0 3

Extra Curled.—The finest curled variety per quart, 2/- 0 3

American or Land.—Resembling Water Cress 0 4

Australian or Salad.—Pale yellowish green, mild and pleasant flavour, . . per pint, 2/- 0 4

Water Cress, Common per packet, 6d. and 1/-

Water Cress, Erfurt Sweet.—A small-leaved light green variety, less pungent than the common sort per packet, 1/-

VEITCH'S CUCUMBERS.

Sow occasionally during February and March in heat. Keep the plants as near the glass as possible to prevent their growing weakly. Those who have not the advantage of a properly constructed house must fall back on a hot-bed—dung and leaves being the best materials. It should be turned two or three times before making, and allowed to cool a little before the soil is put on.

VEITCH'S CHALLENGER.—Very prolific, about 18 to 20 in. in length, the fruit evenly proportioned, a deep green colour, very short in the neck with a few white spines; the flesh is thick, solid and of excellent flavour. Recommended for the table and the exhibition stage 1/6 and 2 6

"I have exhibited this four times, and taken three First and one Second Prize,—Mr. Wm. ATKINS, Gardener to the Right Hon. the Countess of DONEGAL."

"One of the grandest Cucumbers in cultivation.—Mr. W. BURETT, Gardener to J. H. GURNEY, Esq."

"Very prolific, short-necked, excellent shape and flavour, and very fine for exhibition.—Mr. H. ROGERS, Gardener to the Right Hon. LORD RENDELSHAM."

VEITCH'S SENSATION.—This most desirable and excellent variety, the result of a cross between Improved Telegraph and Matchless, is quite distinct from either, combining the fine shape and colour of Matchless with the free-fruited qualities of Improved Telegraph. Smooth and perfect in outline, with a scarcity of neck and of a handsome dark green colour, it is a very free cropper and of excellent flavour. It has gained honours each time it has been exhibited. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY 1/6 and 2 6

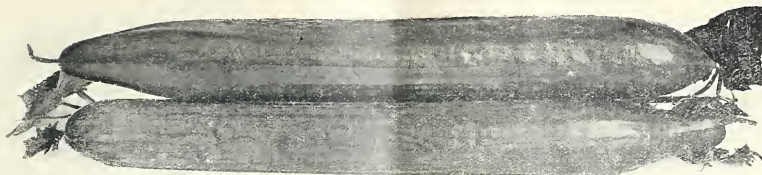

"The fruits are smooth, of medium size, perfect form, with a remarkably small neck, and a deep green colour."—*Report of the Royal Horticultural Society.*

"Very even, and of first-rate quality. Mr. G. WOODWARD, Gardener to ROGER LEIGH, Esq."

"This variety is certainly ahead of any I have grown previously.—Mr. W. BIRKENSHAW, Gardener to Col. R. WILLIAMS."

 Vegetable Seeds quoted at 6d. to 1/- per ounce can be supplied at 3d. per packet, and those quoted at 1/3 to 2/- per ounce can be supplied at 6d. per packet.

VEITCH'S CUCUMBERS—continued.

VEITCH'S MARKET GEM CUCUMBER.

VEITCH'S IMPROVED TELEGRAPH.—A very superior selection of this well-known variety, one of the best and most reliable for either summer or winter cultivation, handsome in appearance and very productive 1/6 and 2 6

"This has for many years been our all-the-year-round Cucumber.—Mr. W. CRUMP, Gardener to the Rt. Hon. EARL BRADCHAMPE."

"I consider this one of the best all-round Cucumbers.—Mr. F. EDWARDS, Gardener to W. H. CULLEN, Esq."

"I consider this still the best and most reliable all-round Cucumber.—Mr. H. E. GRIBBLE, Gardener to the Most. Hon. the MARQUIS OF LONDONDERRY."

VEITCH'S MARKET GEM.—Very handsome Cucumber, most prolific, has a splendid constitution; the individual fruit is of good length with very little neck, and with a few white spines. Sets freely, a very quick grower, flesh solid and crisp, and of excellent quality 1 6

VEITCH'S PERFECTION.—A distinct and superior variety of robust constitution, quick in growth and remarkably prolific, bearing generally in pairs short-necked elegant fruit about 18 in. in length, of a beautiful deep green colour, straight and uniform in thickness; the flesh is solid and crisp and of excellent quality; one of the best for either spring or winter work 1 6

"I have formed a very high opinion of your Perfection both for quality and productiveness.—Mr. T. BENDALL, Gardener to S. G. LEATHAM, Esq."

"Telegraph is a good variety, but Veitch's Perfection is an improvement on it.—J. SHEPARD." *The Gardeners' Chronicle.*

VEITCH'S UNIQUE.—This handsome variety, raised by Mr. Mortimer, is of a very dark green colour, and the fruit, which has little shoulder, is long, straight, and of excellent flavour. It is a robust grower and very productive. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 1 6

"A long handsome-fruited variety named Unique."—*Gardeners' Chronicle.*

"I am very pleased with your Cucumber Unique. The plants are laden with fruit.—Mr. H. W. SELLER, Gardener to W. P. GILES, Esq."

Aviator (new).—A very fine prolific new variety, obtained from crossing Market Rival with Improved Telegraph. The fruits are long, smooth and very green. in sealed packets 2 0

Cardiff Castle.—Fine cropping sort, of medium size 1 0

Carter's Model.—Good exhibition variety, of handsome shape 1 6

Every Day.—Very productive, excellent quality, deep green fruit of good length and fine shape. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY 1 6

Lockie's Perfection.—Prolific and handsome dark green variety 1 6

Lord Roberts (Aphorpe).—Dark green colour, very little neck, very prolific and recommended for summer or winter use 1 0

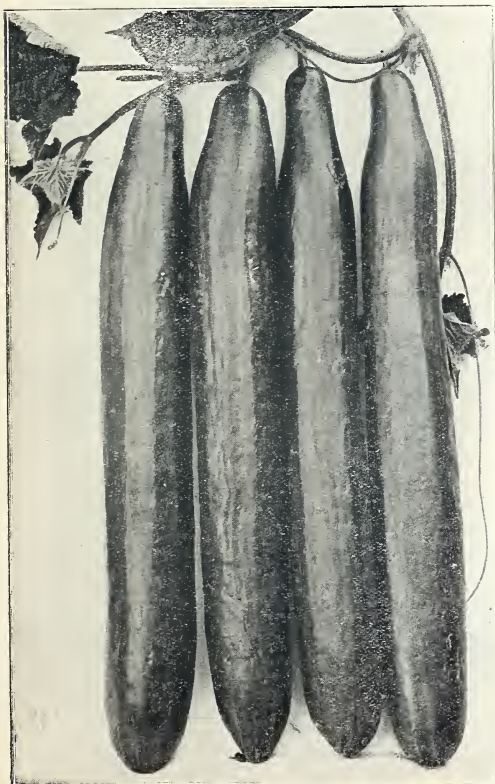

Market Favourite.—Very prolific variety, medium size, largely grown for Covent Garden Market 1/6 and 1 6

Sion House.—An excellent winter variety 6d. and 1 0

Telegraph (Rollisson's).—A well-known sort 1/6 and 1 6

Tender and True.—A handsome Cucumber with scarcely any neck. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY 1/6 and 1 6

New York Purple	Mixed

Each, per packet, 6d.

ENDIVE.

Make successive sowings in drills or small beds, and plant out in rows 15 in. apart from the beginning of May to the end of August, the June sowing being the more important. Plant in frames for winter use and protect from frost.

ENDIVE, VEITCH'S IMPROVED ROUND-LEAVED BATAVIAN.

VEITCH'S IMPROVED ROUND-LEAVED BATAVIAN.—This fine variety is very hardy and much superior to the ordinary Broad-leaved Batavian. It is more compact in habit, better turned in, and fuller in the centre, producing a greater quantity of edible leaves with less waste. It blanches easily, and we consider it the best of the broad-leaved varieties

VEITCH'S IMPROVED GREEN CURLED.—Fine stock, very hardy, beautifully curled and fimbriated, with dark green leaves and large white crisp hearts; the best of the green-curved varieties

Winter Lettuce-leaved.—Very large-leaved variety, excellent for winter use.

Digswell Prize Green Curled.—Large variety, with fine solid heart

Moss Curled.—Smaller but very finely curled; not so hardy as the other sorts

White Curled.—Very fine and tender when young; distinct and beautiful

Our Endives were awarded a Special Certificate for superior quality by the R.H.S.

Mr. H. G. BRIDGER, Gardener to LADY JACKSON."

VEITCH'S CABBAGE LETTUCE.

Sow a little under glass in February for early use, make successive sowings once a fortnight during the spring and summer months and thin or plant out 1 ft. apart; sow the latter end of August for spring use, transplanting to well-sheltered borders for protection.

LETTUCE, VEITCH'S GOLDEN QUEEN.

VEITCH'S GOLDEN QUEEN.—A very distinct and desirable small early variety, of a beautiful golden colour and dwarf compact growth. It forms firm solid hearts, and remains a long time in perfection. This splendid Lettuce is unrivalled for early forcing and summer use, and is invaluable in hot dry seasons. Very crisp, juicy, and of a particularly delicate flavour.

Per pkt.
s. d.

"Is undoubtedly an excellent one, and where Cabbage Lettuces find the most favour it should be grown in quantity. For pits or frames it is most valuable for earliest use.—J. HUDSON," *The Garden*.

"This has proved itself the quickest grower that has come under my notice, with firm, compact little heads of splendid quality.—Mr. J. PITTS, Gardener to Lieut.-Col. Sir AUDLEY NEEDLE."

"For early frame work, Golden Queen Lettuce cannot be over-rated.—Mr. A. BULLOCK, Gardener to E. J. WYTHES, Esq."

"Your Cabbage Lettuce Golden Queen is by far the best I have yet grown, and I intend to use no other kind in the houses.—Mr. W. J. B. MOTLEY, Gardener to E. CANNON, Esq."

"I consider it the best Cabbage Lettuce in cultivation for early work.—Mr. R. ALDERMAN, Gardener to C. ADLANS, Esq."

I 6

VEITCH'S PERFECT GEM.—A distinct compact-growing medium-sized variety, of a rich deep green colour, forming very early a close, solid heart with very few outside leaves, beautifully crisp and tender, and of excellent flavour. The chief peculiarity of this variety is the extraordinary time it remains fit for use, withstanding summer heat and drought, and not running to seed until long after all other Cabbage varieties. It will be found a fit companion to our Superb White Cos, these two varieties being the two best representatives of their respective classes.

Per pkt.
s. d.

"Not only good in quality and colour, but stands a long time without seeding.—Mr. J. TULLETT, Gardener to the Right Hon. LORD BARNARD."

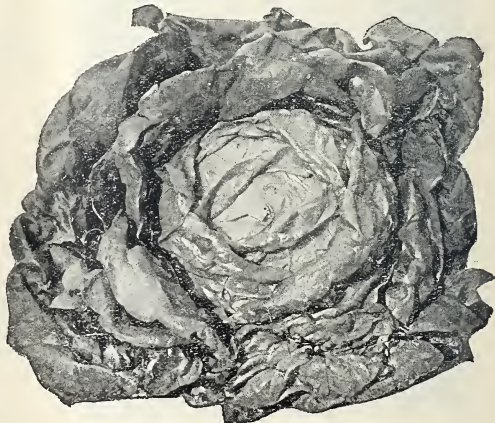

"Exactly what its name implies, the perfection of an early and continuous Summer Cabbage Lettuce.—Mr. W. CRUMP, Gardener to the Right Hon. EARL BEAUCHAMPE."

"A great improvement on the older varieties for frame and outside culture. In frames it comes quickly into use, and outside it resists the drought remarkably well.—Mr. J. BOLAND, Gardener to E. C. BLOUNT, Esq."

"A very fine variety: sown the beginning of February, it was fit to cut before Brown Cos sown the previous autumn.—Mr. A. AITKEN, Gardener to Col. MEIKING."

"One of the best summer varieties grown, quite distinct, forming a close solid heart of first quality.—Mr. W. CHUCK, Gardener to C. FIELLUNSON, Esq."

Early Paris Market.—Distinct and very handsome. Extensively cultivated in the Paris Market Gardens. Hearts very quickly and is invaluable for forcing purposes. Recommended for sowing on a warm border in early spring.

LETTUCE, VEITCH'S PERFECT GEM.

 Vegetable Seeds quoted at 6d. to 1/- per ounce can be supplied at 3d. per packet, and those quoted at 1/3 to 2/- per ounce can be supplied at 6d. per packet.

LETTUCE, COS.

Sow a little under glass in February for early use, make successive sowings once a fortnight during the spring and summer months, and thin or plant out 1 ft. apart. Sow the latter end of August for spring use, transplanting to well-sheltered borders for protection.

LETTUCE, VEITCH'S SUPERB WHITE COS.

VEITCH'S SUPERB WHITE COS.—This magnificent self-folding variety grows to an immense size, and forms large compact close hearts of superior quality and good colour, very crisp and finely flavoured. It stands a long time before running to seed,

Per oz.
s. d.

VEITCH'S SELECTED BATH or BROWN COS.—The best form of this extremely hardy variety, with hearts of enormous size, which are very solid, crisp, and of excellent flavour; it is useful for either spring or autumn sowing, and one of the last of winter Lettuces to run to seed

Per oz.
s. d.

CHELSEA IMPERIAL COS.—A splendid self-folding variety, which comes quickly into use; it grows to a large size, stands the heat well, and is of excellent quality

Veitch's Hardy White Cos.—A splendid large variety, very hardy, adapted either for spring or autumn sowing. Stands a long time before running to seed; it is crisp and very sweet, and hearts well

Alexandra White Cos.—Very useful summer variety

Bath or Brown Sugarloaf.—Excellent self-folding variety, suitable for either summer or winter cultivation. FIRST CLASS CERTIFICATE FROM THE R.H.S.

Eclipse.—Distinct and very dwarf dark green self-folding variety, producing firm, crisp hearts very quickly; recommended for the early border also for frame use

Little Gem or Sucrine.—Intermediate form of dwarf compact habit, with firm solid hearts, exceedingly sweet and crisp

London White.—Useful hardy sort of medium size, fine for early sowing. Good market variety

Mammoth White (Balloon Cos).—A summer variety of great excellence, one of the best for withstanding drought, growing to an enormous size; fine for exhibition and general table use

Paris Green.—A superior stock, self-folding and of close compact habit; the largest and best green Cos variety

Paris White.—Large and crisp, an excellent variety; one of the best for general use

KINGSHOLM | WHITE HEART | MIXED, per ounce, 10d.

Each, per packet, 6d. and 1/-

"The best I have ever grown, uniform in size, tender and crisp."—Mr. W. AUTON, Gardener to the Right Hon. LORD BROUGHAM.

"Folds in without tying; I have some 2 lbs. in weight full of beautifully blanch leaves; it is a superb variety."—Mr. W. ALLAN, Gardener to Col. the Hon. C. HARRORD.

ALL HEART | HICK'S HARDY WHITE | IVERY'S NONSUCH

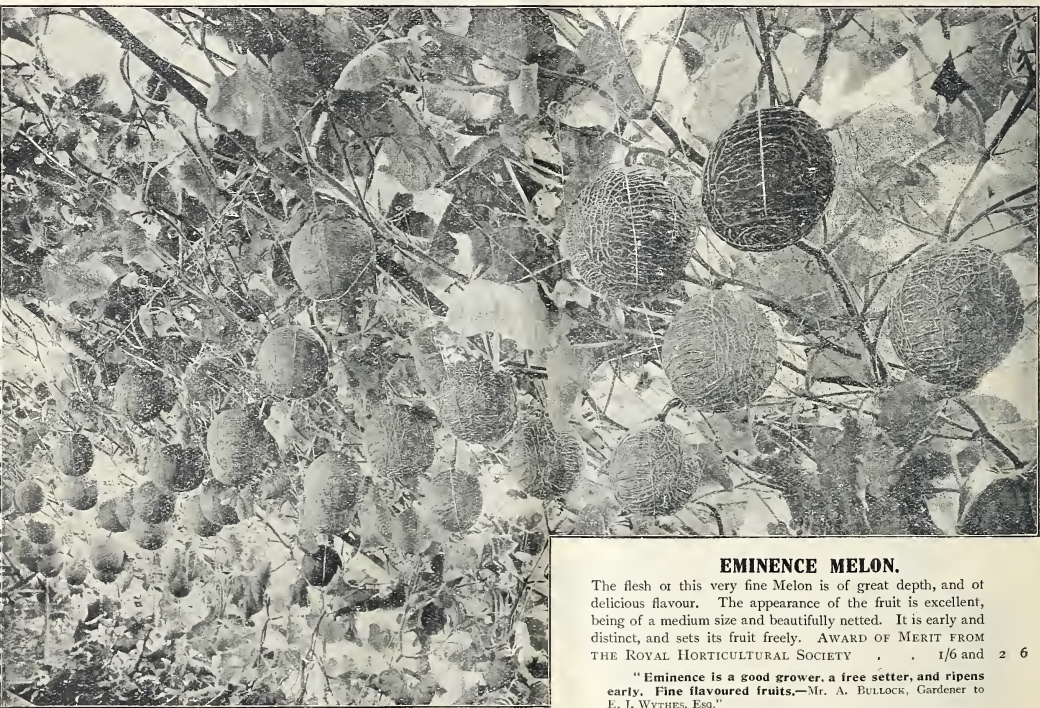

"The seeds sent by Messrs. Veitch have always done particularly well. No one round here grows such Cos Lettuce and Cauliflowers as those from Veitch's Seeds."—Mr. L. P. BOSANQUET, Fruitland Park, Florida."

VEITCH'S MELONS.

Sow occasionally from February till the end of May in a steady bottom heat, keeping a few spare plants in case of accident. Those who have not a Melon house must employ the old-fashioned hot-bed, for which dung and leaves are the best materials. The bed should be made large enough to retain a steady bottom heat all the summer. The plants do best in a strong fibrous loam, mixed with a little soot.

WHITE-FLESHED MELONS.

	Per pkt. s. d.		Per pkt. s. d.
Hero of Lockinge. —Thick pale-coloured flesh, very early and of excellent flavour; a splendid variety for growing in pits or frames.	1 6	The Countess. —The fruit is full average size, with a clear yellow skin beautifully netted; the flesh is very thick, almost white. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY	1 6

EMINENCE MELON.

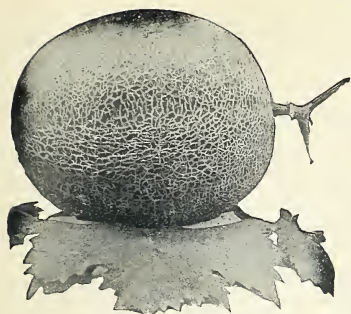

The flesh of this very fine Melon is of great depth, and of delicious flavour. The appearance of the fruit is excellent, being of a medium size and beautifully netted. It is early and distinct, and sets its fruit freely. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY . . . 1/6 and 2 6
 "Eminence is a good grower, a free setter, and ripens early. Fine flavoured fruits.—Mr. A. BULLOCK, Gardener to E. J. WYTHES, Esq."

GREEN-FLESHED MELONS.

Late Perfection. —Large handsome fruit, beautifully netted, of a dull yellow-bronze colour; the flesh is of good depth, very firm, sweet and of excellent flavour. The plant is a robust grower, and the fruit sets freely. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY	1/6 and 2 6	Emerald Gem. —Very handsome, well netted, with fruit above the ordinary size. Flesh very deep and of excellent flavour . . .	1 6
"Late Perfection Melon has been grand; the flavour was excellent.—Mr. JAMES M. BUSH, Gardener to F. J. MYERS, Esq."		Middlesex Hero. —Handsome, medium size, beautifully netted, with flesh of great thickness and excellent flavour, sets freely and does not canker. AWARD OF MERIT FROM THE R.H.S.	1 6
EARL'S FAVOURITE. —Fine flavoured flesh of great thickness, well netted, a free setter; recommended for cool frames. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY,	1/6 and 1 6	Ringleader. —Exceedingly fine pale green flesh of great depth and exquisite flavour, beautifully netted, above the average size; good constitution, very free bearer, sets freely, recommended for early work	1/6 and 2 6
Eastnor Castle. —A magnificent variety, beautifully netted, with great depth of pale green flesh	1 6	Windsor Castle. —Splendid large variety with deep green flesh and attractive appearance; excellent quality	1 6
		ROYAL JUBILEE	Per pkt.—s. d. 1 6

 Vegetable Seeds quoted at 6d. to 1/- per ounce can be supplied at 3d. per packet, and those quoted at 1/3 to 2/- per ounce can be supplied at 6d. per packet.

VEITCH'S SCARLET-FLESHED MELONS.

MELON, INVICTA.

Invicta.—A superb Melon, with great depth of flesh, of a pleasing scarlet colour and exquisite flavour. The individual fruit is large, oval-shaped and densely netted. The plant is remarkably short jointed. AWARD OF MERIT FROM THE R.H.S. 1/6 and 2 6

"The best flavoured and the thickest-fleshed Melon that I have ever grown.—Mr. W. CARR, Gardener to Sir OFFLEY WAKEMAN, Bart."

Guntion Scarlet.—This high-class Melon embraces a combination of good qualities; the fruit is of very attractive appearance, medium size, beautifully netted, and of a very pleasing colour, while the flesh is of great thickness and delicious flavour; it is a most abundant cropper. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 1/6 and 2 6

"I do not know any scarlet variety which has a deeper, richer flesh, and which can be eaten right down to the skin. The colour is very pronounced.—J.C. The Garden."

Syon Perfection.—A very attractive scarlet-fleshed variety, with greenish yellow skin, beautifully netted. The fruit is of medium size, with an unusually thin rind. The plant is a very free setter, short-jointed, quick to mature, and very prolific. The flesh is of great depth and of delicious flavour. AWARD OF MERIT FROM THE R.H.S. 1/6 and 2 6

Beauty of Syon.—A very handsome early variety producing medium-sized fruit, with a bright golden yellow netted skin, nearly round, and of exquisite flavour. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY 1 6

BLENHEIM ORANGE.—Handsome scarlet-fleshed variety 1 6

Per pkt.
s. d.

Frogmore Scarlet.—Exceedingly handsome, slightly above the average size, closely but not heavily netted with creamy white. The flesh is very thick, and of fine flavour; the fruit sets freely. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 1 6

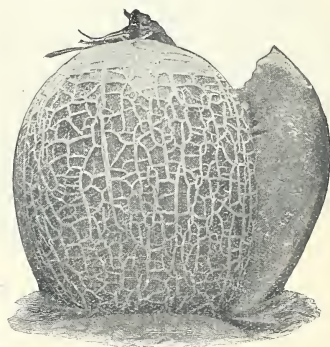

Guntion Orange.—Rather under medium size, nearly round, a rich golden colour, attractively netted, very early. FIRST CLASS CERTIFICATE FROM THE R.H.S. 1 6

Little Heath.—A large scarlet-fleshed variety, of good flavour 1 0

Read's Scarlet Flesh.—A well-known favourite variety, beautifully netted 1 0

Syon House.—A superb early variety, medium-size, with beautifully netted yellow skin; flesh of bright scarlet, of great thickness, and delicious flavour. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 1 0

VEITCH'S MAIN CROP.—A fine selection fully equal to the best introductions of the Improved White Spanish type. It is very quick in growth, and when fully developed attains a large size and heavy weight, having a great depth of bulb, high in the shoulders and full at the base; the bulb is very smooth and solid, and of a beautiful pale straw colour, uniformly handsome and symmetrical. An invaluable strain for exhibition or table use and though generally grown for a main crop, also proves an excellent keeper

Per oz.
s. d.

1 6

"The heaviest cropper I have grown, and withstands the attacks of mildew better than any other variety; it is an excellent keeper.—Mr. H. ROGERS, Gardener to the Right Hon. LORD RENDLESHAM."

"I have just finished Veitch's Maincrop Onions (March 23rd), from last year's growing. All remained as sound as a bell to the last.—CONWAY MORGAN, Esq., Queensville."

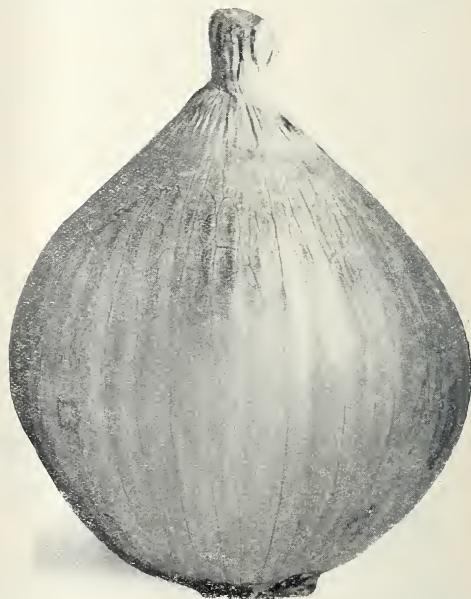

VEITCH'S SELECTED GLOBE.—A very handsome globe-shaped variety, a heavy cropper and superior keeper. An excellent companion to our Main Crop, and one of the best Onions in cultivation

1 6

"Exceedingly handsome in shape, of mild flavour, and a splendid keeper; it is one of the best Onions in cultivation.—Mr. A. WILSON, Gardener to the Most Hon. the MARQUIS OF ABERGAVENNY."

"The seed was excellent, producing very large bulbs, which kept remarkably well, and are of good shape.—Mr. W. H. ALLEN, Gardener to L. CURRIE, Esq."

"I have grown this Onion now for several years, and I find it a grand keeper, having large globular bulbs with small necks; an ideal kitchen Onion.—Mr. J. EASTER, Gardener to the Right Hon. LORD ST. OSWALD."

 Vegetable Seeds quoted at 6d. to 1/- per ounce can be supplied at 3d. per packet, and those quoted at 1/3 to 2/- per ounce can be supplied at 6d. per packet.

VEITCH'S TOMATOS.

Sow in heat during February and March. When sufficiently large to handle pot off and grow on in heat, gradually hardening toward the end of May. Plant out against a south wall, keeping all side shoots picked off and the foliage reduced. Too rich a soil is inadvisable in the early stages, but when the plants are well set mulch with good rotten manure, and occasionally give manure water.

INVICTA TOMATO.

TOMATO, SUNNYBANK.—A very fine Tomato. It is a free cropper bearing long clusters of medium-sized, even, smooth and brilliant red fruits of fine flavour. The fruit sets readily, and the plants crop regularly from base to tip. The flesh is firm, and the fruits keep well and average five or six to the pound weight, and each cluster carries 1½ to 2 lbs. . . . 1/ and 1 6

"Has done better with me than any other variety I have ever grown. It is a very free setter, very uniform in size, perfectly round, and of a fine red colour."—Mr. T. E. BENDALL, Gardener to S. G. LEATHAM, Esq."

"Sunnybank is one of the best for outside or the wall, also for inside it is not to be beaten. Good cropper, medium size and good shape."—Mr. A. B. WADDS, Gardener to J. H. BENYON, Esq."

HAM GREEN FAVOURITE.—One of the most reliable varieties either for summer or winter use. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY . . . 1 0

"The Tomato par excellence in my estimation, and especially for winter fruiting, is Ham Green Favourite."—H. WILSON, *Gardeners' Magazine*.

Hackwood Park Prolific.—Extremely prolific and early, fruit of large size, and a bright glowing scarlet. . . . 0 6

NEW TOMATO, INVICTA.

The average weight of this fine novelty is five fruit to the pound.

The colour is rich and deep and is maintained right up to the last batch in the autumn. The flavour leaves nothing to be desired.

The plant is a strong grower, short-jointed and a continuous cropper from June to December. There is every reason to believe that Invicta will become the variety for market, and will be equally valuable to our customers in private gardens.

The fruit shown in the photograph was taken from plants grown in the open.

Per packet, 1/6.

"Veitch's Invicta is very much the finest variety I am acquainted with. Remarkable cropper, beautiful shape. The right size and flavour first rate."—Mr. J. GLASHEEN, Gardener to L. HIRSCH, Esq."

"Invicta is quite the best of the reds that I have grown."—Mr. W. COWIESON, Gardener to LORD LOW."

"Invicta Tomato is the admiration of everyone."—Mr. HENRY BUTCHER, Gardener to LADY MILDRED COOKE."

"Invicta Tomato is doing grandly with me this season in spite of such unfavourable weather. It is by far the best cropper I have seen. Such clean even fruit and splendid shape."—Mr. F. J. FOSTER, Gardener to J. F. HATFIELD HARTER, Esq."

"I have had a grand lot of your new Invicta Tomato. From fifteen plants (grown inside) I gathered 130½ pounds of fine fruit. I never saw a finer lot."—Mr. H. G. BRIDGES, Gardener to LADY JACKSON."

"Invicta Tomato is a distinct-looking medium-sized brightly-coloured variety, and I was given to understand that it is adapted either for indoor or outdoor culture. As exhibited, it looked a very promising sort, and Tomato-growers should make a note of it with a view to give it a trial next year."—A. W. "The Garden."

VEITCH'S GOLDEN JUBILEE.—Fruit large and perfectly smooth.

A limited seed space and an almost complete absence of core. Clear golden colour suffused with scarlet, the flavour is delicious. Raised at the Royal Gardens, Windsor. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY . . . 1 0

"No variety is of better quality both for flavour and solidity of flesh, and when well ripened it has a most pleasing appearance."—E. BECKETT, *The Garden*.

CHISWICK PEACH.—Colour soft lemon-yellow, with a beautiful peach-like bloom. Of delicious flavour. Very prolific and sets freely. Bunches of six to ten perfectly round solid fruits, specially adapted for pot culture. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY . . . 1 0

"Unequaled for dessert purposes."—*Report of the Royal Horticultural Society*.

"I cannot but think that the deliciously-flavoured Chiswick Peach Tomato, were it widely grown, would become one of the most favoured of all varieties for dessert."—D. K. "The Garden."

Acquisition.—Compact growth, not 3 ft. in height; purplish red, and handsome shape . . . 1 0

Chemin.—Early and free-fruited bright red French variety suitable for forcing or the open ground . . . 0 6

"Your Vegetables and Flowers have been grand this year. I do not think I have had one failure."—Mr. CHARLES HENSLEY, Gardener to Col. LEWIS."

VEITCH'S TOMATOS—continued.

VEITCH'S DWARF RED TOMATO.

AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY.

VEITCH'S DWARF RED.—This very distinct variety can be confidently recommended either for summer or winter use. The plant is of a stiff, upright growth, not more than 3 ft. high, exceedingly prolific, with fruit of a splendid deep red colour—very solid, with very little seed space, and of excellent flavour. Under glass it sets very freely. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY

Per pkt.
s. d.

1 6

"Dwarf Red Tomato is the best variety I have grown, the crop was the heaviest of several kinds grown side by side outdoors.—Mr. EDWIS WHITE, Henderson, Auckland, New Zealand."

"I must again speak in favour of your Tomatoes, Invicta and Dwarf Red. They have done splendidly here again this season.—Mr. J. HUGGINS, Gardener to A. S. BOWLEY, Esq."

"A great success here, it sets freely either under glass or outside, carrying large clusters of solid and good-coloured fruit to within a few inches of the ground.—Mr. H. BERRY, Gardener to SIR JOHN AIRD, Bart."

FROGMORE SELECTED.—The best scarlet Tomato for early forcing or outdoor, medium size, very uniform and smooth, almost round, solid and unusually firm, flesh of great depth and remarkably small seed space. Free-setting and heavy-cropping properties, the plants being literally covered with large bunches of fruit. FIRST CLASS CERTIFICATE FROM THE R.H.S.

Cherry Red.—Ornamental fruiting kind

Cherry Yellow.—Splendid flavour. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY

VEITCH'S TURNIPS.

Sow a little at intervals of two or three weeks from March until the end of July. A good breadth should then be sown for winter use.

VEITCH'S SELECTED EARLY SNOWBALL.—One of the best white varieties, flesh sweet and tender, beautiful shape, unequalled for exhibition, very select stock. per oz., s. d. per pint, 2/6 0 6

Extra Early Milan.—Remarkably distinct strap-leaved variety, coming into use before any other sort, being a week or ten days earlier and remaining a long time fit for use. per pint, 2/6 0 6

"Without a rival for frames or outdoor work, and one no gardener can well afford to be without.—Mr. W. STRONGELL, Gardener to Rt. Hon. W. H. LONG, M.P."

VEITCH'S RED GLOBE.—One of the finest Turnips for garden purposes, very handsome in shape and excellent in quality, remaining a long time fit for use. Valuable for autumn sowing; should be extensively grown. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY per pint, 2/6 0 6

"One of the finest garden Turnips, quite distinct, pure white when cooked: will remain in good condition for a very long time.—Mr. H. NOBLE, Gardener to LADY SMYTH."

Early White Milan.—A white form of the red-top Milan, very early. 0 6

Early Green-top Stone.—An excellent early variety, with pure white flesh, good keeper, mild flavour 0 3

Early Red American Stone Strap-Leaf.—Very early, flesh white and firm, splendid quality 0 4

Early White Stone or Six-weeks.—An excellent early variety for general use, keeps well per pint, 1/9 0 3

Early Strap-Leaf White Stone.—A very early variety, of medium size and fine quality, good for forcing. 0 3

Extra Early Paris Market.—A stump-rooted early white variety, flesh firm and crisp, largely grown for market in France 0 4

Golden Ball or Orange Jelly.—An excellent yellow variety, remaining a long time fit for use 0 4

Yellow Malta.—A very handsome yellow variety, of excellent quality; highly prized in northern districts, and valuable for exhibition 0 4

Chirk Castle Black Stone.—Very hardy white-fleshed Turnip with a black skin, excellent for winter use 0 6

VEGETABLE MARROWS.

Sow in pots in gentle heat early in April, and grow on till about the end of May. They should then be planted out under hand-lights or any other protection, which they will only require for two or three weeks.

VEITCH'S SELECTED.—A medium-sized long white Marrow, of very handsome shape and delicate flavour. It is an immense cropper, and a continuous bearer. Highly recommended for general use per pkt, s. d. 1 0

VEITCH'S DEFIANCE.—Distinct green form, very prolific and of splendid quality. The fruit grows from 8 to 10 inches long 1 0

Bush, Cluster or Chusan.—Very prolific and compact-growing variety of bushy habit, and dark green fruit 0 6

Custard.—Free-bearing, of trailing habit, with ornamental fruit of very fine flavour 0 6

Pen-y-Byd.—A continuous bearer, and sets a fruit at every joint. Handsome, globular, averaging about 6 in. in diameter, a delicate creamy white, thick firm flesh, of fine quality and delicate flavour. FIRST CLASS CERTIFICATE. 6d. and 1 0

Long Green.—Large and prolific 0 3

Long White (short-jointed).—A free-cropping variety of good quality; one of the best for general use per ounce, 1/- 0 3

Moore's Vegetable Cream.—An excellent free-fruited variety, medium size and fine flavour 0 6

Prince Albert.—Fine green-fruited variety of trailing habit. 0 3

"National Vegetable Society, Royal Horticultural Hall, September 28th, 1910.—Messrs. James Veitch & Sons, Ltd., Chelsea, contributed a varied collection representative of the most valuable vegetables in use at this season of the year. Among the most notable dishes were Self-protecting Broccoli, Rosette and Drumhead Coleworts, Rousham Park Hero, Ailsa Craig and Maincrop Onions, Invicta Tomatos, Red Globe Turnips, Lyon Selected Leek, Hackwood Park Runner Beans, Autocrat Peas, Hollow Crown Parsnips, and other kinds. <i>The above varieties, extra transplanted, per 100, 7/6.</i>	

SEA KALE, BEDDARD'S IMPROVED.—This splendid variety is intermediate between Lily White and the ordinary Purple, combining the delicate flavour of the former with the robust constitution of the latter. It is quite distinct in habit of growth, the leaves being less spreading, and growing closer to the crown than the Purple, making a more compact plant. For this reason, as well as for its fine flavour, it is especially useful for forcing.

The following testimonials (selected from a large number) are convincing proof that Veitch's Mushroom Spawn fully maintains its deservedly high reputation for superior quality.

"The Mushroom Spawn has been most satisfactory. We have had splendid crops.—Mr. C. SEDEN, Gardener to G. W. LANCASTER, Esq."

"As usual your Mushroom Spawn is excellent.—Mr. W. BIRKINSHAW, Gardener to Colonel R. WILLIAMS."

"The Spawn you sent me last year turned out excellent.—Mr. GEO. PIKE, Gardener to Colonel BALDOCK."

"I have had a splendid lot of Mushrooms during the last four months from the last you supplied.—Mr. H. PRIME, Gardener to the Most Hon. the MARQUIS OF SALISBURY."

"I have always found your Mushroom Spawn thoroughly reliable.—Mr. JOHN SNELL, Gardener to J. A. KNOTT, Esq., M.P."

"The Mushroom Spawn you sent was excellent and much better than that from other sources.—Mr. W. B. UFGH, Gardener to the Rt. Hon. the EARL OF ELLESMERE."

"The Mushroom Spawn you supplied has yielded remarkable crops this season.—Mr. W. STEIGNELL, Gardener to the Hon. W. H. LONG, M.P."

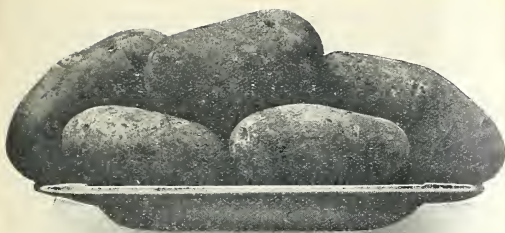

"From a bed made up last December with 1½ bushels Spawn, I have cut 200 lbs. of first quality Mushrooms and even now I get 3 to 4 lbs. per week. I had cuts of 8 lbs. at a time three times a week when the bed was fresh.—H. V. WOODGATES, Esq., Pond Farm, Worcester Park."

"The Mushroom Spawn you supplied in June has turned out excellent.—Mr. E. G. GOLDING, Gardener to F. A. KONG, Esq."

VEITCH'S POTATOES.

FIRST EARLY VARIETIES.

SHARPE'S EXPRESS.

ASH-LEAF, VEITCH'S IMPROVED EARLY.—May fairly be described as the best Ash-leaf Kidney in cultivation, being a very heavy cropper, of handsome appearance, excellent quality, fine flavour, and a first-rate forcer.

"I must say that your Ash-leaf Potatoes and Peas are excellent.—Mr. JOSEPH TRUNDALL, Gardener to W. CRUTCH, Esq."

"A first-class early Potato, one of the very best of the Ash-leaf type, a capital cropper and the quality and flavour all that can be desired.—Mr. H. E. GRIBBLE, Gardener to the Most Hon. the MARQUIS OF LONDONDERRY."

"The most reliable of all the Ash-leaf Kidneys, being a heavy cropper and excellent flavour.—Mr. W. CHUCK, Gardener to H. THELLUSON, Esq."

Ash-leaf, Myatt's Prolific 3 0 10 6

Ash-leaf, Rivers' Royal 3 0 10 6

Duke of York.—An excellent early dwarf-growing, yellow-fleshed variety, heavy cropper, tubers oval-shaped, and of excellent quality 3 0 10 6

Per 14 lbs. Per ½ cwt.
s. d. s. d.

Per 14 lbs. Per ½ cwt.
s. d. s. d.

VEITCH'S NEW ENGLISH BEAUTY.—This fine seedling is a cross between Ringleader and Ashleaf. It does well in most soils, has a medium haulm, and is especially recommended for early planting and forcing, coming quickly to maturity. The tubers are kidney-shaped, pale yellow flesh, with a smooth skin and shallow eyes, and of splendid table quality 4 0 14 0

Early Puritan.—A grand American variety, earlier and of better quality than Early Rose, and producing much heavier crops; cooks beautifully white and floury 2 6 8 6

Lady Llewelyn (new).—A cross between Sir John Llewelyn and Pride of Tonbridge. A splendid cropper of excellent quality and as early as Ringleader 3 6 12 0

May Queen.—Very productive early variety, an abundant cropper 3 6 12 0

Ninetyfold.—A fine early kidney-shaped variety, tubers large, dwarf haulm, good cropper, flesh white, and of splendid cooking quality 3 0 10 6

Ringleader.—A valuable white-fleshed variety, for either frame or outdoor culture; very early 3 6 12 0

Sharpe's Express.—A very early white-fleshed variety, tubers kidney shaped, of excellent table quality; very heavy cropper, dwarf haulm 3 0 10 6

Sharpe's Victor.—One of the earliest and best-cropping dwarf varieties, tubers flattened, roundish oval in shape with shallow eyes. 3 6 12 0

SIR JOHN LLEWELYN.—Recommended for its abundant cropping and disease-resisting qualities. The tubers are handsome in shape and suitable for the exhibition table, whilst when cooked they are of the very best quality. It ripens a few days later than the Ash-leaf.

AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 3 0 10 6

VEITCH'S NEW ENGLISH BEAUTY.

Per 14 lbs. Per ½ cwt.
s. d. s. d.

SECOND EARLY VARIETIES.

VEITCH'S SOUTHERN STAR.—This splendid variety is a seedling from Snowdrop: it is of very robust growth and an enormous cropper, in this respect rivaling many of the recent introductions. The tubers, which are kidney shaped are of handsome appearance, have very shallow eyes, and resist disease well. 5 0 —

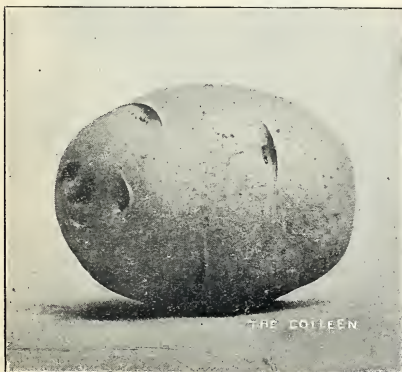

THE COLLEEN (Williamson's).—This grand second early Potato is an enormous cropper of the highest quality. It took first place in the trials of novelties by the National Potato Society in 1906 (Flower white.) AWARD OF MERIT FROM THE R.H.S. 3 6 12 0

Beauty of Hebron.—A heavy cropper and early, tubers tinged with pink around the eye 3 0 10 6

British Queen.—An oval-shaped tuber of exceptionally fine quality, heavy cropper and good keeper 2 6 8 6

Cigarette.—A very handsome second early white round variety of robust habit; light green haulm; an extraordinary cropper, splendid quality 2 6 8 6

Cole's Favourite.—A heavy cropping second early Kidney variety 3 0 10 6

THE COLLEEN

"Messrs. J. Veitch & Sons exhibited at the Northampton Show a magnificent collection of Vegetables, comprising upwards of sixty dishes of distinct varieties in the best possible condition. The collection was not less remarkable for the taste with which it was staged than for the splendid quality of the produce. GOLD MEDAL."—*Gardener's Magazine.*

FINEST WHITE DUTCH CLOVER, per lb., 1/6

VEITCH'S LAWN MANURE, see page 45.

SECATEUR, "THE CHELSEA."

With Double Cutting Blade and Patent Adjustable Spring. No. 14,063.

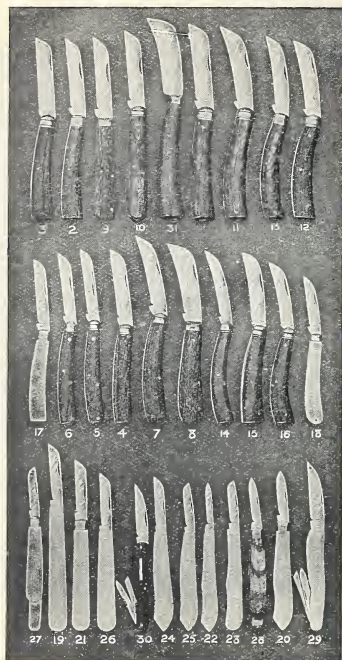

We strongly recommend this Secateur as a thoroughly well made and serviceable tool. The Double Cutting Blade will cut or prune with ease thicker branches than other patterns, and the strength of the spring is so regulated as not to fatigue the hand. We have further improved the original pattern by lengthening and roughing the handle, and adding a patent adjustable spring, so that, in the event of the spring breaking, it can be easily replaced. With ordinary care the tool should last for several years.

Price, 7/6 each, or with cap, 7/9. Extra springs, 9d.

"We have thoroughly tried your 'Chelsea' Secateur for the last two years, pruning some ten thousand or more trees with them each season; we find them excellent implements, better than any other we have used.—CAMPRELL & GETTING, Glewstone Fruit Plantation."

"The best I have ever used, as it is both substantial and makes a better cut than any other.—Mr. H. CLARK, Gardener to Miss HALLIDAY."

— fine for tying or binding, 4-lb. reels, 9d. each.

Bouquet Papers, with cardboard holders, 5 in., 4/-; 5½ in., 4/6; 6 in., 5/-; 6½ in., 5/6 per doz.

Budding Cotton, for budding purposes, 2/- per lb.

Carnation Spiral Stakes, 21 in., 10/6 per 100; 24 in., 12/- per 100; 30 in., 14/- per 100.

Case Opener, with hammer (Fig. 84), 2/6 each.

Chrysanthemum Cups and Tubes (Fig. 137), 9/- per doz.

Chrysanthemum Dressing Instruments, 8/6.

Coir Scrubbers, for cleaning pots, 5/- per doz.

Daisy Grubbers, 1/3 each.

Dibblers, spade-handled (Fig. 70), 1/6 each.

Edging Irons (Fig. 74), 3/6 each.

Elastic Rings, Green, extra strong, for Carnation buds, 1/- per gross.

Elastic Rings, large size, Green, extra strong, for Malmalson, 1/6 per gross.

Flower Sticks, 1 ft., 6d. per 100; 1½ ft., 10d. per 100; 2 ft., 1/3 per 100; 2½ ft., 1/9 per 100; 3 ft., 2/6 per 100; 4 ft., 3/6 per 100.

Floral Cement, for fixing the petals of flowers, 1/- per bottle.

Flower Vases (Fig. 133), in 3 sizes, 5d., 7d. and 1/2 each.

Flower Gatherer (Dubois') (Fig. 73), 4 ft. cane handle, for cutting and holding flowers; light and practical, 18/6 each.

Forks, Digging, 4-pronged (Fig. 95), 4/3 each.

— **Digging**, 5-pronged (Fig. 96), 4/9 each.

— **Dnng**, 4-pronged (Fig. 94), 4/3 each.

— **Potato**, 3 and 4-pronged (Fig. 93), 3/6 and 4/- each.

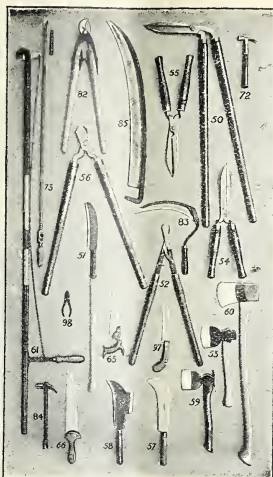

— **Tan or Plnnging** (Fig. 79), 1/6 each.

— **Tan or Plnnging**, long handle (Fig. 80), 1/9 each.

Garden Engine, Galvanized Iron Tub, with registered spreader, 12 gals., 74/-; 16 gals., 88/-; 24 gals., 110/-; 30 gals., 132/-.

Garden Lines, strong, best quality (Fig. 126), 40 yards long, 1/6; 80 yards long, 3/- each.

Garden Reels, galvanized iron, large size (Fig. 71), 3/- each.

Grafting Wax, 1/6 and 3/- per box.

Grass Hooks, new American pattern (Fig. 83), 2/- each.

Greenhouse Glass Cleaner, 4/- each.

Hammers, bright garden (Fig. 72), 1/9, 2/- and 2/3 each.

Hatchets, black-poll (Fig. 53), 3/- and 4/- each.

Hatchets, with claw, polished handle (Fig. 59), 3/6 each.

Hoes, Draw, solid, from 5 to 9 in. (Fig. 77), 10d. to 1/6 each.

— **Draw**, Swan-neck, half-moon shape, 5 to 9 in. (Fig. 76), 1/- to 2/- each.

— **Dutch**, solid, 5 to 9 in. (Fig. 78), 1/4 to 2/6 each.

— **Onion**, new pattern (see illustration), 2/- each.

— **Onion**, with polished handle (Fig. 86), 1/6 each.

— **Onion**, short handle (Fig. 87), 1/3 each.

— **Triangle** (Fig. 75), 1/9 each.

Hones, Celebrated Tan O'Shanter, 6d. and 1/- each.

— ditto, set in polished wood cases, 2/6 each.

Hose, Garden, best quality. Prices on application.

Labels, Plain Wood, 4 in., 5d. per 100; 5 in., 6d. per 100; 6 in., 8d. per 100; 8 in., 10d. per 100; 10 in., 1/3 per 100.

Labels, Painted Wood, ready for immediate use, 4 in., 8d. per 100; 5 in., 10d. per 100; 6 in., 1/- per 100; 8 in., 1/3 per 100.

Ladies' Garden Tools, Spade, Fork, Hoe, Rake, Trowel and Hand Fork, 12/6 per set.

Lanterns (Fig. 132), best garden, with bevelled glass, 3/9 each.

Measuring Rules, 3 ft. steel, 2/- each.

ONION HOE, NEW PATTERN.

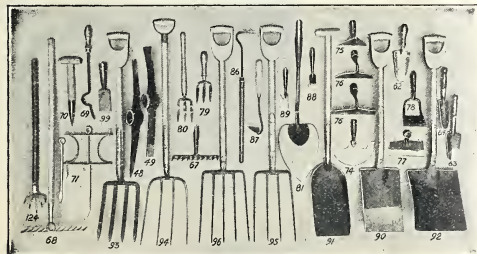

Measuring Tapes, Metallic (Fig. 135), 40 ft. long, 7/- each; 66 ft., 8/6 each; 100 ft., 12/- each.

Measuring Tapes, in German silver case, with flexible steel, 3 and 6 ft. long (Fig. 136), 4/- and 5/- each.

Medicated Twine, green or black, 10d. per ball.

Melon Nets, 3/- per doz.

Mopheads, best quality, 2/- each.

Gardeners' Aprons, best blue Shalloon, 4/- each.

Gishurstine, for preserving boots, &c., 1/- per box.

Gloves, Pruning, strong, harvest tan, 1/9 per pair.

— **Pruning**, strong, Drummond's buttoned, 2/6 per pair.

— **Pruning**, Oxford, 2/3 per pair.

— **Pruning**, fine quality, 3/3 per pair.

— **Driving**, 3/6 per pair.

Moss, Green, for furnishing purposes, 6d. per bundle, 5/- per doz.

Nail Bags, leather, best quality (Fig. 131), 6/6 each.

Oil Cans, for Lawn Mowers, &c. (Fig. 139), 1/6 each.

Paper, Soft Tissue, for packing fruit and flowers, blue, 4/- per ream.

— white, 5/- per ream.

— **Brown**, best quality, 1/9 per quire.

— **Whitey Brown**, for packing, 7/6 per ream.

VEITCH'S GARDEN IMPLEMENTS—continued.

Packing Needles, 6d. each.

— Needles, flat, for hampers, 1/3 each.

Pencils, Wolf's Garden, 3d. each.

Pickaxes (Fig. 48), and **Mattocks** (Fig. 49), with handles, 4/- each.

Pliers (Fig. 98), best garden, 2/- per pair.

Postal Boxes, for cut flowers, 4 x 2 x 1 1/2 in.—5 x 3 x 1 1/2 in.—7 x 3 1/2 x 2 1/2 in.—9 x 4 x 2 1/2 in.—10 1/2 x 4 1/2 x 2 1/2 in.—12 x 5 x 3 in., 1/- per nest of six sizes.

Punnett, Strawberry, in boxes holding six 5-in. punnets, 1/3 per box.
— **Chip, Square**, 1 1/2 lb., 9d. per doz.; 8/- per gross. 1-lb., 1/- per doz.; 9/- per gross. 2-lbs., 1/6 per doz.; 14/- per gross.

Rakes, American (Fig. 68), bright teeth, with handles, 10, 12, 14 and 16 teeth, 2/9, 3/3, 3/6 and 4/- each.

— **Claw**, with handle (Fig. 124), 2/6 each.

— **Daisy or Lawn**, 7/6 each

— **Garden** (Fig. 67), 6 to 20 teeth, 2d. per tooth.

Saws, Pruning (Fig. 65), 12, 15, 18 and 24 in. long, 2/9, 4/-, 4/6 and 6/- each.

— **Grecian Pruning** (Fig. 97), 2/6 each.

— **Pruning**, with book, 4/6 each.

Scythes, American handle and adjustable blade, 9/- each.

— **Blades**, for above, 4/6 each.

— **Patent Riveted** (Fig. 85), 36 in., 4/- each.

— **Patent Riveted**, 42 in., 4/6 each.

— **Stones**, 5d. each.

— **Stone Bags**, brown leather, 3/- each.

Secateurs, wooden handles, one cutting blade (Fig. 40), 3/6 each.

— iron handles, two cutting blades (Fig. 41), 4/6 each. } See illustration,
— steel handles, one cutting blade (Fig. 42), 4/3 each. } page 40.
— iron handles, two cutting blades (Fig. 43), 4/6 each. }

Shears, Branch-Pruning (Fig. 56), small size, 6/-; medium size, 7/-; large size, 8/- per pair.

— **Slide, Branch-Pruning** (Fig. 52), small size, 7/-; medium size, 8/-.

— **Improved Branch-Pruning** (Fig. 82), very powerful, small, 10/6; medium, 14/- per pair.

— **Edging or Border**, 8, 9 and 10 in. (Fig. 50), 6/-, 7/- and 8/- per pair.

— **Hand Grass**, 2/6 per pair.

— **Hand Grass**, trowel shanked, 3/3 per pair.

— **Hedge**, Improved, with notch for strong branches (Fig. 55), 9 and 10 in., 5/- and 6/- per pair.

— **Hedge** (Fig. 54), 8 in., 4/-; 9 in., 5/-; 10 in., 5/6 per pair.

Shovels, Square-Mouth (Fig. 92), No. 2, 3/6; No. 3, 4/3; No. 4, 4/6 each.

— **Stoking** (Fig. 91), 4/3 each.

Shreds, dark cloth, best quality, 8d. per lb.

— **Listing**, for nailing Climbers, Fruit Trees, &c., 8d. per lb.

— **Medicated**, 3 in., 8d. per 100; 3 1/2 in., 10d. per 100; 4 in., 1/- per 100.

Sieves, 1/2 in., 1/2 in., 3/4 in. and 1 in. mesh, 4/- each.

Spades, best quality (Fig. 90), No. 2, 4/6; No. 3, 5/-; No. 4, 5/6 each

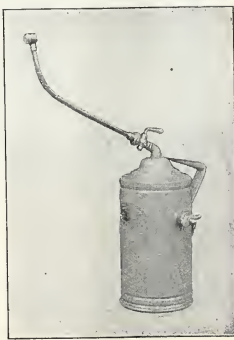

— **Turfing** (Fig. 81), 8/6 each.

Sprayer Alpha, No. 1, 1 quart, 15/-; No. 2, 2 quarts, 16/6; No. 3, 3 quarts, 17/6 each. **Foot Pump** for charging No. 1, 2 and 3, 4/6 each.

— **Knapsack, Four Oaks**, copper container and brass pump, 45/- each.

Alpha Sprayer, Nos. 1 and 2.

Alpha Sprayer, No. 3.

Sponges, for cleaning plants, 3/- and 5/- per doz.

Standard Tree Pruners (Fig. 61), 6, 8 and 10 ft. handles, 6/6, 7/6 and 8/6 each. Extra Knives for ditto, 2/- each.

Sulphurator (Boite à Houppes) (Fig. 138), 3/- each.

Swing Water Barrows, extra strong, 20 gals., 52/6; 30 gals., 66/-; 38 gals., 88/-.

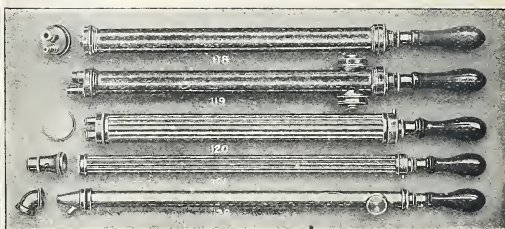

Switching Hooks (Fig. 51), heavy, 5/- each.

Syringes, best quality (Fig. 118), 21/- each.

— best quality, with fixed roses (Fig. 119), 21/- each.

— **Abol** (Fig. 122), 1 1/2 x 20 in., 14/- each; 1 x 20 in., 10/6 each. **Bends** to fit Abol Syringe (Fig. 123), 1/6 each.

— **Ladies' Garden**, 7/6 and 10/6 each.

Syringe, The Four-Oaks Undentable (Fig. 120).—This Syringe, the inner working barrel of which is encased in reeded brass, has been designed to prevent indentation of the barrel, against which it is guaranteed for three years. This also gives a firm grip to the hand.

— No. 1, best quality, 1 1/2 x 20 in., with two roses and a jet, polished Teak handle and quick-filling ball valves, 21/- each.

— No. 2, good quality, 1 1/2 x 18 in., 17/6 each.

Undentable Angle Joints, to use with above, 1 1/2 in., 6/-; 1 1/4 in., 7/-.

The Undentable Spraying Syringe (Fig. 121), 12/6 each; **Angle Joints**, 5/6 each.

The Nesthill Spraying Syringe, with angle bend, 10/6 each.

Thomson's Styptic, for preventing Vines bleeding, 3/- per bottle.

Tinfoil, for wrapping the stems of buttonholes, in sheets about 12 x 9 in., 20 sheets to the pound, 2/6 per lb.

Tobacco Powder Distributors (Fig. 134), 3/- each.

Trowels, Fern, with leather sheath (Fig. 64), 2/6 each.

— **Garden** (Fig. 62), 6 in., 1/6; 6 1/2 in., 1/9; 7 in., 2/-; 8 in., 2/3 each.

— **Garden**, long handles (Fig. 63), 2/6 each.

Wadding, Bleached,

for packing fruit and flowers, in sheets, measuring about 36 x 18 in., 4/- per dozen sheets.

Wall Nails, Cast Iron,

of sizes, 3d. per lb.; 20/- per cwt.

— **Nails**, French, 4d. per lb.; 25/- per cwt.

Water Pots (Fig. 127),

red, 8 quarts, 4/6; 12 quarts, 5/9; 16 quarts, 7/- each; painted green, 1/- each extra.

— green, long spouts and brass roses (Fig. 128), 2 quarts, 4/-; 4 quarts, 5/6; 6 quarts, 6/6 each.

— **Haw's Patent** (Fig. 129), 2 quarts, 1 rose, 3/-; 3 quart shelf, 3/6; 4 quarts, 2 roses, 5/-; 6 quarts, 2 roses, 6/-; 8 quarts, 2 roses, 6/9; 12 quarts, 8/6, rose and spreader; table decorating, 1 quart, 2/- each.

— **Strawberry** (Fig. 130), 2 1/2 pints, 2/3; 4 pints, 3/6; 7 pints, 4/6.

Weed Eradicator, for stabbing weeds on lawns, 8/6 each.

— **Hooks** (Figs. 88 and 89), 1/3 each.

Wire Nippers, useful in bouquet making, 1/6 per pair

Wire Tidy, with divisions for wire, pins, &c., 4/- each.

Wood Wool, for packing fruit, &c., in 56 lb. bales, 9/6 per bale.

— white, extra soft quality, for packing peaches, &c., 6d. per lb.

VEITCH'S INSECTICIDES.

THE "CHELSEA" BLIGHT COMPOSITION , for cleaning all kinds of Stove and Greenhouse Flowering and Foliage plants, Orchids, &c.	s. d.	
1 pint, 1/6; 1 quart, 3/-; 1/2-gallon, 5/6; per gallon	10	6

VEITCH'S THERMOMETERS, &c.

Thermometer, Boxwood, common, 8 in., 1/3 each.

— **Boxwood, polished** (Fig. 101), 8 in., 2/-; 10 in. (Fig. 102), 3/-; and 12 in. (Fig. 103), 4/- each.

— **White Porcelain** (Fig. 100), scale distinctly and legibly marked, and does not get effaced; elegant and durable, 8 in., 4/6; 10 in., 5/6 each.

— **Minimum**, on boxwood, arranged to show the existing temperature and indicate the extreme cold during absence, 3/6 each.

— **Minimum** (Fig. 105), zinc case, bronze brass scale, indicating the extreme cold during absence, 4/- each.

— **Minimum** (Fig. 112), on iron frame, indicating the extreme cold during absence, 3/6 each.

— **Dipping** (Fig. 146), for ground or bottom heat, with round metal point, 12 in., 4/- each.

— **Dipping** (Fig. 109), 12 in., solid brass case, silvered metal scale, 5/9 each

— **Dipping** (Fig. 147), for ground or bottom heat, cased in brass, strong and durable, 18 in., 10/6 each.

— **Dipping** (Fig. 113), 24 in., cased in brass with copper frame, 12/6 each.

The Chelsea Minimum Thermometer (Fig. 110), a highly finished and extremely neat instrument, in copper frame with porcelain scale, the degrees accurately indicated, suitable either for the garden or mansion; price, 7/6 each.

The Chelsea Maximum Thermometer (Fig. 111), in appearance and finish this is similar to the Chelsea Minimum and can be strongly recommended, price, 7/6 each. Special Maximum, 15/- each.

Thermometer, Maximum and Minimum combined, on porcelain scale, with magnet (Fig. 108), 15/- each.

— **Maximum and Minimum combined**, on porcelain scale in copper case, with magnet (Fig. 104), 16/6 each.

Thermometer, Maximum and Minimum combined (Fig. 107), on porcelain scale, in copper case, with magnet and double tube so that previous day's temperature may be registered, 8 in., 10/-; 10 in., 16/6 each.

The mercury and spirit in the tubes of these Instruments is liable to get out of order in transit owing to the shaking they receive, and Messrs. Veitch, although exercising the greatest care in packing, cannot guarantee the safe arrival of these delicate Instruments, nor be responsible for them after despatch.

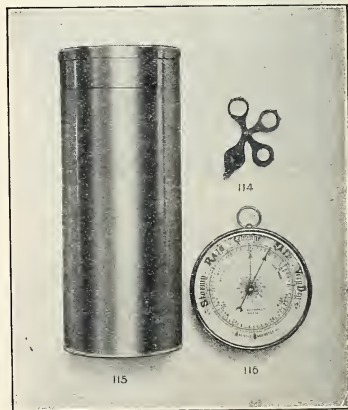

Hygrometer, Dry and Wet Bulb, showing the amount of moisture in a greenhouse, &c., 15/- each.

Pocket Magnifying Lens (Fig. 114), 3/- each.

Rain Gauge, Copper Cylinder (Fig. 115), with graduated Glass Measure, divided to an hundredth of an inch, 18/6 each. Graduated Glass Measure, separate, 3/6 each.

Barometer, Aneroid (Fig. 116), with strong brass case and white dial, a very sensitive, accurate, and portable little instrument for indicating changes in the weather, 17/6 each.

Magnets (Fig. 117), 6d. each.

THE CHELSEA HORTICULTURAL MANURE

— STRONGLY RECOMMENDED FOR —

Vines, Fruit Trees, Pot Plants, Vegetables, &c.

THIS highly concentrated Manure contains only the most essential ingredients for fertilization, and produces a full and perfect development of the plants to which it is applied.

For horticultural purposes it is unrivalled, as it can be easily applied; it is uniform in quality, concentrated in character, containing Ammonia, Phosphates and Potash in the most suitable proportions, thoroughly and carefully blended so as to avoid any danger of unduly stimulating the plant.

It is particularly adapted for Vines and Fruit Trees, as it is especially rich in organic matter; it retains its stimulating properties for an unusually long period, and makes good any deficiency of organic matter in the soil, by supplying to the crop its requisite food.

We confidently recommend it as a safe and reliable Manure for assisting the growth of plants in pots and all kinds of vegetables, and we feel assured that the more its valuable properties become known it will, on account of its excellent quality become more and more popular as the Fertilizer for horticultural purposes.

Directions for using the Chelsea Horticultural Manure

For Vine Borders, Peaches, Nectarines, Figs, &c., use $\frac{1}{2}$ cwt. of Manure to 1 ton of loam.

For Surface-dressing Vine Borders use 1 to $1\frac{1}{2}$ lb. of Manure per superficial yard, and fork in.

For General Potting use 1 lb. of Manure to each bushel of soil.

For Top-dressing Pots use one teaspoonful to an 8-inch pot, increasing or reducing the quantity in proportion to the size of pot.

For Vegetables and General Crops use 5 lbs. of Manure to each rod of ground, or 7 to 8 cwt. per acre.

For Chrysanthemums use one dessertspoonful to a 10-inch pot three times during the growing season and water in.

Price, per cwt., 17/6.

Per 56 lbs., 9/-.

Per 28 lbs., 5/-.

Tins, 2/6 and 1/-.

Quantities of 1 cwt. or over sent Carriage Free to any Railway Station.

Directions for use sent with each consignment.

We have received the following TESTIMONIALS and many others too numerous to publish.

REPORT OF THE ROYAL HORTICULTURAL SOCIETY, CHISWICK.—The Chelsea Horticultural Manure—After many years' trial of this, we confirm our previous reports of its value for all plants, Fruits and Vegetables (*vide report*).

"We applied the Chelsea Manure to Melons, Gloxinias, and Cyclamen, with each of which we are highly satisfied.—Mr. W. FYFE, Gardener to LADY WANTAGE."

"Your Chelsea Manure is a splendid Manure for Vines. It has greatly improved the Vines here.—Mr. W. HOTHER, Gardener to Colonel ALLISON."

"Chelsea Manure is splendid for Tomatoes and other Vegetables, one of the best I have used for years: quite reliable.—Mr. W. GAIGER, Gardener to H. T. TATHAM, Esq."

"Chelsea Horticultural Manure has proved a great success for Chrysanthemums. It materially assists in building up the right kind of growth to produce large and well coloured blooms.—Mr. H. SLAKE, Gardener to G. J. FENWICK, Esq."

"Has been very satisfactory, especially with Vines.—Mr. F. GIBBS, Gardener to MRS. MOUNCEY."

"I have tried your Chelsea Manure with good results both on Tomatoes and Chrysanthemums. I consider it an excellent Manure for plants and general use.—Mr. J. MAY, Gardener to F. L. DAVIS, Esq."

VEITCH'S SPECIAL LAWN MANURE.

For Top-dressing Lawns mix 6 lbs. of Manure with a barrow load of loam, this is sufficient for 30 square yards; or apply at the rate of 7 cwt. per acre. For bare patches use 3 ounces to the square yard.

Price, per cwt., 20/-.

Per 56 lbs., 11/-.

Per 28 lbs., 6/-.

Tins, 3/- and 1/6.

Quantities of 1 cwt. or over sent Carriage Free to any Railway Station.

VEITCH'S FLOWER SEEDS.

HARDY ANNUALS.—Sow in the open border from March to June, also in the autumn. **HALF-HARDY ANNUALS** should be sown in March or April on a moderate hot-bed, or on a warm border in May. **HARDY BIENNIALS AND PERENNIALS.**—Sow from March to June; many of these will stand the winter without protection. The choice Annuals such as have small seeds require to be sown in a prepared soil—leaf mould, friable loam and sand, and covered very slightly. The best time for sowing is in dry weather, when the seeds germinate more freely, and are not so liable to mildew. **Important.**—The young plants should be well thinned out before there is any possibility of their being weakened by overcrowding. **TENDER ANNUALS** should be sown in pans or pots, and placed near the glass in a good hot-bed, using water very sparingly till the seeds have germinated. When the young seedlings are fit to handle, they should be pricked out into other pots, which will prevent their damping off until large enough to be transplanted singly.

BEDS OF ANNUALS AT OUR LANGLEY NURSERY.

VEITCH'S SILVER CUP COLLECTION OF ANNUALS AND BIENNIALS

Which gained the "Sherwood" Silver Cup at the Royal Horticultural Society's Hall. One packet each of the following for 10/6.

Aster, Giant Comet, white
 Buza maxima and Agrostis pulchella
 Calceola coccinea (Tassel-flower)
 Calliopsis tinctoria
 Campanula Calycanthema rosea
 Candytuft, Dwarf Hybrid, rose

Carnation-Marguerite, mixed
 Centaurea Marguerite, blue
 Chrysanthemum carinatum tricolor
 Chrysanthemum inodorum fl. pl.
 Clarkia elegans, double rose
 Dianthus Heddergii, mixed

Gypsophila elegans alba
 Himmelmanna fumaricifolia
 Larkspur, Empress carmine
 Lavatera splendens rosea
 Mignonette, Giant Crimson
 Phlox Drummondii, large-flowered

Poppy, Shirley Hybrid, selected
 Salpiglossis, Veitch's large-flowered
 Schizanthus retusus albus
 Stock, Perpetual, Princess Alice
 Sunflower, Miniature Stella
 Sweet Peas, Veitch's Special Mixture

"I have sown and grown successfully for the past ten years your Vegetable and Flower Seeds.—Mr. N. THORNE, late the Gardener, Tihoo, India."

A Silver Medal was awarded James Veitch and Sons, Limited, for a Collection of Seeds, &c., at the Lahore Exhibition. November, 1909.

COLLECTIONS OF FLOWER SEEDS FOR EXPORT.

From long experience we are in a position to select suitable varieties for all parts of the World, and properly prepare and pack to ensure safe transit where direct communication exists. See page 2.

"Vegetable and Flower Seeds for the past 22 years I have found most satisfactory.—Mr. ARTHUR FITT, Gardener to H. L. C. BRASSEY, Esq."

ABUTILON

Giant Hybrids.—Plants of very vigorous growth, branching freely, with large and strong foliage. The branches are thickly covered with buds and blooms, which hold themselves upright, and when fully expanded pass from bell-shape to an almost open form about $3\frac{1}{2}$ in. in diameter. The range of colour is very great and includes many new tints. They are of easy culture and commence blooming the first season, and for indoor decoration during the winter and spring months, and also for bedding out in the summer they are invaluable. Seed should be sown in heat, and the young plants afterwards gradually hardened off . . . 1 0

ACACIA

Grandis.—An easily cultivated species, forming fine bushes, and commencing to bloom when about 18 in. in height; its numerous deep yellow flowers are of good size. Height 3 to 5 ft., per pkt., 2/6

Lophantha.—Bright yellow flowers and finely cut foliage, useful alike in pots for greenhouse decoration or for planting out, flowering well when of large size under glass. The seed should be chipped before being sown, per packet, 6d.

Armata, per pkt, 6d.

Dealbata.—The Mimosa of Covent Garden Market, per packet, 6d.

ACONITUM

Napellus (Monks-Hood).—Handsome plants, producing abundance of dark blue flowers in large terminal spikes. They grow freely, are of easy culture, requiring the same treatment as the Delphinium which they very much resemble. Hardy herbaceous perennial. Height 2 ft., per packet, 6d.

ACONITUM

Wilsoni.—This recent introduction from China, with large pale blue trusses, is the latest flowering of all the Monks-Hood, it attains a height of 4 to 5 ft., and after the terminal flower truss is over, lateral shoots are produced which prolong the flowering season into November . . . 1 6

ACROCLINIUM.—Valuable half-hardy annuals with Everlasting flowers, which for after use in a dried state should be cut as soon as fully expanded, and dried in a dark airy place. Height 1 ft.

Double Rose . . . 0 6	Single Rose . . . 0 3
— White . . . 0 6	— White . . . 0 3

Per pkt.
s. d.

ADONIS

Vernalis.—Hardy perennial, flowering early in spring, with handsome yellow blossoms which are set upon dense tufts of Fern-like foliage. The seed takes a long time to germinate. The flowers are finer when the plants become established. Height 9 in. 0 3

Festivals (*Flos Adonis*).—A beautiful free-flowering annual with small crimson flowers. Height 9 in. 0 3

AGERATUM.—Free-growing half-hardy annuals, well suited for bedding purposes, either in ribbon borders or in masses. They succeed best when planted in not too rich soil. Height 9 in.

Imperial Dwarf Blue.—Light blue 0 6

— White.—Fine white 0 6

Cannell's Dwarf Blue.—Lavender-blue 0 6

Mauve Beauty.—Very free large-flowered variety, dwarf and compact habit 0 6

AGROSTIS.—Hardy annuals easily grown, and extremely useful in a dried state for vases in the winter season; also well suited for decorative purposes when grown in small pots. The most elegant and graceful of all the ornamental grasses.

Nebulosa.—Height 12 in. 0 3

Pulchella.—Height 18 in. 0 3

ALONSOA.—A half-hardy annual with Chorizema-like flowers, freely produced in summer, suitable for pot-culture or bedding. When grown in the open, a sunny spot should be chosen.

Scarlet Gem.—A pretty and compact form, covered with orange-scarlet flowers and golden stamens. Height 9 in. 0 6

Warszewiczii compacta.—Bright scarlet flowers. Height 1 ft. 0 3

ALSTROMERIA

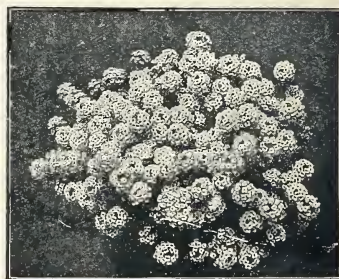

Chilensis.—Hardy tuberous-rooted perennial. The seeds should be sown where they are to remain, in a warm position, mulching being placed over the plants in the autumn and winter as a slight protection. Height 2 ft. 0 6

ALYSIMUM (*Königa*)

***Sweet** (*Maritimum*)

—Charming hardy annual for beds and edgings; flowers white. Height 6 in. per ounce, 9d.; per packet, 3d.

Little Dorrit.—A greatly improved form of *Little Gem*, being much more compact and forming a perfect little bush with miniature white flowers, per packet, 6d.

ALYSIMUM, LITTLE DORRIT.

Minimum (new).—A charming dwarf variety with sweet-scented white flowers. Height 3 in. 1 0

Procumbens.—White Carpet Alyssum, of dwarf spreading habit; a most useful and pretty annual. Height 3 in. 0 6

Saxatile compactum.—Hardy perennial. Flowers yellow, freely produced in the spring months. Height 9 in. 0 6

AMARANTUS.—Half-hardy annuals with handsome foliage, valuable in the sub-tropical garden; rich soil and plenty of moisture are essential to success. *A. salicifolius* is a fine feature in the autumn months. *A. tricolor* is best grown as a pot plant for the conservatory.

Melancholicus ruber.—Blood-red foliage. Height 1 ft. 0 3

Salicifolius.—Graceful foliage, banded and tipped. Height 3 ft. 0 6

Tricolor.—Foliage scarlet, green and yellow. Height 1½ ft. 0 3

Those marked thus * are adapted for autumn sowing.

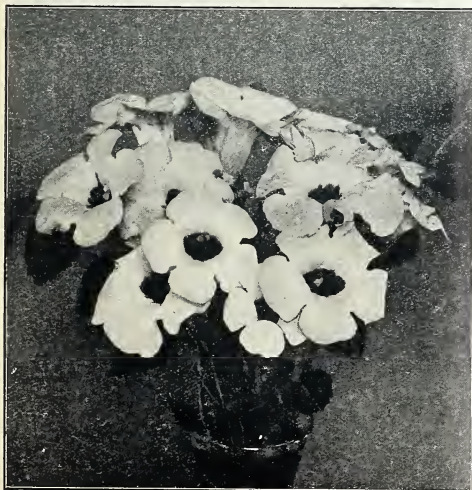

AMARYLLIS.

AMARYLLIS (Hippeastrum)

Veitch's New Hybrids.—Saved from our Gold Medal Collection, have also gained many First Class Certificates from the Royal Horticultural Society. Sow in brisk warmth and grow on for two years without check 2 6

See page 96 for Special Offer of Bulbs.

AMPHICOME EMODI.

AMPHICOME

Emodi.—A very graceful and ornamental greenhouse plant with erect bell-shaped flowers which resemble *Incarvillea Delavayi*, though smaller. The plant is of dwarf habit, with numerous rose-pink flowers, with orange throat, which open in succession, and are borne on long stalks well above the pinnate foliage making a most charming effect. It is a perennial and may be grown as a herbaceous plant in the climate of the south-western counties, if protected from excessive moisture and severe frosts. Seed should be sown in early spring in well-drained pots of sandy soil, and placed in a greenhouse. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY. Height 18 in. 2 6

ANAGALLIS.—Very free-flowering and showy half-hardy annuals of dwarf habit, succeeding best in somewhat dry situations with all the sunshine possible; should be sown where the plants are to grow. Height 6 in.

Blue	o 3		Finest Mixed	o 3
Scarlet	o 3			

ANCHUSA, DROPMORE VARIETY.

ANCHUSA

Italica, Dropmore Variety.—A fine large hardy herbaceous plant, with heads of beautiful flowers, of a most lovely shade of gentian-blue, a first-class border plant; all the seedlings are very fine, some even better than the *Dropmore* variety itself; suitable for shrubbery borders, also excellent for cutting and very good for bees. Height 4 ft. See illustration o 6

ANEMONE.—In soils suited to their growth the sowing of seed is a ready mode of obtaining a stock. Sow from May to July.

Crown-flowered (St. Brigid or Irish Strain).—A beautiful free-flowering strain of robust habit, containing many brilliant shades of colour, flowers large and mostly semi-double. Choice mixed 1 o

Coronaria (Single Poppy Anemone).—Mixed colours o 3

Fulgens.—Dazzling vermilion-scarlet with jet-black centre o 6

ANGELONIA

Grandiflora alba.—A very pretty and graceful greenhouse perennial, flowering the first season from seed. The extremely numerous pure white flowers, stand out in contrast to the elegant dark-green lanceolate foliage. The plant is especially adapted for room or conservatory decoration, blooming profusely throughout the winter months; it is also most valuable for table decoration 1 o

ANTIRRHINUM (Snapdragon).—In this popular flower great advances have been made, both in the diversity of colours and the habit of the plants. For planting on sloping banks or on dry soils these are strongly recommended; with too much moisture the growth is often stronger than is desirable. Should be treated as biennials, but do not come quite true from seed.

Veitch's Improved Tall Antirrhinum.—Very large flowers of great substance and brilliant colours, including all the new shades. Height 3 ft.

Coral-pink o 6

Ordinary, per ounce, 2/- o 3

ANTIRRHINUM, THE BRIDE.

DWARF ANTIRRHINUM.—An intermediate form of neat growth, and densely covered with flower spikes; if sown in gentle heat in February or March they will make a fine display throughout the summer and autumn. These are well adapted for beds and masses. Height 1 to 1½ ft.

Crimson King.—Large rich deep velvety crimson flowers, excellent for massing o 6

Golden Queen.—A most beautiful dwarf variety, covered with large golden yellow flowers; a gem for beds or pots o 6

Salmon Rose.—Very rich golden rose, with white throat o 6

Sunset.—Intense orange-scarlet, most pleasing and effective o 6

The Bride.—The finest pure white dwarf large-flowered variety o 6

Dwarf Pink. o 6 | **Dwarf Yellow.** o 6

TOM THUMB ANTIRRHINUM.

—These charming varieties are of dwarf compact growth, and come very true in colour from seed; they are most effective when grown in beds or masses, and deserve a place in every garden. Height 6 in.

Crimson o 6
White o 6
Yellow o 6
Mixed Colours o 6
Assortment of 8 distinct vars, 2/-

VEITCH'S CHOICE HYBRID AQUILEGIAS.—This magnificent strain of long-spurred Columbines, may be seen in its full beauty at our Langley Nursery in the month of June. The colours include the most charming combinations of lavender, blue, mauve, white, yellow, orange, scarlet, and bright rose-pink. The plants are perfectly hardy. See illustration . . . 1/- and 1 6

Californica hybrida.—Large flowers, centre petals golden yellow, sepals and spurs deep orange-red. Height 2 ft. o 6

Chrysantha.—Showy bright yellow flowers. Height 2 ft. o 6

Grandiflora alba.—Pure white 1 o

Glandulosa (Grigor's variety)—Large elegant flowers, of rich deep blue, with pure white centre. Height 1 ft. 1 o

Skinneri.—Large scarlet and yellow flowers. Height 2 ft. o 6

Mixed Colours.—Double and single per ounce, 1/- o 3

Per pkt.
s. d.Per pkt.
s. d.**ARABIS**

Alpina.—Hardy perennial with pure white flowers, blooming early in the spring, valuable for edging and rockwork; will grow well in rather shaded positions. Height 6 in. . . per ounce, 2/6 0 3

ARALIA

Sieboldii.—A most desirable foliage plant well suited for the conservatory as well as for standing out-of-doors or plunging in flower beds during the summer. Large plants can be planted out with scarcely any risk of injury in the winter. NEW SEED READY IN APRIL. Sow immediately on receipt. Height 2 to 3 ft. 1 0

ARGEMONE

Grandiflora.—Handsome hardy annual, with large white flowers like *Papaver nudicaule album*. The thistle-like foliage is spotted with white, and very prickly. For early flowering, seed should be sown in gentle heat in March; plant out in May in any garden soil, and thin well out so as to give the full beauty to each individual plant. Height 2 to 3 ft. 0 6

ASTILBE GRANDIS.

ASTILBE

Davidii.—A most attractive and remarkable hardy herbaceous perennial, with graceful spikes of deep rose-violet or mauve-coloured flowers, borne on stems 6 ft. high. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY. 1 6

"The most important hardy perennial introduced during the past few years."—*Journal of the Royal Horticultural Society*.
"Without doubt the greatest acquisition to hardy plants for many years."—*The Gardener*.

Grandis.—A good companion for *A. Davidii*; white flowers. Height 6 ft. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY. See illustration. 1 6

"This new species is a worthy companion to the now well-known *A. Davidii*, very similar in habit and vigor of growth, but with pure white flowers."—*Gardener's Chronicle*.

ARCTOTIS.—Showy half-hardy perennials coming into maturity the first season from seed, which should be sown early in gentle heat. They grow freely in ordinary soil, and their Gazania-like flowers continue to bloom until cut down by frost.

Breviscapa.—Bright orange-coloured flowers. Height 6 in. 0 6

Grandis.—Very handsome new variety. Large pure white flowers, with narrow yellow ring surrounding a pale blue disc; underside of petals shaded lilac. Height 2 ft. 1 0

ARTEMISIA

Judaica.—A half-hardy annual with gracefully cut silvery foliage; good for sub-tropical bedding. Height 4 ft. 0 6

ASCLEPIAS

Curassavica.—One of the most useful and showy class of plants for either stove or greenhouse, invaluable for buttonholes, sprays or table decoration. The flowers are of a reddish orange-scarlet colour, and formed in large erect clusters. Although a perennial, seed sown early will make fine specimens the first season. Height 2 ft. 1 0

ASPARAGUSPer pkt.
s. d.

Plumosus.—One of the best decorative plants either in pots or on a wall for cutting purposes. Succeeds well planted out in an intermediate house, is easily grown, and when once established any temperature between 45° and 65° keeps the plant in health. The seedlings should be carefully watched in the earlier stages of growth to avoid damping. Height 2 ft. 2 6

Sprengeri.—A handsome greenhouse variety of rapid growth, drooping gracefully and naturally from pots or hanging baskets. The fronds are frequently 8 ft. in length and very useful for bouquets, wreaths, sprays, or table decoration, and will keep fresh in water for a long time after being cut. 1 6

ASPARAGUS SPRENGERI.

ASPERULA

Azurea setosa.—Hardy annual species of Woodruff with pale blue flowers, excellent for mixed borders. It lasts a long time in flower, and will thrive well in poor soil or in shaded places. Height 1 ft. 0 3

Odorata (Woodruff).—Hardy perennial, conspicuous in May by its sweet-scented pure white flowers; thrives well under trees. The leaves retain their fragrance for a considerable time. Height 9 in. 0 6

ATRIPLEX

Hortensis rubra (Red Mountain Spinach).—A hardy annual with red foliage, very useful as an ornamental plant where the situation is cold or otherwise unfavourable to growth. Sow where it is to remain, and thin out well. Height 4 ft. 0 3

Those marked thus * are adapted for autumn sowing.

VEITCH'S SUPERB ASTERS.

EMPRESS ASTER.

VEITCH'S EMPRESS ASTER.—Very early flowering, of dwarf robust compact habit, 12 in. in height, very free-blooming; the individual flowers are of enormous size and grand form, being perfectly double, of great fullness, regularly imbricated, and last a long time in perfection. These splendid Asters are particularly well adapted for pots, beds, or cutting purposes.

Crimson . . . 1 6 | **White** . . . 1 6
Brilliant Rose, a very effective and pleasing colour . . . 1 6

VEITCH'S IMPROVED VICTORIA.—A massive Aster, bearing enormous recurved flowers of great fullness unsurpassed for exhibition purposes. It grows 1½ to 2 ft. high, producing twenty to twenty-five flowers on each plant

Crimson . . . 1 0 | **Light Blue** . . . 1 0 | **White** . . . 1 0
Dark Blue . . . 1 0 | **Rosy Carmine** . . . 1 0 | **Mixed** . . . 1 0

Collection of 12 distinct colours, separate, 3/6.

VEITCH'S BEDDING ASTER.—A fine free-flowering race of Asters, of dwarf compact freely-branched habit, growing 10 to 12 in. in height. The plants are uniform in height and time of flowering.

Crimson . . . 1 0 | **Delicate Rose** . . . 1 0 | **Light Blue** . . . 1 0
Bright Rose . . . 1 0 | **Dark Blue** . . . 1 0 | **White** . . . 1 0

Collection of the above 6 beautiful colours, 5/.

VEITCH'S IMPROVED PEONY PERFECTION.—The best incurved variety; fine for exhibition purposes. Flowers of great size and symmetry, 3 to 3½ in. in diameter, and very double. The plant is 1½ to 2 ft. high, and bears about twenty to thirty fine flowers.

Mixed colours . . . 1 0
 Collection of 12 distinct colours, separate, 2/6.

Dwarf Chrysanthemum-flowered.—A very useful variety for beds and pot culture. It is very free-flowering, and grows about 12 in. in height, bearing from fifteen to twenty flowers on each plant.

Brilliant Rose . . . 1 0 | **Dark Blue** . . . 1 0 | **White** . . . 1 0
Fierly Scarlet . . . 1 0 | **Light Blue** . . . 1 0 | **Mixed** . . . 1 0

Collection of 12 distinct colours, separate, 2/6.

VEITCH'S DWARF PYRAMIDAL BOUQUET.—A free-flowering class, especially adapted for pot culture.

Collection of 6 self colours, separate, 1/6.

GIANT COMET ASTER.

Giant Comet Aster.—A fine tall-growing variety with very large flowers and long wavy twisted petals, forming a loose yet dense half globe resembling the Japanese Chrysanthemum; most useful for cutting. Height 1½ ft.

Crimson . . . 1 0 | **Light Blue** . . . 1 0 | **White** . . . 1 0
Dark Blue . . . 1 0 | **Pink** . . . 1 0 | **Mixed** . . . 1 0

Collection of 8 beautiful colours, 3/6.

Ostrich Feather.—This magnificent Aster is of the finest Comet type but blooming with greater freedom. The flowers are of immense size with very long loosely-twisted petals; excellent for cutting. Height 1½ ft.

Brilliant Carmine . . . 1 0 | **Light Blue** . . . 1 0 | **Terra-Cotta** . . . 1 0
Dark Blue . . . 1 0 | **Rose** . . . 1 0 | **White** . . . 1 0

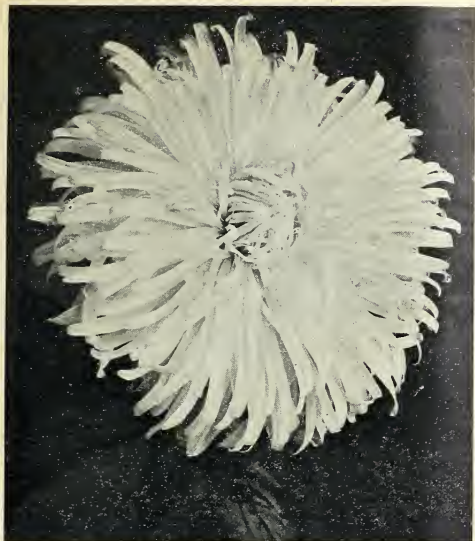

Admiration.—Invaluable for pots or cutting. An entirely new shade of colour, opens at first salmon-rose with yellow centre, and as the flower advances changing to a most pleasing antique rose; plants pyramidal in habit, and about 18 in. in height . . . 1 0

Cactus (new).—A beautiful and distinct class, of medium height and pyramidal habit, with 15 to 20 side shoots, each bearing a refined flower with petals slightly bent and twisted near the tip like a Cactus Dahlia. The colour is of a most lovely and effective brilliant rose-carmine. It blooms very early and is of great value for cutting and also an excellent pot plant . . . 1 0

VEITCH'S MINIATURE BEDDING ASTER.—This splendid Aster is one of the finest for edgings or narrow borders, it is of very compact habit and free flowering. The plants grow to a uniform height of 8 in., and the individual flowers though small, are of perfect form. To produce the finest effects the plants should not be more than 6 in. apart.

Crimson . . . 0 6 | **Dark Blue** . . . 0 6 | **White** . . . 0 6

VEITCH'S SUPERB ASTERS.

MAMMOTH ASTER.

Mammoth.—A robust new class with enormous flowers, 6 to 7 in. in diameter. They have gracefully curled petals, come perfectly true from seed, are excellent for pot culture, also unsurpassed for exhibition or groups, and most useful for cutting. Height 15 to 20 in.

Azure Blue . . . 10	White . . . 10
Rose . . . 10	Mixed colours . . . 10

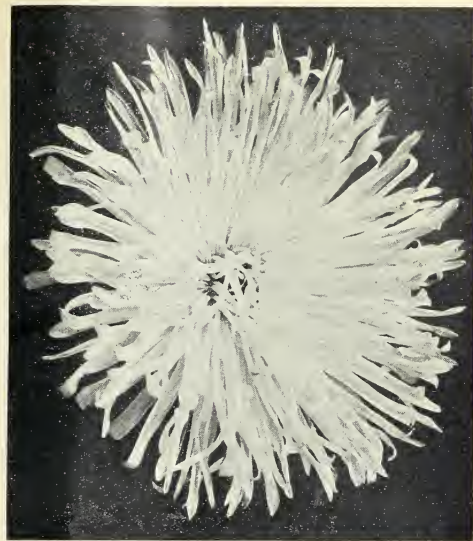

Collection of 8 distinct colours, separate, 2/6.

DIADEM ASTER.

VEITCH'S DIADEM

ASTER.—A lovely Aster of strikingly attractive appearance and the latest flowering variety. The plant grows about 10 in. high, is of pyramidal and compact habit, much branched, and bears a profusion of double flowers of rather small size, measuring 1½ to 1½ in. in diameter; these are quite unique in colour, two or three outer rows of petals being pure white, and forming a distinctly-defined band or margin, in charming contrast to the inner petals, which are bright rosy crimson, deepening to rich purple-crimson towards the centre, per packet, 1/-

RAY ASTER.

Ray.—A tall-growing variety, with elegant large flowers and long quilled petals; most distinct, useful and showy. Height 1 ft.

Red . . . 10	Dark Blue . . . 10
Rose . . . 10	White . . . 10

Ray Fairy.—Carmine on White ground . . . 10

Dwarf German.—Mixed colours . . . 0 6

Dwarf Pæony-flowered.—Mixed colours . . . 0 6

Globe Pæony-flowered.—An incurved kind. Mixed colours . . . 0 6

Japanese or Needle "Cardinal."—Intense fiery scarlet . . . 10

Queen of the Market.—Mixed colours . . . 0 6

Improved Quilled.—The finest form of quilled Aster. Height 2 ft. Mixed colours . . . 0 6

Improved Rose-flowered.—Mixed colours . . . 0 6

Snowball.—Flowers pure white, excellent for cutting . . . 10

Triumph.—Plants bearing thirty to forty handsome double flowers of a brilliant scarlet colour. Height 8 in. . . 10

Branching.—This fine strain is a special selection of the tall branching variety. The large flowers are very double and borne on long stems. A most valuable late-blooming class for cutting; also a grand border plant. Height 2 ft. Mixed colours . . . 0 6

Collection of 6 distinct colours, 1/6.

Large-flowering Single Marguerite.—This beautiful variety has come into great favour, the large flowers with long twisted petals and large yellow centres are very striking.

Dark Blue . . . 10	White . . . 10
Light Blue . . . 10	Mixed colours . . . 10
Rose . . . 10	

ASTERS—continued

ASTER 'SINENSIS.

Sinensis.—A late-flowering variety, producing an abundance of large, handsome single flowers, which we can strongly recommend as a border plant. Very decorative and attractive, and suitable for cutting purposes. Height 15 in.

Mauve I 0 | **Pink** I 0

AUBRIETIA.—These hardy perennials are invaluable for covering rockwork; they will grow in almost any kind of soil, and may remain for years undisturbed. Should be raised and grown on to a fair size before being planted where they are to remain. They are of dwarf and compact growth, and well suited for early spring bedding.

Græca.—Flowers of a beautiful purple colour 0 6

Leichtlini.—Rosy red, a very pretty variety 1 0

Purpurea.—Flowers of a rich dark purple colour 0 6

AURICULA, SHOW.

AURICULA.—In raising these spring flowers from seed a considerable amount of patience is needed, the seed being very variable in germinating, taking months sometimes before the young seedlings appear. The soil should be kept moist, and a shaded position is much the best in the earlier stages. By means of seed, vigorous plants of free growth can be obtained.

Border.—Saved from a large and varied collection, per packet, 1/-

Choice Alpine.—Fine strain saved from exhibition varieties per packet, 2/6

Finest Show.—Saved from finest named sorts, per packet, 2/6

BARTONIA

Per pkt.
s. d.

***Aurea**—Showy hardy annual of distinct character, its golden yellow flowers being freely produced; it will thrive well in partial shade but should not be crowded. Height 18 in. . . per ounce, 9d. 0 3

BALSAM.—These old-fashioned half-hardy annuals are so easily grown that it is a wonder more are not to be seen in gardens. The one mistake that is frequently made is in sowing the seed too early in the spring, and in too much warmth. Sown end of April, better plants are secured with sturdier growth. Overcrowding should be avoided, light and air being also essential.

VEITCH'S SUPERB DOUBLE.—This splendid strain cannot be surpassed in variety and brilliancy of colour, form and size of flower, or habit of growth. 1/6 and 2 6

Assortment of 8 distinct colours, 2/6.

Double Camellia-flowered.—Finest mixed I 0

Double Rose-flowered.—Finest mixed colours 0 6

Double, mixed colours 0 6

BEET

Chilian or Brazilian.—Colours variable, but chiefly of a bronzy red with broad scarlet midribs. Height 2 ft. 0 6

Dell's Crimson.—A small compact-growing variety with deep bronze-purple foliage. Excellent for ribbon borders, or where lines of dark colour are required 0 6

BELLIS (Double Daisy).—Showy perennials, growing about 4 in. high and easily raised from seed. Sow out-of-doors in April, the seedlings being afterwards pricked off and grown in a shady spot.

Perennis fl. pl.—Mixed colours 0 6

Perennis Longfellow.—Large double dark rose flowers I 0

Perennis Snowball.—Double, pure white variety I 0

Giant Double, mixed.—Of compact habit, with enormous flowers I 0

NEW FRILLED SINGLE BEGONIAS
For Exhibition, Pot Culture or Bedding.

Those marked thus * are adapted for autumn sowing.

BEGONIA (Tuberous-rooted).

Sow in heat in January or early in February, covering the seed pans with glass to prevent rapid evaporation at the outset, and to guard against any insect pests later on. When large enough to handle, the seedlings should be pricked off in sandy soil, in shallow pans or boxes, before there is any possibility of damping off, transferring again to boxes as occasion may require. Height 1 ft.

VEITCH'S CHOICE SINGLE BEGONIAS.

VEITCH'S CHOICE DOUBLE BEGONIAS.

Per pkt.
s. d.

VEITCH'S CHOICE DOUBLE (Tuberous-rooted).—A superb strain, saved from an unequalled collection of all the finest and newest varieties, giving a very large percentage of perfectly double flowers of the most lovely shades of colour, and will flower the first season from seed if sown early. . . . 2 6

VEITCH'S CHOICE HYBRID (Single).—The seed now offered is the produce of the very finest and newest varieties, the individual blooms being of large size and perfect form. The colours of the flowers are very brilliant, and comprise many beautiful and rich shades of crimson, scarlet, orange, yellow, pink, rose, carmine, white, &c. . . . 1 6

Per pkt.
s. d.

NEW CRESTED CHOICE MIXED.

Crimson Shades.	2 6	Pure White	2 6
Rose Shades	2 6	Yellow Shades	2 6
Single large-flowered varieties, in mixture			1 0

New Crested Choice Mixed.—This superb class has been much admired since its introduction; the flowers are very large, with flat petals, which are most beautifully crested. . . . 1 6

NEW FRILLED SINGLE BEGONIA (Blackmore & Langdon's Strain).—Extremely beautiful class of Begonias, the edges of the petals being more or less deeply fringed, which give the flower a charm not possessed by the smooth-petalled varieties. The colours are of exquisite delicate shades, and combinations of varied tints, and we strongly recommend those of our customers who may not have grown them to give them a trial. See illustration, page 54. . . . 2 6

"Messrs. Blackmore and Langdon showed a beautiful lot of their exquisite frilled Single Begonias in various colours."—*Gardener's Magazine* report of Holland House Show, July 8th, 1909.

"A charming selection of Single Fringed Begonias in whites, pinks and apricot shades."—*Journal of Horticulture*, July 8th, 1909.

BEGONIA SEMPERFLORENS (Fibrous-rooted).

(Fibrous-rooted).—This most useful fibrous-rooted class is of compact habit, with small foliage and flowers, and excellent for bedding or potculture, continuing in bloom till late in the autumn. Height 1 ft. The compact form is very free flowering, with miniature foliage, making them most useful for edging to borders, or where dwarf bedding is desirable. Height 6 in.

BEGONIA SEMPERFLORENS.

Atropurpurea. —Brilliant orange-carmine flowers, and glossy deep brownish red foliage.	1 6
Scarlet. —Carmine-scarlet flowers, bronze foliage	1 6
Rose. —Bright rose flowers, dark green foliage, edged deep red	1 6
White. —Flowers white, shaded rose, light green foliage	1 6
Mixed. —A fine selection	1 6

SEMPERFLORENS, Compact.

Bright Rose. —Dark green foliage, edged deep red	1 6
Rose. —Soft rose, deep green foliage, edged red	1 6
Scarlet. —Brilliant scarlet flowers, deep bronze foliage	1 6
White. —Flowers white, shaded rose, light green foliage	1 6

"A packet of your Double Begonia Seed produced 85 per cent. of double flowers. I showed a group at our local flower show. They made a grand display; in fact, they were quite as good as many named varieties, and were the admiration of all who saw them.—Mr. J. ADAMS, Gardener to Miss M. LOVELL."

BEGONIA REX.

BEGONIA

Rex (*Ornamental-leaved variety*).—Its great beauty consists in the rich and varied colouring and formation of the large, handsome and beautifully variegated foliage and stems, covered more or less with small hairs. They are of the easiest culture and may be grown with success in any warm greenhouse, a moist heat bringing them to the greatest perfection 2 6

Various.

Davisii.—A dwarf very free-flowering species, bright scarlet flowers 1 6

Freibellii.—Beautiful bright scarlet flowers 1 6

Incomparabilis.—A splendid autumn and winter-flowering variety, with large and very bright scarlet flowers. Height 1½ ft. 2 6

BRACHYCOME

Iberidifolia (*Swan River Daisy*).—A profuse-flowering half-hardy annual, doing best in warm and dry situations. The flowers are blue and somewhat Cineraria-like in form. Height 9 in. 0 3

Purple King.—A new and distinct colour, many shades deeper than any other variety, a colour best described as royal purple. A beautiful bedding plant and certain to be much admired 0 6

BRIZA (*Quaking Grass*).—Hardy annuals. Beautiful ornamental grasses, yielding a profusion of flower heads. Excellent for arranging with cut flowers.

Geniculata (*Spreading Quaking Grass*). Height 1 ft. 0 3

Gracilis (*Small Quaking Grass*). Height 9 in. 0 3

Maxima (*Large Quaking Grass*). Height 1 ft. 0 3

BROMUS

Bromiformis.—Highly ornamental grass, very useful for bouquet and winter decoration. Hardy annual. Height 2 ft. 0 3

BROWALLIA.—Very pretty and free-flowering half-hardy annuals, growing about 18 in. in height, with Verbena-like flowers; exceedingly useful as pot plants for the conservatory during July, August and September. Should be sown in heat and gradually hardened off to a greenhouse treatment.

Elata grandiflora.—Rich bright blue 0 3

Elata alba.—A pure white-flowering variety 0 3

Speciosa major.—Large blue flowers, splendid winter-blooming species. Height 2 ft. 1 6

Per pkt.
s. d.

CALCEOLARIA

Veitch's Superb Strain.—This fine strain is remarkable for its free-flowering qualities and compact habit of growth. The flowers are exceedingly rich and varied in colour, beautifully spotted and blotched, and of remarkably fine form and substance 2 6

Dalkeith Strain.—Flowers of fine form 1 6

CALCEOLARIA BUTTERCUP.

Buttercup (new).—A free-flowering hybrid of graceful habit, a cross between *C. Golden Glory* and *C. Clibrani*, growing from 1½ to 2 ft. in height. The colour of the flowers are yellow and in many cases beautifully spotted on the undersides with darker markings. It is very effective planted out in masses, but will only stand the winter in mild localities. It makes a splendid decorative plant for the greenhouse, lasting a long time in bloom 2 6

"A large group of a very pretty form of Calceolaria named Buttercup was shown at the Temple Show by Messrs. James Veitch and Sons. It should make a good decorative plant. . . . From the fact that this Calceolaria so quickly attains flowering size and is so showy when at its best, we shall doubtless before long see a great deal more of it."—*Gardener's Magazine*.

Per pkt.
s. d.Per pkt.
s. d.**CALCEOLARIA**—continued.

Yellow Bedder.—A most useful variety of dwarf habit with large heads of beautiful bright yellow flowers, coming into bloom within four months from the time of sowing and thus doing away with keeping cuttings throughout the winter months . . . 2 6

Veitch's Hardy Hybrid Golden Glory.—As a greenhouse plant it will be invaluable and as a hardy herbaceous plant it will take a high position for its glorious colouring and for the length of time it continues in bloom. At the Royal Horticultural Society's Gardens at Wisley it withstood over 20 degrees of frost. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY . . . 1/6 and 2 6

Clibranii.—A beautiful new variety of shrubby habit and strong growth, producing large heads of beautiful pale yellow flowers and prettily cut foliage . . . 1 6

CACALIA

Coccinea (*Tassel Flower*).—A distinct free-flowering hardy annual, with orange-scarlet flowers, produced in trusses. Height 1 ft. . . 0 3

CALANDRINIA.—A very interesting class of plants requiring sunshine and a dry position.

Grandiflora.—Fleshy-leaved hardy annual with medium-sized rose-coloured flowers. Height 18 in. . . 0 3

Umbellata.—Half-hardy perennial with brilliant crimson-purple flowers; excellent for rockwork. Height 6 in. . . 0 6

CALENDULA.—Valuable hardy annuals for growing in poor soil or dry places, making a good display in masses for months with little trouble. Height 1 ft.

***Officinalis, Meteor.**—Yellow, striped with silver . . . 0 3

***Officinalis, Orange King** } A very fine selection of these old garden favourites with large

Officinalis, Sulphur Crown } imbricated double flowers . . . 0 3

Pluvialis (*Cape Marigold*).—Large pure white flowers . . . 0 3

CALLA

Elliotiana (*Richardia*).—A beautiful Arum Lily, with trumpet of a very rich pure yellow colour, and dark green leaves sometimes marked and spotted with white. The plant is of medium height and quite distinct from any other species of Calla in cultivation, and is a most valuable acquisition as a conservatory and greenhouse plant. Sow early in January or as soon as required in pots or pans of sandy loam and leaf-mould; place in a temperature of about 65 degrees. Pick out as soon as the plants have developed one leaf into small pots and grow on in an intermediate house. Pot on as required . . . 2 6

CALLIOPSIS (*Coreopsis*).—Remarkably showy hardy annuals and perennials, very continuous in flowering, hardly anything surpassing them in this respect. Height 1½ to 2 ft.

Atrorsanguinea.—Dark crimson flowers . . . 0 3

***Coronata.**—Yellow, spotted deep crimson . . . 0 3

CALLIOPSIS.

Drummondii.—Yellow with brown centre, per ounce, 9d. . . 0 3

Grandiflora.—Hardy perennial, with large golden yellow flowers . . . 1 0

Lanceolata.—Showy hardy perennial, flowers yellow . . . 0 6

Marmorata nana.—Yellow marbled brown. Height 1 ft. . . 0 3

Nigra speciosa.—Dark velvety crimson . . . 0 3

Tinctoria.—Bright yellow and brown . per ounce, 9d. . . 0 3

Tinctoria, Double.—Bright yellow and brown flowers . . . 0 6

Tom Thumb.—Crimson, very compact . . . 0 6

Tom Thumb Beauty.—Golden yellow with crimson centre . . . 0 6

CAMPANULA

Pyramidalis compacta.

—Distinct from the older form, the plants being dwarfer and the flowers larger. As a decorative plant for conservatories or corridors the variety is invaluable.

Sow in heat early in spring, pot as required, and grow on in the open during the summer months, giving plenty of water, and a little liquid manure. A.M. FROM THE R.H.S.

Pyramidalis compacta

blue.—Deep blue flowers of great substance, pkt., 1/-

Pyramidalis compacta

white.—The compact habit of the preceding, with pure white flowers,

per packet, 1/-

"One of the prettiest groups in the hall was a remarkably well-grown set of Campanula pyramidalis and some plants of C. p. compacta, the latter an especially good variety. The colour is of deeper mauve than usual, the blooms larger. Awarded a Silver - Gilt Banksian Medal from the R. H. S." —*The Gardeners' Magazine*.

Pyramidalis.—Stately

hardy perennials growing 4 to 5 ft. high, of great beauty for flower borders, or for growing in pots for conservatory decoration.

Blue per packet, 6d.
White " 6d.
Mixed " 6d.

CAMPANULA PYRAMIDALIS COMPACTA.

Those marked thus * are adapted for autumn sowing.

CAMPANULA

- Carpatica.**—A free-flowering hardy perennial with erect blue flowers; useful for edgings. Height 6 in. 0 3
- Carpatica alba.**—White form of the preceding 0 3
- Mirabilis.**—Hardy perennial with numerous handsome large-sized bell-shaped flowers of a pale blue; fine for pots. 1 0
- Persicifolia.**—A strong and useful perennial, producing long spikes of large bell-shaped flowers very useful for cutting.
- Grandiflora, blue** } Height 2 ft. } 0 6
- Grandiflora, white** } 0 6

CAMPANULA CALYCANTHEMA (*Cup and Saucer Variety*).—

Highly ornamental varieties of Canterbury Bells, growing about 2 ft. in height with large-coloured calyx of the same hue as the trumpet, which greatly adds to the beauty of the flowers. Sow in March to June for flowering the following year. They transplant well, and may be potted for conservatory decoration.

- Rose.**—Beautiful bright rose-pink shade, very desirable 1 0
- Blue and Purple** 0 6 | **White** 0 6
- Mauve** 0 6 | **Mixed.**—All colours 0 6

CAMPANULA MEDIUM (*Canterbury Bells*).—Well-known favourite

hardy biennials growing 2 ft. in height, and bearing large bell-shaped flowers; the plants are of pyramidal form and very showy.

- Dark Crimson.**—Deep shade per ounce, 1/- 0 3
- White Rocket.**—Large pure white flowers 6d. 0 3
- Sweet-scented.**—Pure white delicately fragrant flowers 0 3

CANNA

Crozy's New Dwarf Hybrids (Mixed).—A free-blooming race, continuing in bloom throughout the season. They embrace many rich and striking colours, which range from golden yellow to deep scarlet, excellent for sub-tropical gardening, mixed beds, or in pots for conservatory. Half-hardy perennials 1 6

Assortment of 6 vars. 3/- | Assortment of 10 vars., 5/-
Tall Bedding Varieties.—Finest mixed 0 3

It is absolutely necessary to chip or file the outer skin of Canna seed previous to sowing.

CANNABIS

Gigantea (Giant Hemp).—Fine for sub-tropical gardening; sow in pots in a cold frame or where it is to remain. Height 6 ft. 0 3

CATANACHE

Cerulea.—Hardy perennial, sown early will flower the same year. Useful for cutting. Height 2 ft. 0 3

CATCHFLY

Lobel's Red.—Hardy annual, useful for clumps, in mixed borders, or in pots for conservatory. Height 1 ft. 0 3

VEITCH'S CHOICEST DOUBLE CARNATIONS.

CARNATIONS and PICOTEEs.—Seedlings bloom more freely than propagated plants, and are invaluable for cut flowers. Sow during April under glass in a cold frame.

Veitch's Choicest Double.—Saved from an unrivalled collection of the finest named varieties and producing a very large proportion of double flowers

Choice English.—Saved from carefully fertilised flowers by Mr. Douglas from his well-known beautiful collection

American Tree.—New perpetual-blooming varieties with long stems and very large flowers

Double Perpetual or Tree.—Double choicest mixed

Riviera Market.—Very fine perpetual Carnations of rapid growth, with a large percentage of splendid double flowers

Double Grenadin.—Brilliant scarlet, early variety

Double Grenadin White

Early-flowering Double.—Useful for cutting

Picotee, Double.—Finest quality, saved from a choice collection

Veitch's Early-flowering Perpetual.—Improved strain of the Marguerite section, combining the earliness and free-flowering habit of that class with the quality and substance of the Tree Carnation. Sown in gentle heat in February, the plants bloom the following August, September and October. They produce a large proportion of fragrant double flowers, embracing many beautiful colours, which are particularly serviceable for cutting purposes. Plants potted in autumn, and placed in a cold frame or greenhouse, they form an attractive feature during the early winter

Carnation, Giant Marguerite.—Sown in March, will bloom in August. Plants potted in autumn, and placed in a cool greenhouse will continue to bloom for a long time. They produce a large proportion of double Clove-scented flowers of various colours.

Mixed Colours.

Pure White

"Send me a large packet of your Carnation seed, the same as last year, as they are the best I have ever had; the flowers are lovely.—Mr. J. ALLAN, Gardener to C. A. M. FIELD, Esq." "I have sent a few Carnation blooms for you to see, they are from your seed. I am very pleased with them.—Mr. D. FORD, Gardener to M. H. GOULD, Esq."

Per pkt.
s. d.

CELOSIA PYRAMIDALIS (plumosa).—We have for many years selected with great care the most beautiful and brilliant varieties, and we believe the strain cannot be surpassed either in quality or variety of colour. They should be treated to a moderately brisk temperature whilst growing, not grown in too large pots, and gradually hardened off.

TALL VARIETIES.—Beautiful plants for conservatory decoration during the autumn months.

Drumlanrig Strain.—A beautifully feathered strain

Aurea.—Fine yellow plumes

Coccinea.—Crimson and scarlet shades

Mixed.—Most attractive colours

Thompsoni magnifica.—A handsome variety with dark bronze foliage and splendid rich-coloured plumes. Height 1½ ft.

DWARF VARIETIES.—Beautiful varieties extensively used for bedding in the London Parks, where they are much admired.

Aurea.—Dense plumes of a beautiful yellow colour

Coccinea.—Scarlet plumes, embracing many fine shades

Mixed

CELSIA

Arcturus.—A very pretty pot plant for conservatory or greenhouse decoration. The flowers are bright yellow, and look exceedingly well when mixed with foliage plants. Height 2½ ft. per packet, 1/6

Cretica.—A grand plant for the herbaceous border, with yellow flowers. Sow in June in gentle heat. Height 5 ft. per packet, 1/-

CENTAUREA (Foliage Varieties).

The following three half-hardy perennial varieties are of the greatest service. Plants raised from seed are better than those propagated from cuttings, and are in every way more reliable and far less trouble. Cool treatment should be adopted from the time of sowing.

Candidissima (ragusina).—A dwarf silvery white-foliaged plant; valuable for bedding. Height 1 ft. per packet, 1/-

Clementei.—Free-growing variety, foliage silvery white, deeply fringed and cut. Height 2 ft. per pkt., 1/-

Gymnocarpa.—A graceful silver-foliaged variety of free growth; useful for bedding. Height 18 in. per packet, 6d.

CELSIA ARCTURUS.

CENTAUREA (Flowering Varieties).

Cyanus minor (Cornflower).—Very free-flowering hardy annuals, growing 1½ to 2 ft. high; extremely useful for cutting. Seed should be sown in the autumn for early blooming.

Blue per ounce, 1/- 0 3 | **White** 0 3

Rose 0 3 | **Mixed** . . . per ounce, 9d. 0 3

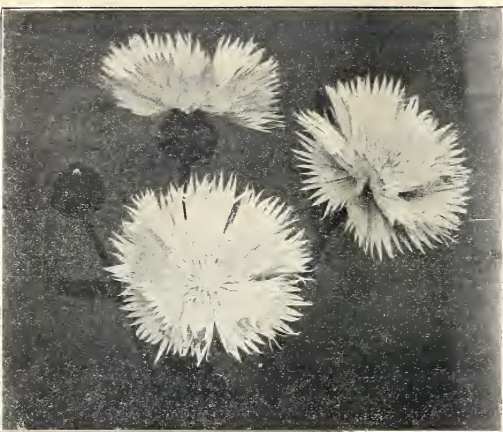

Collection of 6 beautiful colours, 1/6.

Cyanus minor, Double.—Mixed colours

Cyanus minor, Victoria.—Miniature bushes, with dark blue flowers. Valuable either for beds or the edges of borders

Depressa, The Queen.—A greatly improved and effective variety having large deep blue flowers with crimson centre

Americana.—A hardy annual of strong growth with innumerable branches, each terminating with large blue flowers. Height 3 ft.

CENTAUREA MARGUERITA (Odrata).

Per pkt.
s. d.**CENTAUREA (Flowering Varieties)**—continued.

Marguerita (*Giant Sweet Sultan*).—A variety superseding all the old varieties of Centaurea. Beautifully scented, and bearing an abundance of flowers. Height 2 ft.

Blue 1 0 | White 1 0

Imperialis.—This new giant-flowered variety is the result of a cross between *C. moschata* and *C. Marguerita*. It forms enormous bushes covered with long-stalked sweet-scented flowers of the most lovely shades of colour; these, if cut when just opening, will last for many days in water. Height 4 ft. 1 0

For other varieties, see Sweet Sultans.

CENTRANTHUS

***Macrosiphon**.—A hardy annual allied to the Red Valerian, or free-branching growth. Will grow well in almost any soil, be it ever so poor, a dry position suiting it best. Height 1 ft. 0 3

CERASTIUM.—Very dwarf compact-growing silvery white foliage plants with pure white flowers. Well suited for outside edgings to beds or for rockwork. Hardy perennials.

Biebersteinii.—Silvery foliage. Height 3 in. 0 6

Tomentosum.—Procumbent small white foliage. Height 3 in. 1 0

CHAMÆPEUCE.—Valuable bedding or border plants which associate well with flowering subjects or with others in carpet bedding. Both are easily raised under quite cool treatment, better in fact than in heat. Half-hardy biennials. Height 1 ft.

Cassabonæ (*Fish-bone Thistle*).—Ornamental dark green foliage, covered with white spines. 0 6

Diantha.—Ornamental white foliage, margined with green, and having large white spots 0 6

CHELONE

Barbata coccinea.—Hardy perennial, being a Pentstemon in miniature, very free flowering and useful for cutting 0 6

CHRYSANTHEMUM, PERENNIAL

New Early-flowering Single.—This popular variety is very free flowering and excellent for pots or cutting. The seed has been saved from a large and unrivalled collection. Sown early in March will commence flowering in May 1 0

Finest Show Varieties (*Large-flowering Chinese*) 1 0

Japanese Varieties.—Finest mixed. Height 4 ft. 1 0

Maximum grandiflorum.—A grand autumn-flowering border plant, with large pure white flowers of great substance. Height 3 ft. 0 6

CHRYSANTHEMUM, ANNUAL.—Chrysanthemums are remarkably showy and effective. They are perfectly hardy, of rapid growth, very profuse and continuous blooming. The flowers have a great range of colour, and are of fine shape and substance, and invaluable for cutting. Seed should be sown in autumn for spring flowering, and in spring for summer and autumn flowering. Height 2 ft.

CHRYSANTHEMUM SILVER QUEEN.

Silver Queen.—Distinct, with well-formed flowers, pure white with a zone of clear bright yellow, and the disc yellow overlaid with silver, giving the whole a very pretty appearance 0 6

Morning Star.—Large flowers of a delicate primrose colour 0 6

Evening Star.—A bright golden yellow colour 0 6

Atrococcineum.—Deep scarlet 0 3

Burridgeanum.—White, crimson and yellow 0 3

Carinatum (tricolor).—White and yellow 0 3

Lord Beaconsfield.—Crimson, edged gold 0 3

Luteum.—Yellow 0 3

The Sultan.—Velvety crimson-maroon 0 3

Venustum.—Crimson and white 0 3

W. E. Gladstone.—Rich crimson 0 3

Coronarium, Lemon { Profuse blooming annuals with double flowers, very useful for mixed borders or cutting purposes, also extensively cultivated in pots for market purposes. 0 3

— **White** 0 3

— **Yellow** 0 3

Dunnetti, Double White 0 6

— **Double Golden** 0 6

Tricolor, Double Mixed 0 6

Inodorum plenissimum.—Very free flowering, double pure white variety; fine for vases or cutting. Height 18 in. 0 6

Segetum (*Corn Marigold*).—Bright golden yellow 0 3

— **pumilum**.—Height 8 in. 0 3

Mixed Double 0 3 | **Mixed Single** 0 3

CINERARIA, FOLIAGE VARIETIES

Acanthifolia.—A shrubby perennial, in style or *Centaurea candidissima*, with broad silvery foliage; most useful for bedding 0 6

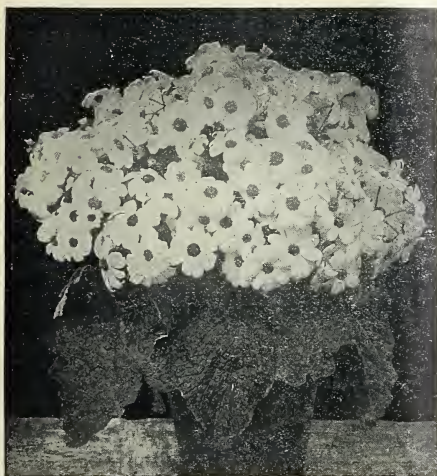

Maritima candidissima.—Laciniated silvery foliage plant for beds and borders. Half-hardy perennial 0 6

Maritima Diamond.—Improved form of the above variety 1 0

Those marked thus * are adapted for autumn sowing.

Per pkt.
s. d.

CINERARIA.—In the culture of *Cineraria*, seed should not be sown too soon. Sown in May or June, plants large enough for all decorative purposes can be had. In after treatment the aim should be to secure as hard a growth as possible. Sturdy plants with leaves of medium size are the best.

CINERARIA, POLYANTHA (*Stellata*).Per pkt.
s. d.

Polyantha (*Stellata*).—A magnificent plant for the conservatory, or corridor decoration during the winter and spring. The immense heads of flowers are borne on long stalks, the individual blooms being star-shaped and smaller than the ordinary form, the colours running all through the various combinations of white, violet, lilac, almost to red shades. Height 2 to 4 ft. 2 6

Polyantha.—Blue shades 2 6

VEITCH'S SUPERB STRAIN.—The plants are sturdy and compact in growth, and the flowers of the finest shape and substance. They embrace the richest and brightest coloured selfs, as also the most varied, showy and attractive varieties with clearly defined and elegant margins and rings of various shades. 2 6

Crimson Blue	Red White	Magenta Blue-edged	Crimson-edged Purple
---------------------	------------------	---------------------------	-----------------------------

Each, per packet, 1/6.

Veitch's Collection of 8 distinct colours, 10/6.

Antique Rose.—The plants are of compact habit, producing a profusion of flowers of beautiful shades of rose 2 6

Cactus.—New variety, with twisted petals. The flowers are very effective and embrace a wide range of colour 2 6

Covent Garden Market Strain.—A grand strain of the finest varieties, in mixture 1/6 and 2 6

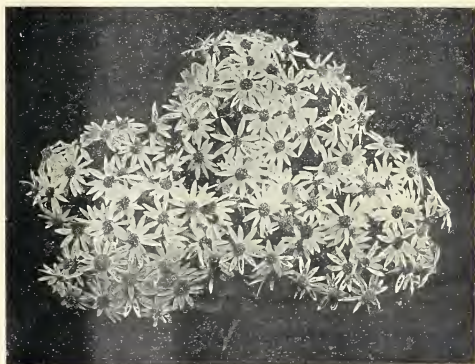

French, large-flowered.—Flowers of immense size and most brilliant colours 2 6

Intermedia.—A pretty free-flowering variety, a cross between *Polyantha* and our well-known large-flowered strain, the blooms are not quite so large as the latter and more loose in habit, but are most charming and effective, possessing a wide range of colour 2 6

Matador.—Same habit as our *Antique Rose*, but of a deeper red shade 2 6

Double-flowered.—Extra choice mixed, a great variety of colour and very double 1 6

"I have a batch of *Cinerarias* now in full bloom grown from your seed: the blooms are very fine and massive, some of the flowers measuring 4½ to 5 in. across, they are the admiration of all who see them.—Mr. H. PERRY, Gardener to J. S. BURRA, Esq."

CINERARIA, FELTHAM BEAUTY.

Feltham Beauty.—This charming free-flowering variety is of elegant form, and quite distinct and pleasing shades of colour, carrying loose, lightly-branched heads of large, bright flowers; most effective for greenhouse and table decoration. Height 2 ft. **Pink** 2 6 **Mixed** 2 6

"*Feltham Beauty* should certainly prove an acquisition."
—*The Gardener*.

"*Cineraria Feltham Beauty.*—This particularly elegant *Cineraria* is of dwarf habit, with stellate and yet shapely blooms, borne with the greatest freedom. It is now represented by six distinct shades of colour, i.e., white, pink, light blue, deep blue, carmine, and maroon-purple. A.M., R.H.S., April 5th, for the strain. Messrs. James Veitch and Sons, Limited, Chelsea."—*The Gardeners' Magazine*, August 16th.

- CLARKIA.**—Hardy annuals of slender branching growth and easy culture, very showy and profuse in flowering. Well suited for sowing in the autumn out-of-doors to flower early in the spring; useful for cutting.
- Brilliant.**—New, distinct, and effective variety, very double, with beautiful bright carmine-rose flowers. Height 2 ft. 1 0
- *Elegans.**—Bright rosy purple. 2 ft. per ounce, 9d. 0 3
- **rosea fl. pl.**—Double rose. 2 ft. „ 9d. 0 3
- Salmon Queen.**—Double. 2 ft. 0 6
- *Pulchella, Single.**—Dark rose. 1½ ft. per ounce, 9d. 0 3
- **fl. pl.**—Double crimson. 1½ ft. 0 3
- *—alba, Single.**—Pure white. 1½ ft. per ounce, 9d. 0 3
- **fl. pl.**—Double white. 1½ ft. 0 3
- **Dwarf Double White.**—1 ft. 0 6
- **Double Crimson.**—1 ft. 0 6
- *—marginata fl. pl.**—Double rose, margined with white 0 3

CLEMATIS.—Well-known as valuable, hardy, profuse-flowering climbing perennials, which, when raised from seed, afford a wide range of variety in colour.

Choice Varieties, mixed.—Height 10 to 12 ft. 1 0

CLERODENDRON

Fallax.—Handsome erect-growing stove plant, of dwarf habit, with large spikes of scarlet flowers. Seed should be sown in spring in pans of well-drained sandy soil 2 6

CLIANTHUS.—The Australian Glory Pea is the finest species, but a fickle plant to manage, often dying when about to flower. In a packet of seed, however, there is always the possibility of success, and when this is attained the result is worthy of all the trouble, it being a grand plant. Greenhouse treatment is the best and safest.

Dampieri (Australian Glory Pea).—Gorgeous scarlet flowers, with large glossy black blotch. Height 4 ft. 1 0

Punicus.—Large vivid crimson flowers. Height 4 ft. 1 0

CLINTONIA.—Extremely useful half-hardy annual, either for pot culture, or for dwarf edgings, with Lobelia-like flowers; it thrives well in moist places.

Pulchella.—Blue, white and yellow. Height 6 in. 0 6

COBÆA

Scandens.—A greenhouse climbing perennial of very rapid growth, with large bell-shaped purple flowers. When sown early it will flower in the autumn under glass. It can also be used effectively outside, but requires protection during the winter 0 6

COCKSCOMB.—To grow these showy annuals well, a frame or pit should be used with a steady bottom heat, where the plants can be plunged near to the glass, the object being to secure as dwarf a growth as possible.

Glasgow Prize Dwarf Crimson.—The finest strain of this favourite and beautiful annual, with enormous combs of a brilliant deep crimson colour 1 6

Dwarf Crimson.—The old variety 0 6

Assortment of 6 distinct colours, 1/6.

COIX

Lachryma (Job's Tears).—An ornamental grass, well suited for drying to use in bouquets. Half-hardy annual. Height 2 ft. 0 3

COLLISSIA.—Hardy annuals of deserved popularity, growing 1 ft. high, well adapted for growing in patches and clumps in the open or in blank spaces between dwarf shrubs. Well suited in common garden soil, flowering more profusely than if sown in rich soil.

***Bicolor.**—Lilac and white flowers per ounce, 6d. 0 3

***Candidissima.**—Pure white „ 9d. 0 3

Grandiflora.—Large deep purple flowers 0 3

COLEUS.—Tender perennials.

To raise the ornamental-foliage class of Coleus from seed is interesting. Many fine kinds can thus be obtained, each with distinctive features. The seedlings will make large plants the first season. Seed should be sown in brisk heat.

Finest & Newest Hybrids,
per packet, 1/6 and 2/6

Thyrsoideus.—An exceedingly handsome specie, 2 to 3 ft. high, the branches terminating in erect panicle-like racemes of ten to fifteen bright blue flowers with a short throat compressed laterally and a two-lipped mouth. Flowers from November to February, grows freely in an intermediate temperature, in other respects requiring the same treatment as the varieties of Coleus grown for their foliage. AWARD OF MERIT, ROYAL HORTICULTURAL SOCIETY,
per packet, 3/6

COMMELINA

Cælestis.—A half-hardy tuberous-rooted perennial, with sky-blue flowers. Height 18 in. per packet, 6d.

CONVOLVULUS

MAJOR, Bright Crimson

— **Deep Purple**

— **Pure White**

— **Rose**

— **finest mixed.**—All colours per ounce, 1/-

MINOR, Dark Blue

— **Rose**

— **Striped**

— **White**

— **finest mixed colours** per ounce, 6d.

COLEUS THYRSOIDEUS.

COSMOS

New Early Large-flowering half-hardy annual, about 4 ft. in height, with light and elegant foliage, blooming very freely from the middle of June until killed by frost, fine for borders and most useful as cut flowers. Should be sown in gentle heat early in March and planted out in May in a sunny situation.

Crimson 0 6 | **White** 0 6

COWSLIP.—Early spring flowering perennials, well adapted for the wild garden or woodland walks where the plants are not disturbed; in such situations they become acclimatized. Height 6 in.

Yellow, the well-known favourite variety. 0 6

Finest Mixed Colours 0 3

CORDYLINA

Indivisa Veitchii (Dracana).—An exceedingly handsome plant for standing on terraces or lawns during summer, it is also most useful for standing in vases or dotting in flower beds, in addition to which it is one of our most effective conservatory and indoor decorative plants. Seed should be sown early in the spring in gentle heat 1 6

Those marked thus * are adapted for autumn sowing.

VEITCH'S GIANT CYCLAMEN.

Special Certificate from the Royal Horticultural Society for Superior quality.

VEITCH'S CYCLAMEN GROWING FOR SEED.

The seed we offer is saved from the best varieties, and cannot fail to produce flowers of the finest substance and of the most charming shades of colour. Seed should not be sown too early; July and August is the best time; the seedlings should be grown on to the flowering stage without any check whatever. When grown cool the results are more satisfactory.

	Per pkt. s. d.
GIANT CHERRY RED. —A beautiful shade	2 6
GIANT DARK CRIMSON. —Very rich	2 6
GIANT PINK. —A pleasing shade	2 6
GIANT PURPLE. —Very fine colour	2 6
GIANT PURPLE and WHITE. —Coloured base	2 6
GIANT SALMON. —With dark base	2 6
GIANT SCARLET. —Very bright	2 6
GIANT WHITE. —Pure white flowers of immense size	2 6
VEITCH'S GIANT, mixed. —A large and much improved variety; flowers of great length, fine form, with very broad massive petals	2 6
VEITCH'S PERSICUM, mixed. —Selected from the finest free-flowering varieties	1 6

Collection of 6 separate colours, 5/-

These Cyclamen were included in our Gold Medal Exhibit.

CYPERUS.—Elegant greenhouse perennial with long narrow stems terminating in umbels of grass-like narrow foliage; valuable either for conservatory or table decoration. Seed should be sown in a gentle heat. Height 2 ft.

Alternifolius I 6

Natalensis.—A very ornamental plant, resembling the Pampas Grass. Height 2½ ft. I 0

DAHLIA.—Half-hardy perennials, saved from a very fine collection. This popular flower can be easily raised from seed and be flowered the same season, although somewhat later than from cuttings. Sow the end of February in gentle heat, and plant out in the usual way.

Double, Large-flowered.—Saved from finest sorts I 0

Double, Small-flowered (Pompon).—Best varieties I 0

Pony-flowered, mixed.—Flowers of enormous size, resembling a double Tree-Pony I 0

Tom Thumb.—Splendid mixture of rich colours I 0

Cactus, mixed.—Saved from the most beautiful sorts I 6

Single, superb mixed.—From all the choicest sorts I 0

	Per pkt. s. d.
PERSICUM PAPILIO (<i>Butterfly Cyclamen</i>).—A most striking novelty noted for the fine habit of the plant, and the graceful and beautiful fimbriated flowers which are of large size, and contain many new and rare colours of great beauty. FIRST CLASS CERTIFICATE, ROYAL HORTICULTURAL SOCIETY	2 6
Pioneer (<i>New Feathered Cyclamen</i>).—Flowers of considerable substance, with a strikingly distinct crest.	2 6
Pioneer Rose	2 6
Pioneer White	2 6
Eileen Low (new).—The colour is a lovely shade of rose, with distinct bluish-white margin and crest on each petal	2 6
Hardy Cyclamen, Mixed. —Suitable for growing on rockwork, or for naturalizing in half-shady places	1 6

"Splendidly grown Cyclamen were staged by Messrs. James Veitch & Sons. These represented a very fine strain, as in every case flowers were of large size and substance, and the colours were clear and rich, the plants were also very freely-flowered and most effective."—*The Gardener Magazine*.

DATURA.—Half-hardy annuals of very rapid growth, with large trumpet-shaped, sweet-scented flowers, well suited for filling blanks in shrubberies.

Atroviolacea plenissima.—Dark violet flowers 0 6

Chlorantha fl. pl.—Double yellow flowers; very fragrant 0 6

Cornucopia.—White, beautifully marbled with royal purple 0 6

Fastuosa.—Double purple 0 6

Fastuosa.—Double white 0 6

Fastuosa aurea plenissima.—The beautiful golden yellow flowers are very double, sweet scented, and of enormous size 0 6

Wrightii.—Large white flowers; very handsome 0 3

DICTAMNUS

Fraxinella (Dittany) (*The Burning Bush*).—Hardy perennials of easy culture, notable for their handsome spikes of flowers as well as for their fragrant leaves, which emit an odour of Balsam when rubbed or bruised. Height 1½ ft.

Purple, handsome purplish crimson 0 3

White, a white variety of the preceding 0 3

DIDISCUS (Trachymene)

Cornutus.—A half-hardy annual, but better suited for pot culture in the greenhouse than in the open border. Flowers sky-blue. Height 1½ ft. 0 6

VEITCH'S DELPHINIUMS.

DELPHINIUM.

The great improvement effected in these splendid border perennials strongly recommends their culture from seed, the best of results with vigorous growth being thus obtained. They are of easy culture, and when well established, form splendid objects for mixed borders or shrubberies. All Delphiniums thrive in a good open yet substantial soil, they are among the most useful and beautiful of garden flowers producing splendid spikes of bloom through the summer; excellent for cutting. Height 3 to 5 ft.

Per pkt.

DIASCIA BARBAE.

Per pkt.
s. d.

DIASCIA

Barbae.—This free-flowering plant grows rapidly, and the beautiful rosy pink flowers are borne in constant profusion throughout the summer months. It is of the greatest value for general bedding purposes in the open ground. Seed sown in gentle heat in spring and planted out in May will commence flowering in June. Height 1 ft. 1 0

DIGITALIS (Foxglove).—Hardy perennials of easy culture, valuable for shrubby borders where they will soon acclimatize themselves. Should be more grown than they are.

Veitch's grandiflora spotted.—A splendid variety selected at our Langley Seed Farm; it is of stately growth, the flowers are of immense size, pure white, heavily spotted with violet-purple 1 0

Finest Spotted.—Large spotted flowers of various shades 0 6

Purpurea grandiflora.—This very fine strain is remarkable for the boldness of its spikes, the size of its blossoms, and the markings on the same. AWARD OF MERIT 0 6

Purpurea (Common Foxglove).—Purple 0 3

Purpurea alba.—White variety 0 3

Lutea grandiflora.—Yellow flowers, a very distinct variety 0 3

Monstrosa.—Splendid mixed; a novel variety, with long spike surmounted with an immense flower 0 6

Mixed Colours,
per ounce, 1/- 0 3

DIMORPHOTHECA.

Aurantiaca.—An extremely showy annual from South Africa. The plants of very neat branching habit, grow about 12 to 15 ins. high, and are exceedingly free-flowering. The flowers are 2½ ins. in diameter and are of a rich orange-gold colour, with conspicuous dark-coloured disc surrounded by a black zone. Should be planted in a sunny situation, AWARD OF MERIT, TEMPLE SHOW, per packet, 1/-

DIMORPHOTHECA AURANTIACA.

ECCREMOCARPUS (*Calamagrostis*)Per pkt.
s. d.

Scaber.—An exceedingly handsome and very quick-growing perennial, with orange-scarlet flowers, hardy in sheltered situations, but requiring protection in other places. It is seen to best advantage when trained over arches or upon wire-work screens or against walls. Deep rich soil and a warm site are conducive to success. Height 10 ft. 0 6

EDELWEISS (*Gnaphalium Leontopodium*.)

—Charming Swiss Alpine plant with lovely silvery star-shaped everlasting flowers; so much prized by tourists and for cutting. The chief thing to be guarded against is stagnant moisture. Admirably adapted for rockwork or exposed positions in the border. Height 6 in. 1 0

ERAGROSTIS

Elegans.—Valuable ornamental grass for cutting to use with Everlasting flowers in winter. Hardy annual. Height 1 ft. 0 3

EREMURUS.—Herbaceous perennials. Most attractive plants, bearing in summer massive spikes. They require a rich soil, and should be planted in a sheltered situation.

Himalaicus.—Flowers creamy white. Height 6 to 8 ft. 2 6

Robustus.—Soft flesh-pink colour. Height 8 to 10 ft. 2 6

—**Elwesianus.**—Flowers pink, yellow anthers. Height 9 ft. 2 6

**ERLANGEA TOMENTOSA.****ERLANGEA**

tomentosa (new).—A most useful winter-flowering greenhouse perennial from British East Africa. It has sweetly-scented leaves and terminal clusters of bright mauve or rosy lilac flowers, and in general habit much resembles the Eupatoriums. It is of easy culture, only requiring ordinary greenhouse treatment. Seed sown in the early spring will commence to bloom the following Christmas. It should be grown in 5 or 6-in. pots, and will make nice bushy plants about 18 inches in height, which will remain in flower for several weeks. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY, January, 1910. 2 6

ERYSIMUM.—Hardy annuals or free-flowering character with Wall-flower-like blossoms, easily grown in ordinary garden soil. Height 1½ ft.

Arkansanum.—Flowers bright yellow 0 3

Peroffskianum.—Orange-coloured flowers . . . per ounce, 6d. 0 3

Dwarf compact Golden Gem.—Hardy biennial, with golden yellow flowers, very effective for spring bedding. Height 6 in., per ounce, 1/6 0 6

ERYTHRINA (*Coral Tree*)

Crista Galli.—A shrub suited for the greenhouse as a pot plant or for planting against walls; colour rich scarlet. Seed should be sown early 1 0

ESCHSCHOLTZIA.—Showy hardy annuals, producing a fine effect and extending in beauty over a long period. Should not be grown in rich soil, a good situation being amongst rockwork or on banks in sunny positions. Height 1 ft.

***Californica.**—Bright yellow, orange centre. . . . per ounce, 9d. 0 3

Caniculata rosea.—Delicately fluted petals 0 6

***Crocea.**—Rich deep orange-coloured flowers . . . per ounce, 9d. 0 3

*—**alba.**—Pure white flowers of medium size 0 3

*—**double flore pleno.**—Semi-double bright orange flowers 0 3

***Grandiflora rosea.**—Rosy carmine flowers 0 6

***Mandarin.**—Rich orange-scarlet flowers, shaded crimson 0 6

Maritima.—Bright yellow flowers, and silvery foliage 0 6

The Mikado.—Very pretty brilliant orange-crimson, quite a distinct shade 1 0

EUCALYPTUS.—The following are the best known and most suitable varieties of the Australian Gum Tree for cultivation in this country; they are of vigorous habit, producing a fine effect the same season from seed for sub-tropical bedding. *E. Globulus* is the well-known Blue Gum. Half-hardy. Height various, according to localities and situations.

Amygdalina 0 6

Citriodora 2 6

Coccifera 0 6

Cordata (*Puberulenta*).—An excellent plant for greenhouse decoration or summer bedding 2 6

Globulus 0 6

Gunnii 0 6

Resinifera 0 6

EULALIA.—Most distinct hardy ornamental grasses, being a fine feature when planted near water and on a somewhat rising ground. Height 4 ft.

Japonica.—Foliage deep green 0 6

Japonica zebrina (*Zebra Grass*).—A beautiful variety with bars of yellow running across the leaves; varies from seed. 1 0

EUTOCA

***Viscida.**—An extremely showy and continuous-flowering hardy annual with small deep blue flowers. Height 1 ft., per packet, 3d.

EXACUM

Affine.—A dwarf showy half-hardy annual for pot culture, with clusters of fragrant lilac flowers, per pkt., 1/6

Macranthum.—We have pleasure in offering seed of this splendid stove biennial. The flowers are 2 inches in diameter and of a deep rich purple colour, a marked contrast to the bright yellow stamens. Height 1½ ft., per packet, 2/6

**EXACUM MACRANTHUM.**

Those marked thus * are adapted for autumn sowing.

Per pkt.
s. d.

EVERLASTINGS.—The following collection contains the most showy varieties, and are particularly useful as dried flowers for winter bouquets, for which purpose the blooms should be cut before they are fully expanded and dried in an airy dark shed.

Collection of 12 varieties, 2/-

FERDINANDIA

Eminens.—A noble-looking plant for sub-tropical gardening, growing 6 to 8 ft. high; it forms an excellent background to broad borders. The seed should be sown early in gentle heat, and be well looked after until the seedlings are up and pricked off. Tender perennial 0 6

FERNS.—Spores should be sown carefully in a gentle heat as soon as they are received.

Greenhouse . . . 1 0 | **Hardy** 1 0

FRANCOA.—A half-hardy perennial flowering in July and August, its pure white blooms being freely produced on long branching spikes; it is a plant of the easiest possible culture, and an acquisition to any greenhouse. Seed sown in March will produce a stock to flower in fifteen months. Height, when in flower, 2 ft.

Ramosa (Bridal Wreath) 1 0

FREESIA

Refracta alba.—This sweetly-scented bulbous plant is readily raised from seed, which should be sown early, and grown on without rest until the plants have flowered. Greenhouse culture is all that is needed after the seedlings are established. Height 15 in. 1 0

Choice Hybrids.—This charming novelty contains many beautiful colours and is a grand addition to these lovely cape flowers 1 6

FUCHSIA.—The raising of Fuchsias from seed is an interesting experiment, there always being the possibility of securing something new and distinct; the seed offered is saved from a choice collection. Sown early will flower in the following autumn.

Double and Single.—Finest mixed 1 6

GAILLARDIA.—Very showy hardy perennials, most useful for cutting or mixed beds, commencing to flower early in the summer, and continuing to bloom until cut down by frost. The flowers are of immense size and durability, and embrace many beautiful and brilliant shades of colour. By making an early sowing they will flower the first season. Height 2 ft.

Finest Hybrids.—Saved from the choicest named varieties 1 0

Grandiflora hybrida.—Crimson and gold flowers 0 6

Compacta hybrida.—Dwarf variety, with numerous flowers of the most brilliant colours, very useful for cutting. Height 15 in. 1 0

Picta.—Half-hardy annual with large bright yellow and red flowers 0 3

Lorenziana.—Half-hardy annual with large double flowers of various bright colours, fine for cutting 0 6

GAURA

Lindheimeri.—A hardy perennial, but should be raised from seed every spring; very effective when mixed with foliage plants, a light soil suiting it best. Height 3 ft. 0 3

GENTIANA

Acaulis.—Early spring-flowering Alpine plant; a cool moist situation should be chosen for the sowing of seed and for the culture of the plants up to the flowering stage. Winter the plants under glass the first season. The flowers are of an intensely deep blue colour. Height 6 in. 0 6

GENISTA

Andreana.—A handsome Broom with a profusion of flowers with bright yellow standards, and a conspicuously marked deep crimson fall. It is quite hardy and will bloom freely the second season from seed 1 0

GERANIUM

Platyanthum.—A handsome hardy perennial recently introduced from China with flowers of a rosy purple colour. Admirably adapted for herbaceous borders or the wild garden 1 6

Zonal.—Saved from a choice collection. Early sowing in gentle heat is recommended 2 6

GERBERA NEW HYBRIDS.

Per pkt.
s. d.

GERBERA

New Hybrids (Adnet's Strain).—One of the most interesting introductions of recent years. Originally raised by Mr. Irwin Lynch, of the Cambridge Botanic Gardens, between *G. Jamesoni* and *G. viridiflora*. The flowers are borne on long stalks which render them suitable for all kinds of floral decoration. The plants are of easy cultivation and can be grown in any garden in a sheltered position or on a warm border where protection can be given during severe weather. They also make beautiful pot plants. A SILVER CUP WAS AWARDED TO MR. IRWIN LYNCH BY THE ROYAL HORTICULTURAL SOCIETY for this valuable acquisition 1 6

"It is impossible to describe the elegance, the lightness, the originality, distinctness, or the colours so varied and delicate of this pretty composite. The scale of colours is of incomparable richness."—*The Gardeners' Chronicle*.

"Very charming were the hybrid Gerberas that came from R. Adnet, Cap d'Antibes, Riviera. All the shades of red, crimson, salmon, pink, orange, and gold were here, and they were very greatly admired."—*Journal of Horticulture*.

Jamesoni (Transvaal Daisy).—A most handsome plant from South Africa, bearing a large Daisy-like orange-scarlet flower from 4 to 5 in. in diameter. It makes a charming pot plant for the cool greenhouse, and is of easy culture, providing little water is given during the winter months. It is also a grand border plant requiring a light rich soil and a south sunny aspect, and slight protection during hard weather. Height 18 in. 1 6

GLORIOSA ROTHSCILDIANA.

GLORIOSA

Rothschildiana.—A handsome quick-growing stove climber, the flowers are rich glowing crimson with dark purple at the base. Seed should be planted singly $\frac{1}{4}$ inch deep in pots of light soil and placed in a temperature of 75 degrees in February or March 2 6

GODETIA, DOUBLE ROSE.

GODETIA

Bridesmaid.—Rose, edged and centred white 0 6
Butterfly.—White, with crimson blotch 0 6

GODETIA. —

Among the most beautiful and attractive of hardy annuals. The flowers are large and showy, and are most suitable for the margins of shrubberies, mixed borders, or similar positions. The beds of Godetias in flower at our Langley Nursery during the summer form a most brilliant picture. The seed germinates freely; the seedlings should therefore be thinned out in an early stage to impart more vigour to each individual plant.

GODETIA—continued

Per pkt.
s. d.

- Double Rose.**—A splendid variety with long sprays of large, double Clarkia-like rose-coloured flowers, useful both for the border and for cutting; the flowers last a long time in water if cut as soon as the buds are fully developed. Height 18 in. 1 0
- Crimson Glow.**—This splendid variety is of the same compact and free-blooming habit as *Sunset*, but many shades deeper. Height 9 in. 1 0
- Duchess of Albany.**—Satiny pure white flowers 0 6
- Gloriosa.**—Very showy variety, with crimson flowers 0 6
- Lady Albemarle.**—Large flowers of a beautiful carmine-crimson colour, edged lilac. Height 1 ft. per ounce, 2/- 0 6
- La Belle.**—Crimson, conspicuously edged with white 0 6
- Princess of Wales.**—Rich ruby-crimson flowers 0 6
- Rosamond.**—A very effective dwarf variety with large light rose-coloured flowers. Height 9 in. 0 6
- *Rosea alba.**—White, with deep rose-coloured centre. 0 3
- Sunset.**—A most attractive bedding variety, forming compact bushes, covered with bright crimson flowers. Height 9 in. 1 0
- *The Bride.**—Showy large white flowers, with bright rose-carmine centre. Height 18 in. per ounce, 9d. 0 3
- Whitneyi.**—Rich carmine, shading off to bright rose 0 3

GODETIA, SUNSET.

GOURDS.—Large and small-fruited varieties of peculiar and varied forms, requiring the same treatment as Vegetable Marrows, but seen to best advantage when trained over rustic arches or rockwork or trailing down sloping banks.

Ornamental, mixed.—Of varied forms 0 3

Ornamental.—Collection of 12 finest varieties. 2 0

Giant.—Collection of 12 finest varieties 2 6

GRASSES, ORNAMENTAL.—Very valuable for decorative purposes, and when arranged with flowers for table decoration, bouquets, &c., produce an elegant effect.

The following collections contain only the most useful varieties:—

Collection of 12 finest varieties, 2/-

Collection of 25 finest varieties, 3/6.

GRAMMANTHES

Gentianoides.—A beautiful half-hardy annual for rockwork; requires a dry position and a light or peaty soil. Height 6 in. 0 6

GREVILLEA

Robnsta.—A most useful ornamental foliage plant for the cool greenhouse, indoor decoration, or when associated with foliage plants in the flower garden; for the latter purpose it is better to plunge the pots than to turn the plants out entirely, they can thus be lifted without check for future use. The seed when sown should be inserted edgewise to ensure better germination; a gentle warmth is better than too much 1 9

Those marked thus * are adapted for autumn sowing.

VEITCH'S SUPERB GLOXINIAS.

VEITCH'S GOLD MEDAL GLOXINIAS FLOWERING AT CHELSEA.

Our Gold Medal Collection of these lovely decorative plants is well known. The seed offered has been selected from the finest erect-flowering varieties, and will produce flowers of the finest quality. To have a succession of flower from seed, several sowings should be made at intervals from January to April; a brisk moist heat from 65° to 70° is best until the seedlings are established. Prick off into pans, and when in the second leaf pot into thumb pots, and grow on until sufficiently large enough to shift into 48-size pots for flowering in August and September. To grow good bulbs for the second year, plant the small bulbs from the thumb pots into a pit or frame in May where they can grow undisturbed the rest of the season. All that is needed is a gentle bottom heat to start them into growth. Light shading will be needed during bright sunshine.

	Per pkt. s. d.
VEITCH'S GIANT MIXED (new). —A grand strain having immense flowers of beautiful form, so much admired in our exhibits at the Royal Horticultural Society's Hall . . . 3/6 and	5 0
VEITCH'S SUPERB STRAIN. —Saved from our newest and best sorts. Very free-flowering, with the greatest variety of colours; flowers large and open, growth vigorous . . .	2 6
VEITCH'S SCARLET VARIETIES. —Saved from our high-coloured scarlet and crimson-scarlet sorts, which mark a decided advance in these shades of colour . . .	2 6

"Messrs. J. Veitch & Sons sent a superb collection of Gloxinias arranged in blocks of distinct colours. The varieties were numerous, and showed to perfection the excellence of the strain. (Award of Merit for the strain)."—*Gardener's Chronicle*.

	Per pkt. s. d.
VEITCH'S SPOTTED VARIETIES. —A charming strain of very compact growth, and most exquisite in the delicate markings; the flowers are large and varied . . .	2 6
VEITCH'S VIRGINALIS. —Pure white flowers, of perfect form and great substance, having the same handsome foliage and free-flowering character as our other strains . . .	2 6
Erect-flowered. —From a superb collection . . .	1 6

"Having flowered your Gloxinias from seed sown this spring, I must say they have turned out splendid, the colours ranging from deep velvety red, pure white, and purple, to the most delicate pink. I have never seen Gloxinias to touch them.—Mr. W. BROWN, Gardener to the Right Hon. the EARL OF ABERDEEN."

GESNERA

Veitch's New Hybrids.—Valuable plants for the stove or warm greenhouse, easily raised from seed, which flower the first season. The flowers pendulous are freely produced and borne on spikes in shape and style like those of a small Pentstemon; they require the same treatment as Gloxinias . . .

GEUM.—Most serviceable hardy perennials, requiring a fair amount of room; they are of easy culture and accommodating as to soil. Remain a long time in flower. Height 2 ft.

Coccineum.—Bright single scarlet flowers . . . 0 3

Atrosanguineum flore pleno.—Double crimson flowers . . . 0 6

GILIA

Coronopifolia.—A pretty half-hardy biennial, densely covered with finely cut foliage and tubular-shaped trumpet-headed flowers of various shades of orange-scarlet colour. It requires a well drained soil, and should be sown in August for blooming the following July. Height 3 ft. . . 1 0

The following hardy annuals of light and elegant growth are very reliable for autumn sowing to flower early in the spring:—

***Dichotoma.**—A pretty variety of dwarf habit, with slender stems covered with a mass of pearly-white flowers. Height 6 in. 0 6

***Tricolor.**—White, lilac and purple flowers . . . per ounce, 6d. 0 3

Those marked thus * are adapted for autumn sowing.

GYNERIUM

Argenteum (*Pampas Grass*).—A grand ornamental hardy perennial grass, growing from 8 to 10 ft. in height . . . o 6

GYPSOPHILA.—Extremely light and graceful hardy plants, of easy growth, flowering from June to September. Useful in pots for decorative uses, and in a cut state to mix with other flowers.

***Elegans alba**.—Hardy annual, with white flowers. Height 18 in. . . o 3

***Elegans rosea**.—Hardy annual, with rose-coloured flowers. Height 18 in. . . o 3

Muralis.—A compact pink annual. Height 6 in. . . o 3

***Paniculata**.—A white-flowering hardy perennial. Height 2 ft. . . o 3

HAWKWEED.—Hardy annuals, free-flowering and very showy, well suited to poor soil or where stones abound. Height 18 in.

Red . . . White . . . Yellow . . . each . . . o 3

HELICHRYSUM (*Everlastings*).—Excellent half-hardy annuals for mixed borders, but more particularly useful as dried flowers for winter bouquets, for which purpose the blooms should be cut before they are fully expanded, and dried in any airy dark shed. Sow in a cold frame, and afterwards transplant the young plants to their summer quarters. Height 2 ft.

Double Fireball.—Large double rich crimson flowers . . . o 6

Double Golden Ball.—Large handsome golden yellow flowers . . . o 6

Double Pink Beauty.—Flowers a beautiful salmon-pink . . . o 6

Double Silver Ball.—A great improvement in size and purity upon the old white variety. The plant produces a profusion of large, perfectly double pure silvery white flowers . . . o 6

Double Scarlet o 3

Double Yellow o 3

Double mixed.—All colours . . . per ounce, 2/- . . . o 3

Dwarf Double.—Finest mixed, all colours. Height 1 ft. . . o 3

Assortment of splendid double varieties, separate, in 10 distinct colours, 2/-.

HEUCHERA

Sanguinea grandiflora.—An extremely pretty dwarf hardy plant, with small roundish leaves and numerous lovely panicles of bell-like flowers of the most brilliant coral-red; the elegant scapes are valuable for cutting, and the plant is a robust and vigorous grower in almost any border I 0

HIBISCUS MANIHOT.—This strikingly beautiful decorative plant attains a height of about 4 ft.; producing flowers fully 4 inches in diameter, their colour being a soft clear sulphur-yellow, with a conspicuous maroon blotch at the base of each petal. They are only ephemeral, but are borne in large numbers and quick succession, and make a splendid display for a long time. In habit the plant resembles the Ricinus, with deep green leaves, which render it very ornamental even when not in flower. It is very effective in pots for greenhouse decoration, or makes splendid specimens in beds or borders. Although a perennial we advise the treatment of a half-hardy annual. AWARD OF MERIT from the ROYAL HORTICULTURAL SOCIETY . . . I 6

Africanus.—A showy hardy annual of free growth, with rich yellow flowers with a purple centre. Height 18 in. . . o 3

HOLLYHOCK.—Saved from a choice collection of the finest double varieties, embracing all shades of colour, and which may be expected to produce fine double varieties. With the disease so prevalent in the choice named varieties of the Hollyhock for several years past, there is no better plan of obtaining a stock than by sowing seed. Plants thus obtained will be found the most disease-resisting of any. Hardy perennial. Height 6 to 8 ft.

VEITCH'S SUPERB MIXED.—Saved from an unequalled collection . . . 1/6 and 2 6

Collection of 12 Double varieties, separate, 5/-

Everblooming, mixed.—This fine variety, if sown early in March and planted out in May, will flower in July. The variation in form and colour among the flowers is very great . . . I 6

Single Mixed.—A very showy border plant saved from a large and varied collection of single flowers . . . o 6

Primrose Queen.—A splendid addition to this class of plants. The flowers are large and of a clear primrose-yellow . . . I 0

HELIOTROPIUM, NEW GIANT BLUE.

HELIOTROPIUM (*Heliotrope*).—Delightfully fragrant flowers, excellent for bedding or pot culture, and particularly useful for cutting. The seed should be sown in warmth early in the spring, the plants being gradually hardened off. Height 18 in.

Giant Blue.—A variety producing large heads of flowers from 12 to 18 inches in diameter, of a pleasing lilac-blue colour . . . I 0

Giant White.—Flowers of a beautiful white, and very fragrant . . . I 0

Dwarf Giant.—Compact in habit, with enormous heads of flowers of various shades of colour . . . I 0

Triomphe de Leige.—Flowers rich dark blue . . . o 6

Finest mixed.—From many varieties . . . o 6

Those marked thus * are adapted for autumn sowing.

- HONESTY (*Lunaria biennis*).**—Good early-flowering plants; the seed vessels, which are flat and broad, look like transparent silver, and are very pretty for winter bouquets of dried flowers. Height 2 ft. Hardy biennials.
- Purple** 0 3 | **White** 0 3
- Variegated foliage.**—Attractive plant with purple flowers . . . 0 6
- HORDEUM (*Squirrel-Tail Grass*)**
- Jubatum.**—An elegant hardy annual, producing its pendent barley-like heads in profusion. Height 2 ft. 0 3
- HUMEA.**—Graceful and ornamental plants with fragrant foliage and drooping racemes of rose and rosy purple-coloured flowers, alike useful in the conservatory or the flower garden. Sow during June or July. Half-hardy biennial. Height 5 ft.
- Elegans** 1 0 | **Elegans purpurea** 1 0
- HUMULUS**
- Japanicus (*Japanese Hop*).**—A very rapid-growing hardy annual climber valuable for quickly covering blank spaces . . . 0 6
- Japanicus Variegatus.**—Attractive variegated foliage . . . 0 6
- HUNNEMANNIA**
- Fumariifolia.**—Very showy erect-growing flowers, bright yellow in colour, and relieved by a nice glaucous foliage. Although a half-hardy perennial, it will, if sown early, show its full beauty the first season. Height 2 ft. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 0 6
- IBERIS**
- Sempervirens (*The Evergreen Candytuft*).**—A most useful hardy perennial with pure white flowers, making a beautiful display throughout April and May; its glossy deep green foliage and compact habit of growth render it attractive at other times. Height 9 in. . . 0 6
- ICE PLANT.**—Leaves and stems thickly covered with sparkling ice-like globules; fine for garnishing or for growing in poor soil and dry situations. Sow in April in a gentle heat, and plant out in June with a slight protection. Half-hardy annual. Height 5 in. . . 0 6
- IMANTOPHYLLUM (*Clivia*).**—Most useful plants for the decoration of the conservatory, and for the dwelling-house during the spring months. Beautiful trusses of flowers in varying shades of orange-scarlet. AWARDED SILVER FLORA MEDAL FROM THE ROYAL HORTICULTURAL SOCIETY.
- Veitch's Hybrids.**—Saved from Silver Medal Collection . . . 2 6
- INCARVILLEA**
- Delavayi.**—A tuberous-rooted hardy perennial, with large rose-coloured flowers shaped like a *Petunia*; they are produced in clusters on stems about 18 in. high 1 6
- IMPATIENS**
- Holstii.**—This new species from East Africa should be largely grown. It is of vigorous habit and flowers very freely, forming thick bushes about 18 inches in height; resembles *Impatiens Sultanii*, but far surpasses it by its stronger and quicker growth and the more beautiful colour of its flowers, which are of a brilliant vermilion-red and well set off by the dark green foliage. Very fine for pot culture in the greenhouse, and of great service for summer bedding 1 0
- Sultanii.**—A very free-growing and profuse-flowering cool stove plant, suited to a greenhouse in summer. Sown early it will make good-sized plants and flower the same season. Height 1 to 2 ft. 1 0
- IONOPSIDIUM**
- Acaule.**—Quite a miniature half-hardy annual of close tufted growth, rarely more than 3 in. in height, thriving best in the shade, being well suited for small groupings on rockwork . . . 0 6
- IPOMÆA.**—Half-hardy climbing plants of rapid growth, growing from 6 to 10 ft., thriving best grown under glass in a warm house; outside a warm border should be chosen, with abundance of moisture during summer.
- Coccinea.**—Bright scarlet flowers. Height 10 ft. 0 3
- Rubro cerulea.**—Beautiful sky-blue flowers 0 6
- Assortment of 10 finest varieties, 2/6.
- ISOLEPIS**
- Gracilis (*Scirpus riparius*).**—An excellent perennial grass for pot culture; extremely useful for decorative uses as marginal edgings by reason of its graceful drooping habit of growth. Height 6 in. . . 0 6

Per pkt.
s. d.**ISATIS****Glaucia.**—A true perennial, and a desirable plant for the border.

The stems are from 3½ to 4 ft. in height, clothed with lanceolate leaves of a glaucous green with white ribs. The yellow flowers are borne in large loose racemes, and are very effective . . . 1 6

Per pkt.
s. d.**KALANCHOE**

Flammea.—From Somaliland in East Africa, and although coming from a tropical region it is found to thrive and flower freely in the temperature of a comparatively cool greenhouse, when fully exposed to the light. The whole plant averages 15 to 18 inches in height. The individual flowers are brilliantly coloured orange-scarlet, about half-an-inch in diameter, and as the cut bloom will last fresh in water for at least a fortnight it will be found exceedingly useful for room and table decoration. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY, per pkt., 2/6.

**KALANCHOE FLAMMEA.**

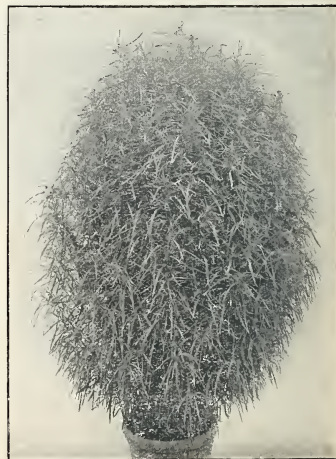

Dyeri (new).—This most recent addition is strong growing with broad glaucous green leaves and stout spikes about 2 ft. high, bearing long tubular waxy white flowers 1½ inches in length, which last a long time in perfection. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 2 6

KAULFUSSIA

Ameloides.—A hardy annual of very compact growth, with dark blue flowers freely produced. Height 9 in. 0 3

KOCHIA TRICHOPHILA (*Mock Cypress*).

A pretty half-hardy annual, forming compact bushes about 2½ ft. in ht., with small feathery light green foliage which changes as the summer advances to a deep green, and to that of a crimson hue in September. Very fine specimens have been exhibited in pots for which it is admirably adapted. Seed may be sown in March, giving the same treatment as for *Balsam* or other similar annuals, care being taken to secure a good drainage, as it is sometimes slow in germinating; or seed may be sown in April, and the seedlings planted out 2 ft. apart in the open border about the end of May, per packet, 1/-

**KOCHIA TRICHOPHILA.**

- LAGURUS**
Ovatus (Hare's Tail Grass).—A distinct hardy annual, producing small whitish green tufts. Height 18 in. 0 3
- LANTANA**.—Half-hardy perennials of shrubby growth, useful either in pots for greenhouse decoration, or planted out in mixed borders, flowering best when not overpotted or planted in rich soil; colours rich and various. 0 6
- Finest mixed** 0 6
- New Dwarf Hybrids**.—A most useful bedding variety of dwarf, bushy, compact habit. The flowers are larger and more showy than in the ordinary variety; it contains many striking and pleasing shades of pink, red, orange-yellow, orange-scarlet, and white. Height 8 to 10 in. 1 0
- LARKSPUR**.—Amongst the best of hardy annuals, lasting a long time in flower. The plants should be transplanted or thinned out in good time to avoid overcrowding and to secure the branching habit peculiar to nearly every kind now offered.

LARKSPUR, EMPRESS CARMINE.

- Empress Carmine**.—A very fine new shade of colour, most useful for cutting. Height 1½ ft. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY. 0 6
- Butterfly**.—A distinct dwarf variety with large single blooms of intense bright blue, slightly spotted with brown. Height 1 ft. 0 6
- Branching, blue**.—Height 2 ft. per ounce, 1/- 0 3
- Branching, finest mixed**.—Of free-branched habit, many beautiful colours, good for cutting. Height 2 ft. per ounce, 1/- 0 3
- Emperor**.—Finest mixed, large and varied flowers 0 6
- Hyacinth-flowered** (*Dwarf Rocket*).—Finest mixed, large spikes of double flowers; very telling. Height 1 ft. per ounce, 1/6 0 3
- Collection of 10 distinct colours, 2/-
- Tall Stock-flowered**.—Finest mixed, exceedingly effective in mixed borders. Height 18 in. 0 3
- Collection of 8 distinct colours, 1/6.

- LASTHENIA**
Californica.—A showy dwarf hardy annual with bright golden yellow flowers, thriving best in sunny situations. Height 6 in. 0 3
- LATHYRUS**.—Well-known plants of rapid growth and easy culture, very useful as cut flowers, and excellent for covering rustic work and wire arches or in the wild garden over roots and tree stumps.
- Latifolius** (*Red Everlasting Pea*) { Hardy perennials. { 0 3
 — **albus** (*White Everlasting Pea*) { Height 5 to 6 ft. { 0 6
- Sativus**.—Small-flowered annual with sky-blue flowers 0 3

- LAVATERA**.—Tall-growing, large and effective-looking plants, covered during the entire summer with bloom, best used as backgrounds to others of dwarfer habit. Hardy annuals allied to the Mallows.
- Splendens rosea**.—Very beautiful and showy 0 6
- Splendens alba**.—Large white flowers 0 6
- Arborea variegata** (*Tree Mallow*).—An excellent ornamental foliage plant, profusely variegated with pale yellow and white; best when grown in poor soil. Hardy perennial. Height 4 ft. 0 6
- LEPTOSIPHON**.—Excellent free-flowering hardy annuals for beds and masses; the dwarf varieties are equally profuse in flowering, and admirably adapted for edging.
- Densiflorus**.—Lilac. Height 1 ft. per ounce, 9d. 0 3
- Densiflorus albus**.—Pure white „ 9d. 0 3
- Aureus**.—Golden yellow. Height 3 in. 0 3
- Hybridus**.—Various bright colours. Height 3 in. 0 3
- Roseus**.—Bright rose, of dense habit. Height 3 in. 0 3
- LEPTOSYNE**
Stillmanni.—Hardy annual with bright yellow flowers, coming to perfection in a very short time. Numerous flowers on long stalks, remaining in flower a long time. Height 18 in. 0 6
- LIMNANTHES**
Douglasii (*grandiflora*).—A very profuse-blooming hardy annual, of dwarf spreading growth, with white and yellow flowers; well adapted for growing in moist ground. Height 6 in. per ounce, 9d 0 3
- LINARIA** (*Toad Flax*).—Hardy annuals of easy culture, with pretty small Snapdragon-like flowers; too much moisture at the roots should be avoided. Height 1 ft.
- Aparinoides**.—Very beautiful colours, the plants are taller than *reticulata*. 0 6
- Bipartita splendida**.—Deep purple flowers 0 3
- Maroccana alba**.—A showy border variety which forms dense bushes, and produces a succession of pure white flowers throughout the summer months. Height 1 ft. 0 6
- Maroccana Excelsior** (*new*).—A fine and very effective mixture of bright colours 0 6
- Reticulata aurea purpurea**.—Rich purplish maroon flowers, mottled with bright orange; very pretty variety 0 6

Those marked thus * are adapted for autumn sowing.

Per pkt.
s. d.

LINUM.—A valuable class of hardy plants, thriving well in unfavourable situations and flowering for months together. *L. grandiflorum coccineum* is worthy of extended cultivation in masses or clumps for mixed borders. Height 1 ft.

Azureum.—Pale blue flowers. Hardy annual 0 3

Flavum.—A beautiful golden yellow hardy perennial 0 6

Grandiflorum coccineum.—Brilliant scarlet, most profuse flowering. Hardy annual per ounce, 1/6 0 3

LISIANTHUS

Russellianus.—A beautiful greenhouse biennial with violet-blue flowers. The warmest part of the greenhouse should be chosen, or a pit with gentle heat, growing onwards from the time of seed sowing. Height 18 in. 1 0

LOBELIA (The Cardinal Flower).—Splendid half-hardy herbaceous plants with long spikes of brilliant flowers, very fine for grouping or mixing with dwarfier plants. Height 2 to 3 ft.

Cardinalis fulgens.—Large brilliant vermilion flowers 1 0

Queen Victoria.—Vermilion flowers, dark purple foliage 1 0

Hybrids, finest mixed 1 0

LOBELIA (Dwarf).—An invaluable class of plants for bedding, edging or ribbon gardening. Our fine strain of *L. speciosa* is now well known and highly prized by our numerous customers. The plants have been carefully selected and grown from cuttings, and are dwarf and compact in habit, very profuse and continuous in flowering, and of a beautiful rich dark blue colour. *L. gracilis* should be particularly noted for its value in hanging baskets, or as a finish to flower vases; in both cases the effect produced by its long drooping growths and great profusion of flower is beautiful in the extreme. It is best grown as an annual, being of rapid growth.

LOBELIA,
VEITCH'S BLUE.LOBELIA,
WHITE PERFECTION.

SPECIOSA, VEITCH'S STRAIN.—Rich dark blue, dwarf compact habit, very profuse flowering, and unrivalled for bedding or edging. Height 6 in. 1 0

Blue King.—Bright blue flowers with distinct pure white eye, very compact. Height 6 in. 0 6

Cobalt Blue.—Good for bedding. Height 6 in. 0 6

Erinus erecta.—Deep blue } Compact, upright, bushy habit,

— *alba.*—White } fine for edgings. Height 6 in., each 0 6

Gracilis.—Dark blue } Spreading habit, and free flowering, most

— Light blue } suitable for hanging baskets, vases, &c., each 0 3

Mrs. Clibran.—Dwarf compact variety, deep blue flowers; distinct 1 0

Pumila grandiflora.—Light blue, compact grower, excellent for carpet bedding, edgings, &c. 1 0

Royal Purple compacta.—A very compact variety, with dark stalks, deep blue flowers, and distinct white eye. Height 6 in. 0 6

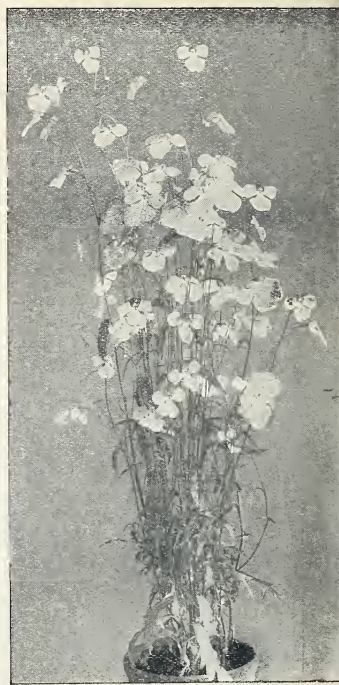

Ramosa.—A tall variety of branching habit, with large blue flowers. Height 9 in. 0 6

Speciosa (Crystal Palace Compact).—Dwarf blue, per ounce, 5/ 0 6

White Perfection.—Pure white. Height 6 in. 1 6

LOBELIA TENUIOR.

A charming species, with large blue flowers about 1 in. in diameter. The plant is of light and graceful habit, reaching a height of about 1 ft. The profusion and long continuity of flower throughout the summer months cannot fail to make it most popular for use in the greenhouse, either as a pot or basket plant. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY. Per pkt., 1/6.

LOBELIA TENUIOR.

LOPHOSPERMUM

Rhodochiton (Rhodochiton volubile).—A beautiful half-hardy perennial, but best adapted as a greenhouse climber; its flowers are freely produced, colour deep vinous purple. Height 8 to 10 ft. Per pkt., 1/-.

Scandens.—Is somewhat hardier, and is well suited for ornamental baskets or any position where its growths can hang down rather than cling to a support; the flowers are bright rosy purple. Per pkt., 6d.

LOTUS

Peltorhynchus.—A beautiful greenhouse perennial, with silvery foliage and large bright coral-red flowers; most suitable for hanging baskets, pillars or trellis work 1 6

LOVE-LIES-BLEEDING

Amarantus caudatus.—An extremely showy hardy annual, growing 2 to 3 ft. high with drooping crimson plumes which make a grand display in the summer and autumn. Where an effect is desired with but little trouble, this is a most useful plant, per ounce, 6d. 0 3

LUPINUS.—Old-fashioned and well-known annuals of strong growth. Height 1½ to 2 ft.

Large Blue 0 3

Large Rose 0 3

Large White 0 3

Yellow 0 3

LUPINUS (Annual).—Valuable garden plants of free-growing character and useful in a cut state.

Affinis.—Dwarf habit, with blue and white flowers. Height 1 ft. 0 3

Hartwegii.—Azure-blue, very effective. Height 2 ft. 0 3

Hybridus atrococcineus.—Very large spikes of crimson-scarlet white-tipped flowers, a most showy variety. Height 2 ft. 0 3

Mutabilis Cruickshanki.—Blue and yellow; very attractive. Height 3 ft. 0 3

Nanus.—Blue and white. Height 1 ft. per ounce, 9d. 0 3

Subcarnosus.—Rich blue. Height 1 ft. 0 3

Sulphureus superbus.—Bright orange and yellow, very showy. Height 2 ft. 0 3

Tricolor elegans.—Purple-rose and white, very pretty. Height 2 ft. 0 3

- LUPINUS (Perennial).**—Indispensable for the herbaceous border.
- Arboreus.**—The yellow tree Lupin, a fine hardy free-flowering shrub. Height 4 ft. 0 6
- Arborens Snow Queen.**—The white tree Lupin, a dense bush covered with racemes of fragrant flowers; fine for cutting. 0 6
- Douglasii.**—Various shades of pink, purple, blue, and white. If sown early will flower the same season. Height 3 ft. 0 6
- Polyphyllus.**—Blue } Handsome hardy perennials with
— **albus.**—White } immense spikes of large flowers.
— **Blue and White** } Height 3 ft. each 0 3
— **Rosens (new).**—Beautiful rose shades 0 6
- Perennial varieties, mixed** per ounce, 1/- 0 3
- LYCHNIS.**—Hardy perennials in all but the most exposed situations, with large terminal trusses of very showy flowers; a light and rather rich loam suits them best.
- Chalcedonica.**—Brilliant scarlet. Height 2 ft. 0 3
- Fulgens.**—Showy bright scarlet. Height 1 ft. 0 6
- Haageana hybrida.**—Various bright colours. Height 1 ft. 0 6
- LYTHRUM**
- Roseum Superbum (Loosestrife).**—Hardy perennial with large dark rose-coloured flowers; well suited for damp positions. Height 3 ft. 0 3

VEITCH'S DWARF AFRICAN MARIGOLD.

MARIGOLD.—These handsome half-hardy annuals do best in moderately rich soil and in open situations, and are strongly recommended where a gorgeous display in the autumn is an essential feature.

VEITCH'S DWARF AFRICAN LEMON 1 0
VEITCH'S DWARF AFRICAN ORANGE 1 0

The above two magnificent strains, grown at our Langley Seed Farm, are great improvements upon the older varieties. The plants are of compact bushy habit, with flowers of large size, globular form and densely double. Height 1½ ft.

African, Lemon } Plants of strong growth and very large,
African, Orange } showy, double flowers. Height 2½ ft.,
African, mixed } each 0 6

MINIATURE FRENCH MARIGOLD.

SINGLE FRENCH MARIGOLD.

- MARIGOLD**
- Single French (Legion of Honour).**—A compact-growing variety, bright golden flowers with conspicuous brown blotch. 1 0
- Silver King.**—A dwarf variety having light yellow petals heavily marked with deep brown blotch 1 0
- Single French, mixed** 0 3
- VEITCH'S SUPERB STRIPED FRENCH.**—Remarkably handsome Marigold, producing freely perfectly-formed double golden yellow flowers, striped with rich crimson-brown. Height 1½ ft. 1 0
- French, Dwarf, mixed.**—Many bright shades. Height 1 ft. 0 6
- French, Tall, mixed.**—Height 18 in. 0 3
- MINIATURE FRENCH.**—Very free-blooming varieties of dwarf compact habit, particularly suitable for bedding purposes, edgings, ribbon borders, &c. Height 6 in.
- Miniature Brown.**—A fine colour 0 6
— **Striped.**—Rich brown and orange 0 6
— **Yellow.**—A beautiful pale yellow 0 6

MARVEL OF PERU (*Mirabilis jalapa*).—Half-hardy perennial with most brilliant flowers of various colours, thriving best in good loamy soil not too rich in manure. Outside, the seed should not be sown too early. Height 2 ft.

Finest Mixed Colours

Assortment of 12 finest varieties, separate, 1/6.

MATRICARIA

Eximia, Golden Ball.—A densely-compact bush about 13 in. high, profusely covered with rich golden yellow flowers. Useful for groups and borders, also pot culture.

Silver Ball.—Of the same free-blooming and compact habit as the former, but with beautiful pure white double flowers.

MATTHIOLA

Bicornis (*Night Scented Stock*).—Recommended for the delightful fragrance given forth towards evening. Flowers purplish red, growth compact; hardy annual. Height 1 ft.

MAURANDYA.—Beautiful half-hardy greenhouse perennial of slender growth, with tubular flowers. Well suited for trellises or walls in sheltered places.

Barclayana grandiflora.—Purplish blue flowers.

MECONOPSIS INTEGRIFOLIA.

MECONOPSIS

Integrifolia.—A remarkable hardy herbaceous biennial, with flowers resembling those of the large Oriental Poppy but of a pure yellow colour, borne on stout stems well above the foliage. Seed should be sown not later than March, or it may lie dormant for twelve months. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY.

"This new papaveraceous plant (*Meconopsis integrifolia*) was sent from Western China and Tibet by Messrs. Veitch's traveller. It has been described as one of the grandest of newly introduced plants. First Class Certificate."—*Journal of Horticulture*.

"One of the finest of recent additions."—*Gardeners' Magazine*.

Cambrica (*The Yellow Welsh Poppy*).—A hardy perennial of very free growth, with erect pale yellow flowers, very showy. A capital plant for rockwork, where it thrives well. Height 1 ft.

Per pkt.

0 6

0 6

0 6

MECONOPSIS—continued.

Wallichii (*Blue Himalayan Poppy*).—A hardy perennial with gracefully drooping pale blue flowers. Height 3 ft.

Per pkt.
s. d.

2 6

MELIANTHUS

Major (*The Honey Flower*).—A grand foliage plant for sub-tropical gardening, being a fitting companion to Cannas, &c. It succeeds best in well-prepared rich soil, and requires plenty of water; should be treated as in the case of the Ricinus. Height 4 to 5 ft.

1 0

MESEMBRYANTHEMUM.—Invaluable half-hardy annuals for dry situations where they receive the full benefit of the sunshine, well adapted for rockwork; procumbent.

Tricolor.—Bright rose, white, and purple flowers.

0 3

Cordifolium variegatum.—Yellowish green and white foliage.

1 0

MICHAELMAS DAISIES (Perennial Asters).—These form the

chief attraction of the flower garden throughout the autumn months. Their slender-rayed flowers possess all the soft and delicate tints between white, rose, crimson and purple; the bright yellow disc gives them an additional charm. Their flowers are produced in great profusion which, combined with a neat foliage, affords elegant sprays for cutting, and their great range in habit and aspect renders them valuable for planting in many situations. They are quite hardy and require no special culture. The seed now offered has been saved from the unique Aldenham House strain, per pkt., 1/6.

MICHAELMAS DAISY.

MIMOSA

Pudica (*Sensitive Plant*).—A tender annual of light and elegant growth, the leaflets of which fold up when touched; the pale purplish flowers are produced at the axils of the leaves. Height 2 ft. per pkt., 6d.

MINA

Lobata.—A rapid-growing annual climber, bearing profusely racemes of orange-red flowers; prefers a warm situation, per pkt., 1/-.

MIMULUS.—Hardy perennials thriving best in moist situations; those grown for the beauty of their flowers are better when treated as half-hardy annuals. If sown early on warm borders they will flower the first year.

VEITCH'S FINEST MIXED.—Producing large elegantly spotted and richly marked flowers. Height 1 ft.

1 0

Cardinalis grandiflorus.—Bright scarlet. Height 2 ft.

0 6

Cupreus, Prince Bismarck.—Coppery scarlet. Height 6 in.

0 6

Musk (*Mimulus moschatos*).—Well-known popular plant, with fragrant yellow flowers. Height 1 ft.

0 6

Musk compact (*Mimulus compacta*).—A useful and reliable compact form of Musk, of dense, erect habit, and free flowering. Height 6 in.

1 0

Per pkt.
s. d.Per pkt.
s. d.

MIGNONETTE.—The great advance that has been made in the raising of new kinds now leaves hardly anything further that can be desired in this popular annual. In pot culture the chief aim must be to make the soil thoroughly firm before sowing the seed, and at no time should the plants suffer from want of water, after growth has commenced in earnest; too much manure is not advisable.

MIGNONETTE, CRIMSON KING.

Bismarck.—This giant Mignonette is of compact habit, and the flower spikes of enormous size and rich deep colour; fine for pot culture 1 0

Crimson King.—One of the finest varieties for growing in pots. It is of dwarf, vigorous, pyramidal, short-branched habit, with very thick dark green leaves, and throws up numerous extremely broad spikes of delightfully-scented reddish crimson flowers 1 0

Dwarf Erect.—Dwarf-branching, exceedingly neat in habit, robust growth; very valuable for pot culture 0 6

Giant White.—A fine strain with immense spikes of very double sweet-scented white flowers, most useful for pot culture during the winter and early spring months, or for cutting 1 0

Giant Crimson or Pyramidal.—This forms a robust, short, pyramidal growth, with large spikes of handsome reddish-tinted flowers, very sweet-scented, excellent for outdoors or pot culture, per ounce, 1/- 0 3

Golden Machet.—Plants of strong compact habit, bearing long massive spikes crowded with golden yellow flowers 1 0

Golden Queen.—Distinct, fine large spikes of golden yellow 0 6

Machet.—A superb dwarf variety of French origin, with dense spikes of very fragrant dark red flowers; fine for pot culture 1 0

Miles' Hybrid Spiral.—Superior in size to any other sort, the habit being dwarf and branching, with spikes often obtaining a length of from 8 to 14 in. per ounce, 2/6 1 0

Queen Victoria.—Large and compact trusses of deep red flowers, very fragrant; an excellent variety for pots 0 6

Ruby.—Splendid variety, with very bright coppery scarlet flowers and rich green foliage, dwarf and compact habit 1 0

Large-flowering.—Vigorous, tall, and free-growing, having long spikes of yellow and orange flowers, per lb., 6/-; per oz., 6d. 0 3

Common, Sweet-Scented 6/-; „ 6d. 0 3

MYRSIPHYLLUM

Asparagoides (Smilax).—An excellent climbing plant for cutting or decorative use, a warm greenhouse suiting it best. The small bright glossy green sprays can be cut 3 to 4 ft. in length 1 0

Asparagoides myrtifolia (new).—This beautiful myrtle-leaved greenhouse twiner is a very rapid grower and produces sprays with the greatest freedom. The foliage is very hard and of great durability and will last fresh many days after being cut 1 6

MYOSOTIS VICTORIA.

MYOSOTIS

ALPESTRIS VICTORIA.—A beautiful Forget-me-not, or dwarf bushy habit, bearing a profusion of large flowers, with characteristic central blooms. The plant attains a height of 5 to 7 in., and a circumference of 16 to 18 in., and when fully developed is quite globular in shape and perfectly covered with flowers which continue in full beauty for a long period.

Victoria, Light Blue.—A beautiful azure-blue 1 0

Victoria, Dark Blue.—Intense rich dark blue. 1 0

Ruth Fischer.—A new variety of compact habit, with very large lovely blue flowers and glossy dark green foliage. An excellent pot plant, or for cutting or planting in hanging baskets. 1 0

Star of Love.—A very early dwarf form of the above 1 0

Alpestris.—Blue } Very beautiful profuse-flowering { 0 3

— alba.—White } Forget-me-nots, growing 1 ft. high; { 0 3

— rosea.—Rose } very suitable for early spring bedding. { 0 3

— Violet Blue, charming new shade 1 0

Dissitiflora.—Rich blue, the earliest to flower, and quite distinct from all others; charming variety. Height 6 in. 1 0

Dissitiflora alba.—A pure white form of the preceding 1 0

Perfection.—This charming annual Forget-me-not is admirably adapted for pot culture. The large and very showy flowers on long stalks last a long time, and are most suitable for table decoration at Christmas. Seed should be sown in June and potted on for winter blooming 2 6

Stricta, Royal Blue.—A greatly improved form of the pillar-shaped Forget-me-not, with flowers of a beautiful deep blue colour; most useful for pots or beds. Height 1 ft. 1 0

Sylvatica (Cliveden variety).—Large bright blue flowers, valuable for spring bedding. Height 9 in. per ounce, 3/6 0 6

NASTURTIUM

TALL VARIETIES.—These are splendid free-flowering climbers, especially suitable for covering trellises, banks, screens, &c., the rich colouring of the different varieties making a fine show during the summer months. They make a remarkably rapid growth when the seed is sown in rich soil of good depth. Hardy annuals.

Black.—With dark foliage per ounce, 6d. 0 3

Crimson.—Rich crimson „ 6d. 0 3

Pearl.—Nearly white „ 6d. 0 3

Prince Henry.—Yellow, marbled scarlet „ 6d. 0 3

NASTURTIUM—continued.

	Per pkt. s. d.	
TALL, Queen "Crimson Beauty" (new). —A beautiful climbing variety with rich deep crimson-scarlet flowers and silver variegated leaves; very effective	1 0	
Scarlet. —Very bright per ounce, 6d.	0 3	
Spotted. —Straw colour, spotted	6d.	0 3
Terra-cotta	6d.	0 3
Yellow. —Bright yellow	6d.	0 3
Mixed Colours.	6d.	0 3

TOM THUMB VARIETIES.—Splendid plants for marginal lines to borders, and indispensable summer bedding plants, of dwarf, compact habit, withstanding heat and drought. They succeed best and flower better in poor soil; remain longer in bloom than perhaps any other annual. For many purposes where the colour of the foliage can play a conspicuous part in the effect, the dark foliage of the *King of Tom Thumb* varieties is extremely desirable, especially when used for growing in masses, the flowers being bright-coloured and forming a charming contrast. Hardy annuals. Height 1 ft.

Liliput.—A distinct and fine-flowering class, with its small compact bushes and immense numbers of small blooms. Displayed well above the foliage. About fifty different shades of colour. Height 9 in.

Liliput, Scarlet. —A striking orange-scarlet	0 6
Liliput, Finest Mixed. —All the newest shades	0 6
Bronze. —Very distinct and effective	0 3
Cerulea rosea. —Rose-coloured flowers	0 3
Cloth of Gold. —Golden foliage and scarlet flowers	0 3
Crimson. —Rich dark crimson per ounce, 1/-	0 3
Pearl. —Creamy white	1/- 0 3
Scarlet. —Bright scarlet	1/- 0 3
Yellow. —Pure yellow	1/- 0 3
Mixed Colours.	6d. 0 3
King of Tom Thumbs. —Plant of dwarf growth, with dark foliage and brilliant scarlet flowers per ounce, 1/-	0 3
Empress of India. —Intense crimson, dark foliage	0 3
Golden King. —Bright golden yellow, medium dark foliage	0 3
King Carmine. —A rich velvety carmine, with dark foliage	0 6
Theodore. —Dark chocolate-crimson, dark foliage	0 3
Queen of Tom Thumbs. —Rich bright crimson flowers and silver variegated foliage; very handsome	1 0
Ruby King. —Rich rosy scarlet, dark foliage	0 3
Vesuvius. —Dark-foliaged variety, apricot-coloured flowers	0 6
Veitch's Special Mixture. —Most beautiful shades	0 6

Collection of 12 Tom Thumb Varieties, 3/-

NEMESIA.

NEMESIA.—Free-flowering bushy half-hardy annual, about 12 inches in height; growing well in any rich light soil.

Compacta bicolor. —Blue and white flowers	0 6
Compacta cerulea. —A lovely blue self	0 6
Strumosa nana compacta multiflora. —A dwarf variety forming dense bushes completely hidden with bloom; most useful for bedding, or if sown in the autumn and given greenhouse treatment make a fine show in spring as pot plants. Height 8 in.	1 0
Blue Gem (new). —Of fine compact habit, with beautiful Myosotis blue flowers; very effective.	1 0
White Gem. —A pure white form of the preceding	1 0
Orange Prince (new). —A compact variety with large flowers, intense orange colour	1 0
Strumosa Suttoni. —Many beautiful colours	1 0

NICOTIANA AFFINIS.—Pure white, long tube-shaped flowers, borne in clusters, exceedingly fragrant towards evening; valuable for greenhouse decoration, or open ground in the summer, thriving well in the poorest soil

Affinis hybrids. —These free-flowering sweet-scented new hybrids produce compact bushes of vigorous growth, and have large flowers with a great range of colours	1 0
Sanderæ. —Brilliant carmine-red flowers on many-branched bushy plants about 2 ft. in height	1 0
Sanderæ hybrids. —Many beautiful shades	1 0

NICOTIANA.—The following varieties of Giant Tobacco are suitable for the centre of large beds or for wide borders. They are also noble ornamental foliage and flowering plants for sub-tropical gardening. A rich soil is preferable. Half-hardy annuals.

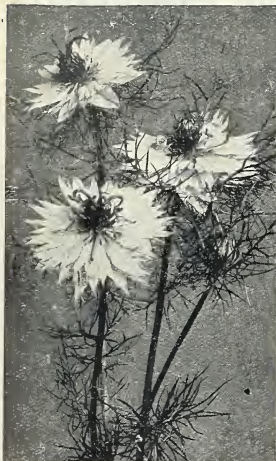

Colossea. —The leaves when young are prettily tinted with red. It makes astonishingly quick growth, soon attaining the height of 5 to 6 ft., with leaves often 2 ft. in length and 1 ft. in width	1 0
Grandiflora purpurea. —Large purple flowers. Height 5 ft.	0 6
Macrophylla gigantea. —Handsome tall plant, broad leaves. Height 6 ft.	0 6
Sylvestris. —A tall-growing large-leaved variety, with sweet-scented long pure white flowers hanging in racemes over the foliage	1 0
Tabacum Virginicum. —Narrow-leaved variety. Height 3 ft.	0 3

NEMOPHILA.—Splendid showy hardy annuals for beds or edgings; excellent alike for spring and autumn sowing. *N. insignis* is also a beautiful decorative plant in pots for spring flowering in conservatories. Growth procumbent.

- insignis*.—Bright blue, white centre . . . per ounce, 6d. o 3
insignis alba.—Large pure white flowers . . . 6d. o 3
Maculata.—White, spotted with purple . . . 6d. o 3

NIEREMBERGIA

Gracilis.—A beautiful greenhouse biennial, of light growth, and profusion of flowers, white and lilac in colour. Height 1 ft. o 6

NIGELLA, MISS JEKYLL.

NIGELLA.—Interesting half-hardy annuals with elegant cut foliage and curious flowers, popularly known under the name of "Love-in-a-mist"; they are of easy culture, and last a long time in perfection.

Damascena.—Double blue flowers. Height 18 inches. per packet, 3d.

Hispanica.—Purple flowers. Height 1 ft. per packet, 3d.

Hispanica alba.—Large white flowers with dark stamens . . . per packet, 3d.

Miss Jekyll.—A most attractive and beautiful long-stemmed variety, with clear blue flowers and graceful foliage. Height 18 inches. per packet, 1/-

NYCTERINIA

Selaginoides.—A half-hardy annual of dwarf growth, with lilac flowers, sweetly scented during the evening . . . o 6

ONOTHERA (Evening Primrose).—Very beautiful hardy perennials or biennials, extremely showy towards the evening. All are of easy culture, preferring a light sandy soil; the tall kinds should be planted amongst shrubs, and given a sunny position.

Biennis.—Clear yellow flowers. Height 3 ft. . . o 3

Bistorta Veitchii.—Hardy annual, with small bright yellow flowers, spotted with crimson. Height 1 ft. . . o 3

Drummondii nana.—Dwarf, neat habit, and very free blooming, flowers bright yellow. Height 6 in. . . o 3

Lamarckiana.—Immense yellow flowers, 3 to 4 inches in diameter, produced in great profusion. Height 3 ft. . . o 3

Macrocarpa.—Large yellow flowers. Height 1 ft. . . o 6

Taraxacifolia alba.—A beautiful dwarf-growing variety; with pure silvery white flowers. Height 6 in. . . o 6

OXALIS.—Very dwarf and fast-growing half-hardy perennials, best suited to rockwork or sloping banks where there is no great depth of soil.

Rosea.—Bright rose-coloured flowers. Height 6 in. . . o 6

Tropaeoloides.—Dark bronze foliage, deep yellow flowers . . . o 6

OXYURA (Layia).

Chrysanthemoides.—Showy hardy annual, about 1 ft. in height, good for beds or for clumps in borders; flowers yellow, edged white, useful for cutting . . . o 3

PALAVA

Flexuosa.—A beautiful half-hardy annual, most useful for beds or pots. In colour the greater portion is of bright rosy pink, with deep purple base. Height 1 ft. . . o 6

Per pkt.
s. d.

PELARGONIUM.—Seed should be sown early in spring in gentle heat, the young plants being transferred to a cool house as soon as they are fairly well rooted.

- Fancy.**—Saved from a choice collection . . . 1 6
Large-flowered English.—Saved from the best sorts . . . 2 6

Per pkt.
s. d.

PENTSTEMON.—Hardy perennials. With care they remain in bloom for many months by pinching out the leading shoots when the flowers are over, thus inducing side growths that also flower. They are best treated as annuals, the seed being sown in gentle heat in February and March, and grown on as half-hardy plants till planted out in May when they make a fine display the same season. Seed may also be sown in June, for flowering the following season.

VEITCH'S SUPERB MIXED.—Saved from the finest large-flowered varieties, colours rich and varied . . . 1 0

Gloxinioides.—A profuse-blooming variety . . . o 6

Murrayanus.—Bright scarlet flowers . . . o 6

PERILLA.—Half-hardy annuals with very dark foliage. Sow in slight heat and protect in a frame until danger from frost is over. Height 1½ to 2 ft.

Nankinensis.—Deep purple foliage . . . per ounce, 1/6 o 3

Laciniatus atropurpureus.—Very dark fringed variety . . . o 3

Macrophylla compacta.—Very dark curled foliage . . . o 3

PHACELIA

Campanularia.—A hardy annual, with deep blue flowers produced in succession for a long time. Habit dwarf and spreading . . . o 6

Tanacetifolia.—Large heads of flowers of a pretty blue colour, a most excellent variety for bees. Height 1 ft. . . o 3

Those marked thus * are adapted for autumn sowing.

PANSY.

Too much importance cannot be attached to the culture of these beautiful plants, flowering as they do in great abundance for months together. Where planted in flower beds in the autumn to bloom early in the spring, it will be found a good method not to disturb them at the time of putting out other bedding plants in May, but to plant these latter amongst them; in this way both can grow together suitably in many instances. When sown early in the spring a good display in most cases can be had the following autumn, but to obtain fine blooms it is better to sow during summer, and plant out the seedlings in good cool rich soil in August and September, to flower the following spring.

The following varieties are recommended as embracing the finest selection that we have proved to come fairly true from seed, and which by their exquisite colouring and fine shape, will in flowering give every satisfaction.

	Per pkt. s. d.
VEITCH'S SUPERB STRAIN. —Finest mixture of large-flowering and new bright high-coloured sorts; the flowers are of finest form and great substance, and this splendid strain represents the highest perfection	2 6
Cassier's Large-flowered. —A German strain of great excellence, producing very large rich-coloured flowers	1 6
Emperor Frederick. —Handsome large flowers of great substance and fine shape; the colour is rich deep purple, with a broad margin of scarlet and yellow, the centre a beautiful golden bronze	1 0
Emperor William. —A very showy large-flowered deep blue variety, fine for bedding	1 0
Fairy Queen. —An exceedingly pretty and very pleasing variety, having large blooms of light blue, bordered white	1 0
Giant Violet. —Velvety purplish violet, splendid variety	1 0
Giant Light Blue. —Distinct light shade	1 0
Giant Mauve. —Delicate mauve tinged lilac	1 0
Giant White. —A very large variety, with purple eye	1 0
Giant Yellow. —Most attractive, with large black eye	1 0
Giant Curled. —Choice mixed	1 0
Large-flowered English or Show. —A splendid mixture of choice varieties with flowers of great substance and most beautiful colours, fine for exhibition purposes	1 6
Large-flowered Fancy. —Flowers of very large size and good form, many being beautifully striped and blotched, producing a great variety of colours	1 6

	Per pkt. s. d.
Large-flowered French (<i>Bugnot's</i>).—A remarkable strain with broad blotch, the upper petals finely lined, and yielding a great diversity of highly-coloured flower, of large size	2 6
Large-flowered German. —Not quite equal to the English in substance but considerably larger and a very sweet-scented variety	1 0
Lord Beaconsfield. —Very beautiful large deep purple-violet flowers, shading off in the top petals to a pale lavender	1 0
President Carnot. —Flowers large, of elegant shape, each white petal marked with deep violet blotch	1 0
Silver Edged. —Velvety dark crimson flowers, with edges of petals beautifully crimped and broadly margined with white	1 0
Peacock. —Rich velvety purplish crimson flushed with blue, shaded towards the edge light purple, and narrowly margined with white; white eye, with small yellow spots on bottom petal; pretty variety	1 0
Cliveden Purple	0 6
— Yellow	0 6
— White	0 6
Azure Blue	0 6
Black	0 6
Dark Blue	0 6
Gold Margined	0 6
Mixed	0 6

Assortment of 12 beautiful varieties, separate, 2/6.

Tufted, Finest mixed.—Saved from the best named varieties. 1 0

"The Pansy seed I had from you last year was an immense success, and I have never had larger or better coloured flowers.—Mrs. P. T. HUNTER, Overton Lodge, Ludlow."

PETUNIAS.

An exceedingly attractive and favourite plant for both indoor and outdoor cultivation. When not planted in too rich soil they will flower most profusely through the summer. For broad margins to shrubbery borders, for vases and baskets as well as for pot culture they are strongly recommended. Half-hardy annuals.

VEITCH'S GRANDIFLORA.—

The quality of this strain is unrivalled, its magnificent flowers being of incomparable beauty and enormous size. The combination of colours varies from the most rich and gorgeous to the most delicate shades, others being most beautifully veined and striped. They are exceedingly free flowering, lasting a long time in full bloom, and form one of the best pot plants, per pkt., 2/6

Admiration.—A rich violet, beautifully spotted with white, very effective. . . per packet, 1/-

Grandiflora.—Finest mixed colours. . . per packet, 1/-

Grandiflora Inimitable.—Beautifully striped, very large flowers, a most effective free-flowering variety, per packet, 1/-

Grandiflora intus aurea.—Large-flowered, yellow-throated, remarkably handsome, fine for pots. . . per packet, 1/6

"I am glad to congratulate you on the grand strain of Petunia; everybody who saw them remarked that they were the best they had ever seen.—Mr. G. DAXIN, Gardener to C. WRIGHT, Esq."

VEITCH'S GRANDIFLORA PETUNIAS.

Assortment of 8 single large-flowered varieties, 2/6.

DOUBLE LARGE-FLOWERED PETUNIAS.

Seed of the double-flowered varieties is produced by careful hybridisation, and produces a fair percentage of double flowers, many of which possess much merit.

Grandiflora flore pleno.—Produces 40 to 50 per cent. of double flowers of elegant form and of various colours. . . 1/6 and 2/6

Grandiflora fimbriata flore pleno.—Large-flowering double fringed; a very distinct and beautiful section. . . 1/6

Double White.—A very pretty variety, producing about 35 per cent. of Azalea-like flowers. . . 1/6

Rosea Perfecta.—Large double beautifully fringed rose-coloured flowers, about 45 per cent. double. Height 6 in. . . 1/6

Assortment of 6 double large-flowered varieties, 2/6.

SINGLE SMALL-FLOWERED PETUNIAS.

Veitch's Lord Courtenay.—A single bright rosy pink variety for bedding or pot culture. . . 1/6

Veitch's Superb Striped.—Selected with great care. . . 1/6

Countess of Ellesmere.—Rose with white throat; very pretty small flowers, fine for rockwork. . . 0/6

Veitch's Superb Dwarf Striped.—The flowers almost completely hide the foliage; the colours are very bright with a well-defined white stripe. The plants 8 in. in height, are admirably adapted either for pots or bedding. . . 1/6

Veitch's Superb Dwarf White.—The growth of this variety is of the same dwarf compact habit as our Dwarf Striped. . . 1/6

Veitch's Superb Dwarf Rose.—A beautiful bright rosy pink with white throat; a charming addition to the former. . . 1/6

VEITCH'S DWARF STRIPED.

VEITCH'S DWARF WHITE.

Per pkt.
s. d.

PHLOX, PERENNIAL or HERBACEOUS.—Sow in a cold frame about April, and encourage the young plants to grow as strongly as possible the first season, to flower well the following year. Height 3 to 4 ft. according to soil.

Finest Mixed.—Saved from the finest varieties 1 0

PHORMIUM TENAX

New Zealand Flax.—An ornamental foliage plant 1 0

PHYSALIS

Francheti (*Gigantic Winter Cherry*).—Bright orange-scarlet fruits, enclosed in a semi-transparent calyx, about 3 inches in length. The plant is of sturdy habit, about 18 inches in height, and makes handsome decorative pot plants; if sown in gentle heat in spring and planted out-of-doors in May or June, it will make a fine display during autumn. F.C.C. FROM THE R.H.S. 0 6

Edulis (*The Cape Gooseberry*).—A half-hardy perennial, fruiting abundantly when grown under pot culture or cool orchard house. Height 2 ft. 0 6

PHYLLOCACTUS

Veitch's Hybrids.—The plants flower profusely, while the colours of their large and shapely blooms include the most exquisite and gorgeous shades of rose, pink, white, scarlet and deep crimson. They can be grown either in the greenhouse, conservatory, or even in a cold frame from which frost is excluded.

Choicest mixed.—Saved from the best varieties 2 6

PINK

Double.—Saved from the finest laced flowers only 2 6

POLYANTHUS.—Charming early spring-flowering plants, perfectly hardy, and very effective in lines, beds, or masses. They succeed best in rich soil and in a somewhat moist and partially shaded position. The seed should be sown in shallow pans or boxes, and be stood in a cool frame or a shaded place outside, covered with glass if possible to ensure moisture, which must be maintained until the seeds have germinated. Sown early in spring the plants will flower in twelve months.

VEITCH'S FINEST GOLD-LACED.—Cannot be surpassed in quality, size of flower, or the distinctness and richness of its markings 1 0

Blue-flowering Varieties.—Producing lovely blue tints varying from lavender to the deepest blue 1 0

Dark Crimson Shade.—Large-flowered, very rich colour 1 0

White.—Large-flowered, pure white 1 0

Yellow.—Large-flowered, clear pure yellow 1 0

Large-flowered Mixed.—Many bright colours 1 0

The large-flowered sorts bloom early and produce immense trusses of bloom, the individual flowers being very large. The separate colours come true from seed.

Yellow Bedder.—This is dwarfier in habit and more free-flowering than the giant varieties, and is admirably adapted for entire beds where a mass of bloom is required in early spring 1 0

POLYGONUM (Persicaria).—An elegant hardy annual with handsome foliage, the flowers, which are very numerous, grow in drooping racemes formed at the ends of the branches.

Oriental.—Deep rose-purple. Height 3 ft. 0 6

—album.—White. Height 3 ft. 0 6

PORTULACA.—A beautiful class of half-hardy annuals specially adapted for shallow soils; they are charming dwarf plants for dry sunny situations and exposed rockwork, flowering profusely during the hottest weather. Height 3 in.

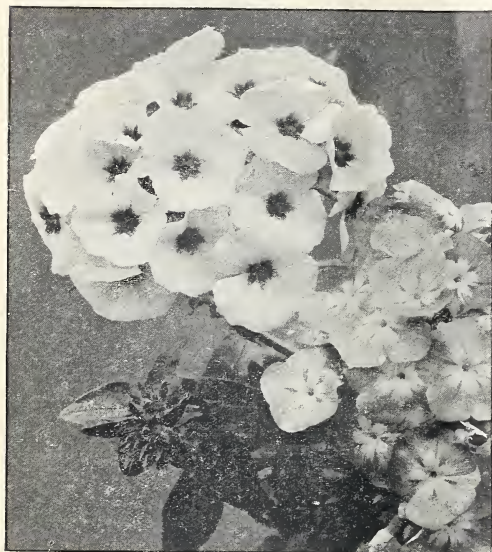

Double-flowered, Mixed.—Brilliant and striking colours 0 6

Assortment of 8 Double varieties, separate, 2/-.

Single-flowered, Mixed.—Flowers of most brilliant colours 0 2

Assortment of 8 Single Varieties, separate, 1/6.

Splendens.—A charming variety, with rich purple flowers 0 3

**PHLOX DRUMMONDI.**Per pkt.
s. d.

PHLOX DRUMMONDI.—Half-hardy annuals, producing a great profusion of rich and most brilliantly coloured flowers, continuing to bloom the whole of the summer; they are eminently suitable for summer bedding, and are also excellent for growing in pots for conservatory decoration. Few annuals can equal them in beauty, and no garden however small, should be without them. They are seen to the best advantage in chalky soils or where the ground is well drained; stagnant moisture does not suit them, nor should they be shaded; in favourable situations the seed can be sown where the plants are to remain in April or May, or they may be sown thinly in February or March in well-drained pots or pans of leaf-mould or sandy loam, in a greenhouse or gentle hot-bed, and hardened off in the usual way, giving liberal supplies of liquid manure when coming into bloom. Height 1 ft.

LARGE-FLOWERED (*Grandiflora*) (See Illustration above).—A great improvement on the older sorts, flowers large, of great substance and fine rounded form with distinctly defined eyes—

Brilliant Scarlet 0 6 **Crimson** 0 6

Delicate Rose Shades 0 6 **Scarlet, white star** 0 6

Pure White 0 6 **Violet-blue** 0 6

Finest Mixed—Large-flowered. per ounce, 3/6 0 6

Collection of 12 beautiful and distinct colours, 3/6.

Finest Mixed per ounce, 2/6 0 3

DWARF COMPACT.—A beautiful race of dwarf compact-growing plants of bright and varied colours, very suitable for pot culture—

Crimson 1 0 **Chamois-rose** 1 0

Pure White (*Snowball*) 1 0 **Finest Mixed** 1 0

Scarlet (*Fireball*) 1 0

Collection of 6 beautiful and distinct colours, 2/-.

HORTENSIAFLORA.—Very fine, forming a dense mass of bloom—

Pure White 1 0 **Bright Rose** 1 0

Rose 1 0 **Mixed Colours** 1 0

Deep Scarlet 1 0

Collection of 6 beautiful and distinct colours, 2/6.

SHIRLEY POPPY.

POPPY (Annual Varieties).—For hardiness and easy cultivation these showy plants cannot be surpassed.

Shirley, Extra Selected.—The seed now offered has been saved and re-selected at our Langley Seed Farm from flowers of large size and from the most distinct and charming colours. . . 1 0

Shirley, fine mixed.—Containing many fine shades of colour . . . 0 6

Double Shirley.—A splendid double form of this favourite Poppy with satin-like flowers of remarkable beauty . . . 1 0

Dwarf Shirley.—Bushy little plants bearing innumerable fine flowers of rose, chamois, scarlet, and salmon, some having a distinct light bordering to the petals . . . 1 0

Cardinal.—Double scarlet flowers on white ground. Height 1½ ft. . . 0 6

Carnation-flowered.—Very large double elegantly fringed flowers of brilliant and varied colours. Height 2 ft., per oz., 9d. . . 0 3

Dainty (new).—Large single flowers about 5 inches in diameter, of a charming shade of rosy mauve with dark blotch at the base of each petal. Height 2 ft. . . 1 0

Danebrog.—Scarlet flowers with white blotch. Height 1 ft. . . 0 3

Glaucum (Tulip Poppy).—Vivid scarlet flowers. Height 1 ft. . . 0 6

Japanese Pompon (new).—Finest mixed, very free blooming small double flowers, size of a Pompon Dahlia . . . 1 0

Pæony-flowered.—Immense double flowers. Height 2 ft. . . 0 3

The Mikado.—Double fringed flowers, white, shaded crimson . . . 0 3

The Bride.—Large pure white single flowers. Height 3 ft. . . 0 3

Umbrosium.—Bright rich crimson with black blotch. Height 1 ft. . . 0 3

White Swan (Snowdrift).—Pure white, double, lacinated flowers . . . 0 6

Assortment of Carnation-flowered, in 12 distinct colours, 1/6.

Assortment of Pæony-flowered, in 12 distinct colours, 1/6.

Per pkt.

POPPY

(PERENNIAL VARIETIES)

Alpinum.—Pure white, fine for rockwork. Height ½ ft. . . 1 0

***Nudicaule (Iceland Poppies).**—
Yellow . . . These are hardy perennials, and will bloom the first year if sown early. Height 1 ft. . . 0 6

***—album.**—Pure white . . . 0 6

***—miniatum.**—Orange-scarlet . . . 0 6

***—Double.**—Various shades . . . 1 0

Bracteatum.—Brilliant crimson-scarlet . . . 0 3

Oriental.—Orange-scarlet . . . flowered showy perennials. Height 3 ft. . . 0 3

—Hybrids.—Finest mixed . . . 1 0

POTENTILLA.—Hardy perennials of free growth, producing an abundance of flower during the summer and autumn; they will thrive in ordinary garden soil, but a sandy loam is the best. Height 18 in. to 2 ft.

Double.—Finest mixed, from a very large collection . . . 1 6

Single.—Finest mixed colours . . . 0 6

PRIMROSE.—Early spring-flowering hardy perennials of the easiest culture, being most at home in rather shaded spots. The hybrids now offered are possessed of extremely rich and varied colours, as well as excellent constitution. For spring bedding the seed should be sown early in the previous spring in boxes or pans in a cold frame, the seedlings being pricked out when large enough on a moist and shaded border. Height 3 in.

Dean's Superb Hybrids (Bunch or Polyanthus Primrose).—

Large flowers containing many bright shades of colour . . . 1 6

Dark Crimson. . . . 1 0

Yellow (Common Primrose) . . . per ounce, 7/6 . . . 0 6

BLUE PRIMROSE.

G. F. Wilson's Blue.—Containing many shades of blue, from pale lavender to deep violet; flowers are freely produced on footstalks rising well above the foliage, and are fully equal in size, shape, and duration to the best of the older varieties. 1/6 and 2 6

PRINCE'S FEATHER.—A hardy annual of rapid growth, with large crimson plumes, recommended for extended use in mixed borders or sub-tropical gardening. Height when well grown 4 to 5 ft.,

per ounce, 6d. . . 0 3

Those marked thus * are adapted for autumn sowing.

VEITCH'S SUPERB PRIMULAS.

Awarded Special Certificate by the Royal Horticultural Society for Superior Quality.
Silver Gilt Flora Medal from the Royal Horticultural Society, for Carnations, Primulas, &c.

CONSIDERABLE care is necessary in order to secure the successful germination of the seed of the choice kinds of *P. sinensis*. The most suitable periods for sowing are April and May for autumn, and June, July and August for spring blooming. Shallow pans, well drained, are the best, the soil consisting of sandy loam and leaf mould, worked through a fine sieve, the pans when thus prepared should be well watered before the seed is sown. Only a slight covering of soil or silver sand is needed. A good method is to cover with glass, but brown paper tied over the pans is better; this latter can be frequently damped, being removed as soon as germination takes place. What has most to be guarded against is drought; the soil should be kept in as equal a degree of moisture as possible, never being on the dry side. We attribute more failures to this cause than any other. Just at the time when the seed commences to germinate the least departure from this is fatal. We would wish it to be thoroughly understood that each of our varieties are tried in several departments of our nursery, and unless a satisfactory growth is obtained we do not send it out. The gigantic forms and some of the new hybrids do not germinate quite so freely as the older kinds, but the number of seeds contained in each packet should give a good supply of plants.

VEITCH'S SUPERB FRINGED PRIMULAS.

VEITCH'S SUPERB FRINGED RED.—This popular variety is universally cultivated, and gives entire satisfaction. The plant is of strong growth, bearing its flowers well above the foliage. The flowers are large, finely formed, of good substance, elegantly fringed, and of a rich purplish red colour, with a small yellow eye. This standard variety is particularly valuable on account of its standing the sun without changing colour better than any other Primula 1/6 and 2 6

VEITCH'S SUPERB FRINGED WHITE.—The perfection of White Primulas for general cultivation, and much more floriferous than any other White sort. The plant embodies all the combination of good qualities possessed by our Red, and its elegantly fringed pure snow-white flowers, which are of massive substance and rounded form, with well-defined eye, are in striking contrast to the deep green foliage 1/6 and 2 6

VEITCH'S SUPERB FRINGED MIXED.—Our own beautiful strains, 1/6 and 2 6

VEITCH'S CRIMSON KING.—A most handsome, distinct and effective variety with deep crimson flowers, and small yellow eye encircled by a nearly black band 2 6

VEITCH'S SNOWFLAKE.—The plant is of robust short growth and sturdy habit, with handsome dark green Fern-like foliage. The exquisitely-fringed snow-white flowers are of large size and massive substance, with a well-defined small yellow eye. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY 2 6

CHELSEA FAVOURITE.—A most distinct and beautiful variety, with very large flowers of a delicate pink, each petal edged with a bright carmine-rose; one of the most effective Primulas yet introduced 2 6

VEITCH'S CHELSEA BLUE.—Flowers of a beautiful rich blue colour, of large size, elegant form, fine substance and well displayed above the foliage 2 6

VEITCH'S CHELSEA CRIMSON.—A beautiful and distinct shade of velvety violet-crimson; the flowers are of fine form, great substance, and exquisitely fringed 2 6

VEITCH'S CHELSEA ROSE.—A pretty and attractive variety, with large flowers of perfect form and good substance, of a charming bright rose-pink shade 2 6

VEITCH'S CHELSEA SALMON.—An exquisite new variety, with flowers of a most beautiful and distinct salmon colour 2 6

VEITCH'S CHELSEA SCARLET.—The finest and richest of all the high-coloured Primulas. The flowers, which are freely produced, are of a most brilliant and intense rich scarlet-crimson colour, of medium size, fine form, and elegantly fringed 2 6

BRILLIANT KING.—A handsome variety with finely-fringed dark velvety crimson blooms of fine form and great substance 2 6

HIS MAJESTY.—A new gigantic art-shade crimson with blooms of massive substance, beautifully fringed and of a lovely velvety surface. The plant is robust, with dark red stems, and very free-flowering 2 6

THE DUCHESS.—A distinct and beautiful variety with pure white flowers and clear yellow eye, surrounded by a band of deep rosy carmine 2 6

ORANGE KING.—A distinct variety of graceful habit, and medium-sized flowers of a bright orange colour, but when fully developed are bright rose, overlaid with a deeper shade and edged with orange-salmon 2 6

VEITCH'S SPECIAL MIXTURE.—This fine mixture contains all our most beautiful varieties, with a very large range of colour, 3/6 and 5 0

"Chinese Primulas were finely shown, and well set up by Messrs. James Veitch & Sons. Brilliant King and Chelsea Favourite were particularly pleasing."—*Gardener's Magazine*.

"Messrs. James Veitch & Sons showed a number of their strains of *Primula sinensis* and all of them good."—*Gardener's Chronicle*.

PRIMULA, GIGANTIC WHITE.

VEITCH'S GIGANTIC RED.—A variety with immense flowers of great substance, of a rich purplish red colour; the plant is of vigorous growth with fringed foliage 2 6

VEITCH'S GIGANTIC ROSE.—Flowers of large size and a beautiful shade of carmine-rose, with a well-defined eye; very effective 2 6

VEITCH'S GIGANTIC SCARLET.—A strong-growing strain, producing enormous trusses of extra large flowers of great substance, and the same rich deep colour as our *Chelsea Scarlet*; without doubt one of the most gorgeous and effective Primulas 5 0

VEITCH'S GIGANTIC WHITE.—A Fern-leaved variety, of strong growth, remarkable for the enormous size, great substance, and elegant form of its flowers 2 6

THE CZAR.—The large blooms are of a very deep blue or violet, finely fringed and very free flowering, splendid habit, and a most valuable novelty. It is an exceedingly shy plant to seed 5 0

THE QUEEN, and HYBRIDS.—Remarkable for the enormous size, massive substance, and elegant form of their flowers, which are white, tinted rose 2 6

VEITCH'S DOUBLE PRIMULAS

Double Rose.—Flowers of a beautiful carmine-rose shade 2 6

Double Salmon.—A distinct shade of colour 2 6

Double Scarlet.—A rich scarlet colour, extremely floriferous 2 6

Double White.—Free-flowering and most useful variety 2 6

Double Mixed.—Comprising many beautiful colours 2 6

COLLECTIONS, VEITCH'S SUPERB PRIMULAS

6 Choice Single Varieties 10 6

12 " " " 21 0

6 Choice Double and Single Varieties 10 6

12 " " " 21 0

PRIMULA STELLATA.—This very distinct and valuable variety should be extensively grown for pot culture for the greenhouse or table decoration, as well as for use in winter for cut bloom. The pretty and attractive dark red foliage makes an effective contrast to the innumerable star-shaped flowers, which form large and very graceful pyramids, of long duration, and do not drop so quickly as in most other varieties. Height 2 ft.

Stellata, Blue 3 6

— **Crimson 2 6**

— **Pure White 2 6**

— **Red and Rose 2 6**

— **Salmon Pink 2 6**

— **Mixed 1/6 and 2 6**

— **Giant.**—Pure white massive blooms of giant form, retaining the true character of the *Primula stellata* 2 6

Stellata, Double Crimson.—A very attractive variety with rich crimson well-formed semi-double flowers and elegantly cut foliage; most useful for table decoration 2 6

PRIMULA STELLATA HYBRIDA.—An improved form of the Star Primula, differing only in the formation of its flowers which are nearly equal in substance and size to some of the best of the Chinese varieties. The flowers are beautifully fringed, and stand well above the dark foliage and purple stems, which make it equally as attractive as the older type.

Stellata Hybrida, White 2 6

— **Red 2 6**

— **Mixed 1/6 and 2 6**

Double White.—Having the same free-flowering habit as the single variety with double pure white flowers of fine form. Lasts a very long time after being cut, and will be of the greatest value for buttonholes, table or conservatory decoration 2 6

PRIMULA PULVERULENTA.

PRIMULA VEITCHII.

PRIMULA KEWENSIS.

PRIMULA COCKBURNIANA.

PRIMULA, VEITCH'S OBCONICA GRANDIFLORA.

PRIMULA COCKBURNIANA.—This *Primula* with its bright orange-scarlet-coloured flowers is one of the most striking of many known to inhabit the wild mountainous regions of Western China. The flowers are about an inch in diameter, and the erect flower scape rises to a height of from 8 in. to 1½ ft. bearing from three to six whorls of flowers. Hardy Biennial 2 6

"One of the most remarkable of *Primulas* by reason of its orange-coloured flowers."—*Gardener's Chronicle*.

PRIMULA PULVERULENTA.—A really fine perennial, resembling *P. japonica*, but with larger and more richly-coloured rosy purple flowers. The flower stems and calyces are thickly coated with a white farina. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 1 6

PRIMULA VEITCHII.—A good perennial approaching the well-known *P. cortusoides* in foliage and habit, but a more robust grower. The scapes are a foot high, with from 2 to 4 whorls of deep rose-coloured flowers, having an orange ring surrounding the yellow mouth of the tube. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY 2 6

PRIMULA KEWENSIS.—A charming addition to greenhouse *Primroses*. The plant is a strong grower, with bright green leaves, numerous erect flower-scapes, 10 to 18 in. in height, producing flowers in whorls at intervals along their whole length. These are fragrant, bright yellow in colour, with a slender tube and spreading limb, nearly 1 inch in diameter. As a winter-flowering decorative plant it is a great acquisition. Its floriferousness in a very small state is quite remarkable; the spikes are useful for cutting, and the flowers continue to open for some time after being placed in water. Small plants in bloom may be very effectively used in table decoration. See illustration. FIRST CLASS CERTIFICATE FROM THE ROYAL HORTICULTURAL SOCIETY 2 6

"Its golden blossoms are very distinct."—*The Garden*.

"It is a magnificent *Primrose*."—*Gardener's Magazine*.

PRIMULA KEWENSIS, var. FARINOSA.—A new selection from the above. The stems and foliage are covered with a silvery white powder. The plant is of the same strong growth and habit as the type, with numerous fragrant bright yellow flowers 2 6

PRIMULA OBCONICA.—Pretty and interesting *Primulas*, blooming continuously from spring till autumn. In habit and foliage resembling the beautiful *P. cortusoides*, and is one of the most useful *Primulas* for pot culture or for the open border during the summer months. To obtain good plants for winter and early spring-flowering the seed should be sown in warmth in April or May, and wintered in a cool greenhouse or frame. Height 9 in.

Obconica.—Flowers a soft lilac shade of colour 1 6

Obconica rubra.—A very fine dark rose 1 6

Veitch's obconica grandiflora alba.—Large pure white flowers with small yellow eye 2 6

Veitch's obconica grandiflora rubra.—This new profuse-blooming large-flowered variety is a great improvement on the older type, bearing on long stems numerous heads of very bright and attractive flowers of a brilliant deep rose; by far the deepest shade yet introduced 2 6

Veitch's obconica grandiflora mixed.—A great improvement on the older type, producing trusses of various new shades of colour, including lavender, blue, rose, mauve, rosy pink, white, reddish crimson, purplish red, and many others 2 6

PRIMULA, HARDY VARIETIES.—Charming hardy perennials for the open border or rockwork. Sow April to July in pots or cold frames and plant out where they are intended to flower.

Cortusoides.—Flowers rosy purple. Height 9 in. 0 6

Froncosa.—A charming spring-flowering species, with rosy lilac flowers and silvery foliage. Height 1 ft. 1 6

Japonica (Japanese Primroses).—A fine decorative hardy plant with purple-crimson flowers 1 0

Japonica, New Hybrids.—These embrace a wide range of colours from pure white through various shades of pink to deep crimson 1 0

Rosea grandiflora.—Fine for rockwork. Height 6 in. 1 6

Sieboldii.—This splendid free-blooming variety is adapted either for pot culture or in the open border, with large clusters of richly-coloured flowers, and broad handsome foliage. Height 1 ft. 1 6

Sikkimensis.—Bearing drooping heads of sweet-scented canary-yellow flowers, very distinct. Height 18 in. 1 0

Verticillata (Abyssinian Primrose).—Half-hardy variety with sweet-scented flowers of a bright yellow colour. The seed is rather slow to germinate and should be sown in well-drained pans 1 0

"From Messrs. James Veitch & Sons, Ltd., Chelsea, came a table wholly composed of *Primula obconica grandiflora*, arranged in blocks of colour. These ranged from pure white through shades of lilac and mauve to rosy purple. The plants were in splendid condition and greatly admired."—*Journal of Horticulture*, March 24th, 1900.

"A series of notable exhibits from Messrs. James Veitch & Sons included a full length table of *Primula obconica*, a splendid strain embracing pure white, pink, pale blue, rose, carmine and other shades intermediate between these. The whole of the plants were profusely flowered, while in the matter of size the flowers were of the finest description."—*The Garden*, April 2nd, 1910.

REHMANNIA ANGULATA.—A half-hardy herbaceous perennial, recently introduced by us from Central China. The flowers, which are freely produced, resemble individually those of *Incarvillea Delavayi*; they are 3 inches in diameter; rose-purple in colour, with a rich yellow throat spotted with purple. The plants are of easy culture, and flower within nine months from the time of sowing the seed. AWARD OF MERIT FROM THE R.H.S. I 6

Pink Perfection.—Large flower of a clear bright pink colour, with a distinct pale throat I' 6

Per pkt.
s. d.

PYRETHRUM (Flowering Varieties).—Hardy perennials, invaluable for herbaceous borders and for cutting; they thrive best in cool and moist situations, flowering twice a year when well cared for. Height 18 in. to 2 ft.

Finest double varieties.—Saved from a fine strain and producing a fair percentage of double and semi-double flowers . . . I 0

Finest single varieties.—Single flowers of rich colours . . . o 6

PYRETHRUM (Foliage Varieties).—Hardy perennials, but best treated as half-hardy annuals for all practicable purposes in bedding. Sow in March.

Aureum (Golden Feather).—Bright golden yellow foliage, invaluable for summer bedding. Height 9 in. . . per ounce, 5/- o 6

Aureum Excelsior.—A greatly improved strain of more compact and dwarf habit, brighter in colour, and a very shy bloomer . . . I 0

Golden Moss (new).—Very dwarf and mossy, good golden colour; the most suitable of all for carpet bedding . . . I 6

Laciniatum Perfection.—Elegantly lacinated yellow foliage . . . o 3

Selaginoides.—Particularly dwarf compact habit, prettily serrated, bright golden yellow foliage. Height 9 in. . . I 0

RHODANTHE.—Half-hardy annuals of showy character under pot culture for greenhouse and conservatory decoration, lasting well under favourable conditions. Should be sown in the spring, with a little warmth until the plants gain strength. Out-of-doors the seed should be sown in May, and the flowers cut before they are fully expanded if required as Everlastings for winter use in vases, for which purpose they are admirable. Height 1 ft.

Maculata.—Bright pink with crimson circle . . . o 6

—alba.—Pure silvery white; very beautiful . . . o 6

Manglesii.—Beautiful bright rose-coloured flowers . . . o 6

Double Red } Beautiful varieties of these lovely annuals; producing a good percentage of double flowers, each . . . o 6

RICINUS (Castor Oil Plant).—These are noble large ornamental-leaved plants of majestic appearance for making bold beds, when well grown attaining a height of 6 to 12 ft., with leaves nearly a yard in width; grand for sub-tropical gardening. Half-hardy annuals of rapid growth. Sow in warmth about March, the better way being to sow each seed separately in small pots to prevent any after check or injury to the roots; one shift afterwards to carry the plants on until the end of May is desirable. Deep and rich soil produces the finest growth.

Africanus.—Large green foliage. Height 6 ft. . . o 3

Cambodgensis.—Best dark-leaved sort. Height 4 ft. . . I 0

Communis major (Castor Oil Plant) . . . o 3

Gibsonii.—Very dark purple stems and foliage. Height 5 ft. . . o 6

Macrocarpus.—White stems and light green leaves . . . o 6

Obermannii.—Fine tall variety, with dark foliage. Height 10 ft. . . o 3

Sanguineus tricolor.—Reddish purple leaves. Height 8 ft. . . o 6

Zanzibarensis.—A distinct race from East Africa, growing to a large size, and varying in colour from pale green to brownish purple . . . o 6

RIVINA

Humilis.—A showy stove or temperate-house biennial of easy culture, the seed of which if sown early will produce berry-bearing plants the following autumn, its fruit-bearing property being its essential value as a decorative plant. Height 18 in. . . o 6

ROCK CISTUS.—A very free perennial, usually classed as hardy, but only so in warm and sheltered situations; the better position for it is at the foot of a south or west wall and on slightly elevated ground. Height 1 ft. . . o 3

ROCKET (Hesperis).—Hardy perennials of rapid growth, producing numbers of flowers early in spring when sown the previous summer, this being a preferable mode of culture to retaining the plants for another season; they make a good foreground to shrubs. Height 2 to 3 ft.

Purple o 3

White o 3

Sweet (Hesperis tristis).—A very fragrant free-blooming biennial, with greenish yellow flowers freely produced . . . o 3

Dwarf White.—A compact pure white early-flowering variety. Height 1 ft. . . o 6

ROMNEYA.Per pkt.
s. d.

Coulteri (*Giant White Californian Poppy*).—A half-hardy perennial, requiring greenhouse protection during winter, better suited for pot culture than for outdoors unless in favoured localities, a rich loamy soil of good depth suits it the best. Sow early in the spring. The seed sometimes remains dormant for months. Height 3 ft. 0 6

ROSE CAMPION.—A hardy perennial, valuable for shrubby borders, where it can remain undisturbed; profuse flowering and lasting in beauty a long time; flowers bright crimson with silvery foliage. Height 2 ft. 0 3

RUBECKIA.—Hardy border plants, lasting in beauty a long time, and invaluable for summer and autumn display; each blossom is like a miniature Sunflower.

Bicolor.—Orange-yellow, with brown centre 0 6

Bicolor superba.—Large yellow flowers with brown tase 0 6

SALPIGLOSSIS.—Very beautiful half-hardy annuals in great variety of colour, pencilled in rich tints of yellow, purple, and brownish red. They are exceedingly free-flowering, and splendid for cutting; although flagging when cut they quickly revive on being placed in water, and last a long time. The seed may be sown in pots or pans, and the young plants carefully transplanted; or it may be sown in the open ground where it is to flower. A warm sunny spot is best.

VEITCH'S LARGE-FLOWERING.—Finest mixed, many beautiful colours, remarkably free-flowering, and fine for cutting. Height 2 ft. 0 6

Dwarf mixed.—Marbled and veined flowers. Height 1 ft. 0 3

Assortment of 6 finest large-flowered varieties, 1/6.

SAINTPAULIAPer pkt.
s. d.

lonantha.—An interesting greenhouse plant; the dark green leaves of fleshy consistence and downy surface, spread themselves laterally just over the soil, and form as it were a rosette, in the centre of which springs up quite a bouquet of flowers, Violet-like both in colour and shape, 1½ in. in diameter, and gracefully borne on stalks 2 to 3 in. high. When well-established it will continue to bloom throughout the year 1 6

SALVIA.—Half-hardy perennials except *S. coccinea*, which is a hardy annual. All are valuable plants, very profuse in flowering, and of rapid growth. *S. patens* will remain for years in protected borders, or the roots may be taken up at the approach of frost and stored like Dahlias.

SALVIA, NEW DWARF SCARLET ZURICH.

Argentea.—Silvery white foliage 0 6

Fireball.—A dwarf variety with brilliant scarlet flowers; one of the earliest, commencing to bloom in July. Height 15 in. 1 0

Coccinea.—Flowers brilliant scarlet. Height 2 ft. 0 6

Horminum grandiflorum violacea (*Blue Beard*).—A large Clary, with bright violet-coloured heads 0 6

Patens.—Rich intense blue, most beautiful variety 1 0

Splendens grandiflora.—A greatly improved *S. splendens*, with spikes 15 in. long and freely produced all over the plant. The vivid scarlet colour of the flower is very striking; a more highly decorative plant in autumn for the greenhouse cannot be imagined 1 0

Splendens grandiflora nana.—A dwarf form of above 1 0

New Dwarf Scarlet Zurich.—A compact variety, with erect spikes covered with a mass of the most brilliant scarlet flowers. It commences to bloom early and continues to make a grand display throughout the autumn 1 0

SANVITALIA.—Half-hardy annuals of a very free-flowering character. Height 6 in.

Double.—Bright yellow flowers 0 3

Single.—Yellow flowers with dark centre 0 3

Four Certificates of Merit, Royal Botanic Society's Exhibition.

First Class Certificate (for the strain), Brighton.

VEITCH'S NEW GIANT STREPTOCARPUS.

VEITCH'S NEW HYBRIDS, Improved

Strain.—This beautiful race of Streptocarpus, remarkable for an abundance of bloom and a continuous succession of flower, has been brought to a high state of perfection by careful culture and hybridization. The plant is of dwarf, neat habit, growing 9 in. in height, is of easy culture, and may be had in flower nearly all the year round. As pot plants they are highly decorative.

Red and Rose Shades	2 6
Purple and Violet Shades	2 6
White and Blotched varieties	2 6
White Lady. —Pure white	2 6
Mixed. —Saved from our Gold Medal Collection	2 6

VEITCH'S NEW GIANT.—This beautiful white variety has delicate markings at the base of the lower petals, and is unsurpassed for size amongst the numerous Streptocarpus. The individual blooms often measure 4½ in. in diameter, and are borne on long stems, making it most useful for cutting. The plant is of vigorous habit, striking and effective, as shown by the photograph taken at our Feltham Nursery 3 6

VEITCH'S ACHIMENIFLORUS.—The flowers are produced in great profusion from May to September in much-branched panicles, which, loaded with bloom, are particularly effective. AWARD OF MERIT FROM THE ROYAL HORTICULTURAL SOCIETY.

Achimeniflorus rosens.—A charming shade of colour. The flowers are very large, and of beautiful form 2 6

—**albus.**—A large-flowering white variety 2 6

Veitch's achimeniflorus gigantens.—Large-flowering form, with finely shaped flowers of lavender-blue shades borne on large trusses 2 6

Veitch's Extra Special Mixed.—Selected with the greatest care from the above fine varieties, and embracing all the newest and most rare shades of both our Hybrids and Achimeniflorus varieties 3 6

Per pkt.
s. d.

SILENE.—Hardy annuals, very free-blooming plants with bright attractive flowers extremely useful for autumn sowing for early spring gardening. Height 1 ft.; compact form, 6 in.

Bonnettii, Dwarf Double Rose.—Dark stems and foliage; very fine. Height 6 in. 0 6

Double Dwarf Peach Blossom.—A beautiful shell-pink 0 6

Pendula.—Bright pink per ounce, 6d. 0 3

Pendula compacta.—Plants of very dwarf and compact habit; with bright pink flowers per ounce, 1/- 0 3

Pendula compacta Snow King 0 6

SOLANUM.—Half-hardy perennials, best treated as tender annuals. Sow in February to obtain strong plants for bedding out the end of May. The foliage is covered in most instances with various-coloured spines.

Balbisii.—A very ornamental variety with prettily cut foliage and reddish spines. Height 18 in. 0 6

Gigantem.—Large leaves, flowers purple. Height 4 ft. 0 6

Laciniatum.—Elegantly lacinated foliage. Height 4 ft. 0 3

Marginatum.—Downy foliage, margined silvery white 0 6

Pyracanthum.—Leaves covered with scarlet spines 0 6

Robustum.—Large bronzy foliage, with long spines. Height 4 ft. 0 6

Capsicastrum.—Height 1 ft. } Berried varieties 0 6

Weatherill's Hybrids.—Height 18 in. }

STATICE.—Very beautiful free-flowering plants of easy culture in poor soils or dry situations, remaining a long time in bloom. The flowers, with the exception of Statice Suworowii, are valuable when dried for bouquets, &c., and all are showy in beds or borders. The candelabra-formed Statice Suworowii is one of the finest of the annual Statice. The plants may be grown in beds in the open, and are also admirably adapted for pot culture.

Bonduelli.—Sulphur-coloured annual 0 6

Incana nana, mixed.—A valuable perennial species 0 6

Sinnata.—Rich deep blue, free-flowering annual 0 6

—**alba.**—White, free-flowering annual 0 6

Suworowii.—Long spikes of beautiful flowers, of a bright rose. Height 18 in. 0 6

COLLECTIONS OF SUB-TROPICAL PLANTS.

Collection of 12 distinct and beautiful varieties, 3/6.

Collection of 24 distinct and beautiful varieties, 7/-.

STOCKS.

The following are confidently recommended as the best types of the various classes; they are distinct in character, and will produce a large percentage of perfectly double flowers. All varieties are desirable for pot culture or bedding out, and are greatly prized as cut flowers, both for their beautiful colours and delightful fragrance. In the *Ten-week*, or early-flowering section, the large-flowering varieties hold the premier position, producing plants of compact but robust growth, which yield immense spikes of bloom, and make a grand display for a long time. Various sowings may be made at intervals to prolong the season, but a succession can be kept up till late in the autumn by sowing the *Intermediate* and *Emperor* varieties, which will come into bloom when the *Ten-week* sorts are exhausted. Our seeds are saved exclusively from plants grown in pots by the most celebrated German florists, and the collections will be found to contain the brightest and most distinct shades only, in preference to offering a large number of colours, many of which are dull and uninteresting.

VEITCH'S NEW WHITE PERPETUAL-FLOWERING TEN-WEEK.

—A handsome variety, producing immense spikes of large double pure white flowers of unusual substance. The plant is of neat bushy habit and growing about 12 ins. in height. It also continues to flower until late in the season. We recommend this variety as being one of the best for bedding purposes, and exceedingly useful for growing in pots

s. d.

VEITCH'S NEW GIANT

Scarlet.—A very fine variety, having immense spikes of perfectly double, large-sized flowers produced in great profusion on spikes, closely set on plants of compact habit. Very effective for bedding in masses, and for pot culture it cannot be surpassed

1 6

Veitch's New Giant, 6 distinct colours, 2/6.

DWARF BEDDING TEN-WEEK STOCK.—A useful and most effective bedding variety of very compact, neatly-branched habit, making a grand display throughout the summer months. Height 9 in.

---------------------	-----	--------------	-----

6 distinct and beautiful varieties, separate, 1/6.

PERPETUAL STOCK, PRINCESS ALICE.

—A continuous-flowering pure white variety, attaining a height of 2 ft. Frequent sowings may be made. If sown early will produce an abundance of beautifully-shaped flowers from May until November, and often until December. Excellent for bouquets at a time when few other flowers are attainable. This variety has been awarded two First Prizes, and has become a general favourite, being equally well adapted for pot culture and the open ground

1 o

- FORCING TEN-WEEK, SNOWFLAKE.**—Very early-flowering dwarf pure white variety. Height 9 in. 1 0
- EMPEROR, LARGE-FLOWERING.**—A strong robust large-flowering variety, producing a splendid display in the autumn. Height 1½ ft. 0 6
- Finest Mixed Colours** 0 6
- 8 distinct and beautiful varieties, separate, 2/-.
- ALL THE YEAR ROUND.**—A Wallflower-leaved variety, with very double pure white flowers and shining green foliage; a continuous bloomer, of dwarf and vigorous habit. Height 1 ft. 1 0
- EXCELSIOR.**—A gigantic white variety, in habit resembling *Beauty of Nice*, with flower spikes nearly 2 ft. long and the individual flowers of enormous size. Height 2½ ft. 1 0

STOCK, BEAUTY OF NICE.

BEAUTY OF NICE.—A new giant variety with numerous long side shoots, loosely covered with very fragrant flowers nearly 2 in. in diameter. It may be grown either for summer or winter use. One of the best Stocks ever introduced for cutting. Height 2 ft.

Crimson	1 0
Pale Pink	1 0
White	1 0

STOCK, EAST LOTHIAN.—Magnificent varieties of dwarf and compact habit, producing immense Hyacinth-like spikes of bloom. These and the autumn-flowering varieties, if sown in March, will bloom in the autumn, or if sown in July and August and wintered in a cold frame will flower in the following spring, when they will be found useful for furnishing window-boxes, &c.

Crimson	1 0	Purple	1 0
Deep Carmine	1 0	White	1 0

Assortment of the above 4 beautiful colours, 2/6.

East Lothian, Wallflower-leaved, white.—Producing a vigorous main spike and numerous side shoots of large, double, snow-white flowers, well-displayed above the bright Wallflower-like foliage. 1 0

INTERMEDIATE.—Splendid free-flowering variety, extensively cultivated in pots for Covent Garden Market in early spring.

Crimson Gem	0 6	Purple	0 6

Assortment of 6 distinct colours, separate, 1/6.

STOCKS (Hardy Perennial Varieties)

BROMPTON.—Well-known and much-esteemed varieties, of robust habit.

Scarlet.—The true variety, of most brilliant colour 0 6

White.—Pure white, large flowers 0 6

Finest Mixed Colours 0 6

12 distinct and beautiful colours, separate, 2/6.

Empress Elizabeth.—This variety throws up a strong main stem, which branches out in candelabra form; both the main and side stems are covered with large rose-shaped flowers of a bright carmine. It comes in early and withstands unfavourable weather. Height 1½ ft. 1 0

SUNFLOWER (Helianthus).—The majestic growths, bold outline and massive flowers of the large-growing varieties render them admirably adapted for intermingling in shrubby borders or in groups, making a grand display when viewed from a distance, their bright golden yellow flowers being in full beauty during August, September and October. The smaller-flowered varieties are extremely floriferous, very valuable for the ornamentation of mixed borders, and particularly useful for cutting.

Miniature.—Free flowering, producing an abundance of small elegant bright golden yellow single flowers, with a dark centre; very decorative and highly useful for cutting 1 0

— **Orion.**—A new variety with twisted petals 0 6

— **Stella.**—Larger-flowering than the type 1 0

— **Double.**—A new variety of the popular single Miniature Sunflower with double and semi-double flowers on the same plant 1 0

SUNFLOWER, MINIATURE.

Æsthetic Gem.—An attractive variety, with medium-sized single flowers of a bright golden yellow, with dark disc. Height 6 ft. 0 6

Argyrophyllus.—Silvery woolly foliage, small single yellow flowers with a black disc. Height 4 ft. 0 6

Californicus fl. pl.—Massive double flowers. Height 5 ft. 0 3

Dwarf Single.—Showy flowers of medium size 0 3

Globosus fistulosus fl. pl.—Very large double globe-shaped flowers of a rich yellow colour. Height 6 ft. 0 6

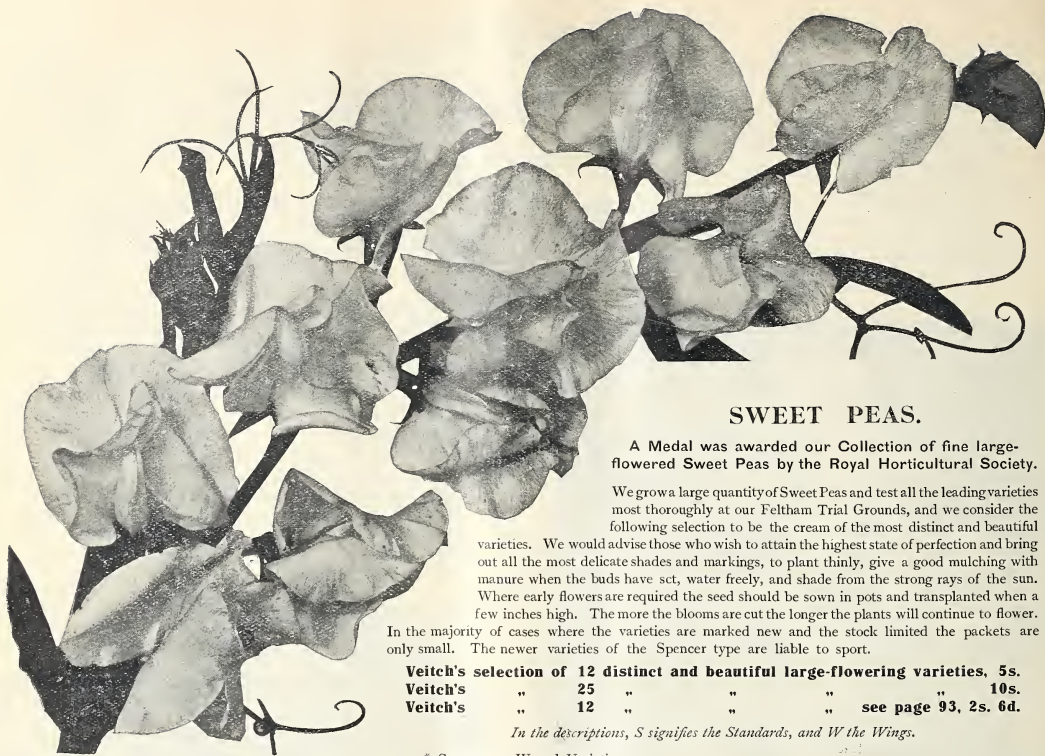

Golden Nigger.—Medium-sized deep golden flowers, dark stems and foliage; very striking 0 6

Primrose-coloured.—A very distinct and desirable variety, bearing large single flowers of a beautiful and pleasing delicate primrose or sulphur colour, with a large dark centre. Height 5 ft. 0 6

Russian Giant (Common).—Large single flowers. Height 6 ft. 0 3

Uniflorus.—Enormous single yellow flowers with a large dark centre, sometimes measuring 1 ft. in diameter. Height 10 ft. 0 3

Tall Double and Dwarf Double . . . each, per ounce, 6d. 0 3

SWEET PEAS.

A Medal was awarded our Collection of fine large-flowered Sweet Peas by the Royal Horticultural Society.

We grow a large quantity of Sweet Peas and test all the leading varieties most thoroughly at our Feltham Trial Grounds, and we consider the following selection to be the cream of the most distinct and beautiful varieties. We would advise those who wish to attain the highest state of perfection and bring out all the most delicate shades and markings, to plant thinly, give a good mulching with manure when the buds have set, water freely, and shade from the strong rays of the sun. Where early flowers are required the seed should be sown in pots and transplanted when a few inches high. The more the blooms are cut the longer the plants will continue to flower.

In the majority of cases where the varieties are marked new and the stock limited the packets are only small. The newer varieties of the Spencer type are liable to sport.

Veitch's selection of 12 distinct and beautiful large-flowering varieties, 5s.

Finest Mixed	2/6 0 3

Veitch's selection of 12 distinct varieties, 2/6.

DWARF CUPID SWEET PEAS.—These do not grow more than 5 in. high or 15 in. in diameter.

Bright Blue	1 0
Light Blue	1 0
Crimson	1 0
Pink	1 0
Primrose	1 0
White	1 0

SWEET SULTAN.—Hardy annuals essential for cutting, also well suited to grow in mixed borders. Height 18 in.

Purple. —Showy sweet-scented purple flowers	0 3
White. —Pure white flowers, very useful for bouquets	0 3
Yellow. —Beautiful bright golden yellow flowers	0 3

The following new large-flowered hybrids are very fine, having large reflexed sweet-scented flowers on long stout stems; very useful for table decoration, wreath making and all decorative purposes.

The Bride. —Satiny-white flowers	1 0
Bridegroom. —Flowers heliotrope, light centre	1 0
Bridesmaid. —A lovely pale lemon	1 0
Honeymoon. —A beautiful yellow with golden centre	1 0

SWEET WILLIAM.—Popular hardy biennials of the easiest possible culture, well suited for shrubby borders or marginal lines. Sloping banks where there is not often too much moisture is also a good place for them. The seed should be sown in April or May to flower the following year. Height 18 in.

VEITCH'S EXTRA FINE MIXED.—Saved from a magnificent strain, with immense trusses of exceedingly beautiful flowers, including the most vivid and brilliant shades of crimson, pink, and pure white 1 0

VEITCH'S CHOICE AURICULA-EYED.—Saved exclusively from the finest show varieties, with rich colours and distinct white eye and margin 6d. and 1 0

"Your Auricula-eyed Sweet Williams have been the admiration of everybody who saw them. To say they were superb is not a bit too much. I never saw finer.—Mr. A. Pearce, Rahway, New Jersey, U.S.A."

Pink Beauty. —A distinct variety with delicate pink flowers	1 0
Scarlet Beauty. —A deep scarlet variety of great merit	1 0
Dark Crimson. —Rich dark colour	0 3
Double flowering, mixed colours	0 6
Fine mixed single per ounce, 1/-	0 3

TACSONIA

Van Volxemi.—A beautiful greenhouse climber of rapid growth and very floriferous. Rich bright carmine-crimson flowers 1 0

TAGETES.—Excellent half-hardy annual of neat compact habit, densely covered with bright yellow blossoms, commencing to flower early, and continuing throughout the summer and autumn. It should not be planted in rich soil; very showy reliable plant for ribbon borders. Height 6 in.

Signata pumila Golden Ring per ounce, 3/6 0 6

TECOMA

Smithi.—Exceedingly beautiful autumn and early winter-flowering greenhouse plant, with large heads of orange-coloured tubular-shaped blossoms. Height 18 in. 1 6

THUNBERGIA.—Tender annuals. Sow in moderate heat, and grown on until they commence to flower, when a greenhouse will suit them. Growth slender and scandent. Height 5 to 6 ft.

Alata.—Yellow with black eye 0 6

— **alba.**—White with black eye 0 6

Aurantiaca.—Bright orange with black eye 0 6

Finest Mixed.—From the preceding and other varieties 0 6

TORENIA.—Tender annuals, yielding a profusion of flowers from June until the autumn, stop a few times to keep the plants bushy and compact. Height 9 in.

Bailioni.—Golden yellow with purple throat 1 0

Fournieri grandiflora.—Sky-blue, with dark blue spots and a bright yellow throat 1 0

Fournieri compacta.—Dwarf form of the preceding 1 0

— **alba (White Wings).**—A beautiful white variety 1 0

TRACHELIUM

Cernuum.—A very distinct perennial, hardy in all but the most exposed situations. Valuable for the mixed border and well suited for deep loamy soils. Height 2 ft. 0 6

TROPÆOLUM.—Very brilliant and effective half-hardy climbing annuals, growing 6 to 8 ft. in height, excellent for training over verandahs, trellis-work, or against walls in bare places.

Canariense (Canary Creeper).—A well-known climbing plant with elegantly fringed bright yellow flowers 1/6 0 6

Defiance.—Dazzling scarlet, foliage deep purple 0 6

Lobbianum Brilliant.—Crimson flowers and dark foliage 0 6

— **Golden Queen.**—Clear golden yellow colour 0 6

— **Bederzefolium.**—Ivy-leaved variety, scarlet flowers 0 6

— **Spitfire.**—Scarlet flowers and dark foliage 0 6

Princess Victoria Louise.—Yellow with blood-red spots 0 6

Speciosum.—A very beautiful hardy tuberous-rooted perennial climber, with bright scarlet flowers 1 0

See also Nasturtium, page 75.

TYDÆA.—Attractive warm greenhouse perennials, with bright-coloured flowers and handsome foliage. They bloom the first season from seed, the culture being similar to that of the Gloxinia. When the tubers are mature a succession of bloom can be maintained nearly throughout the year by starting into growth at intervals.

Choicest Mixed.—Saved from a splendid collection 2 6

VALERIAN

Red.—Herbaceous perennial. Will thrive in the poorest soils, or better than when treated more generously. Height 2 ft. 0 3

VENIDIUM

Calendulacenum.—A dwarf-branching annual, with large woolly leaves nearly covering the ground, and bearing profusely flowers somewhat resembling the Gazania. Bright yellow shaded with orange, closing at sunset; a capital border plant. Height 1 ft. 0 3

VENUS' LOOKING GLASS.—Hardy annuals of compact growth, very profuse in flowering, suitable for beds or edgings. Height 6 in.

Blue 0 3 | **White** 0 3

VENUS' NAVEL WORT.—Hardy annual with pretty flower spikes somewhat like the Forget-me-not, white tinged with blue, and silvery foliage. Height 1 ft. 0 3

VERBASCUM

Olympicum.—A very showy species, having woolly foliage surmounted by a pyramid of bright yellow flowers. Height 6 ft. 0 6

Mixed Seedlings.—Showy hardy perennials with branched spikes of flowers varying in colour. Height 2 ft. 0 6

Per pkt.
s. d.

VERBENA.—Verbenas are invaluable for summer bedding purposes, flowering freely the first year from seed; the constitution of seedlings is also better than that of cuttings, with less liability to disease and mildew. The seed should be sown early in March, and well looked after until germination is ensured, a cool, or at most a temperate treatment being better than much heat.

VERBENA.

VEITCH'S MAMMOTH.—A grand new strain of giant Verbenas that produce flowers and trusses of exceptional size and embrace the richest and most brilliant shades from carmine to pure white. Does not germinate quite so freely as the older variety . . . 1 6

MAMMOTH ROSE SHADES.—Very pretty shades nearly approaching the well-known variety *Miss Willmott* . . . 1/6 and 2 6

VEITCH'S SUPERB MIXED.—Saved from a splendid collection of the best named varieties. Height 1 ft . . . 1 0

Scarlet } Great care has been taken in saving these from
Blue } the brightest and purest colours, and they will
White } come nearly true from seed. Height 1 ft. . . 1 0

Erect Dwarf compacta.—A dwarf compact race, forming a nearly circular bush about 6 in. in height . . . 1 0

Venosa.—An excellent free-flowering bedding plant with purple flowers, remaining a long time in bloom. Height 18 in. . . 0 6

VIOLA.—Exceedingly useful hardy perennials for bedding purposes. If sown early in the spring they will flower throughout the summer, and again the following spring. Height 6 in.

Bullion.—Pure golden yellow . . . 1 0

Cornuta (Maive Queen).—Delicate mauve flowers . . . 0 6

Jenny.—Deep lavender . . . 1 0

Lutea major.—Bright yellow flowers . . . 0 6

Purple King.—Deep violet-purple . . . 1 0

Snowflake.—Dwarf compact, very early pure white variety . . . 0 6

Scotch Viola or Tufted Pansies.

Blue . . . } A great many varieties cannot be relied
White . . . } upon as coming true; the varieties offered,

Choice Mixed. } pected to give a large proportion true to
colour. . . 1 0

Odorata, The Czar (Sweet Violet).—Large variety, rich purple . . . 0 6

***VIRGINIAN STOCK.**—Early free-flowering hardy annuals, thriving well in almost any soil. Height 6 in.

Red . . . per ounce, 6d. 0' 3 | **White** . . . per ounce, 6d. 0 3

Per pkt.
s. d.

VISCARIA.—Hardy annuals, useful for mixed borders. Height 1 ft.

Cardinalis.—Bright magenta . . . 0 3

Elegans picta.—Crimson-scarlet edged with white . . . 0 3

Oculata.—Beautiful rose colour with a rich crimson eye . . . 0 3

Oculata cœrulea.—Pale blue, dark eye . . . 0 3

VEITCH'S WALLFLOWER.

WALLFLOWER.—Hardy perennials but better treated as biennials, and a fresh lot of plants raised from seed every year. Seed sown about the end of March, the young plants being pricked off and afterwards well cared for, will make good material to succeed the summer bedding plants for flowering the following spring.

VEITCH'S DWARF DARK RED.—A very superior selection of rich dark colour. The plants are of dwarf growth and bushy habit; excellent for spring gardening . . . 1 0

VEITCH'S SELECTED YELLOW.—A fine strain of robust growth, medium height, and profusely covered with large flowers of a bright yellow colour . . . 1 0

VEITCH'S SELECTED MIXED.—Containing only the finest and most distinct varieties . . . 1 0

Winter Blooming (Chieranthus Kewensis).—Sown in July will commence to flower in November. Suitable for pot work only . . . 1 0

Belvoir Castle Yellow, Improved . . . per ounce, 2/6 0 6

Blood Red.—A good selection . . . 1/6 0 3

Covent Garden Blood Red.—Fine dark red . . . 0 6

Golden Tom Thumb . . . per ounce, 2/6 0 6

Harbinger.—Very early-flowering . . . 0 6

Parisian Early.—Sow in a favourable position in May to bloom in October, colour from yellow to light brown . . . 1 0

Parisian Early, Blood Red.—A fine variety . . . 1 0

Ruby Gem.—A beautiful clear shade of ruby-violet . . . 1 0

Salmon Queen.—Bright chamois changing to salmon red . . . 1 0

Sulphur Yellow (Primrose Dame).—A distinct variety . . . 1 0

Vulcan.—Extra large flowers of a velvety crimson-brown . . . 1 0

Mixed, Single.—Various shades . . . per ounce, 1/6 0 3

Double German.—Finest mixed, an excellent strain, producing large spikes of double flowers . . . 1 0

Assortment of 8 Finest Double Varieties, 2/6.

WHITLAVIA

Grandiflora.—Hardy annual, purplish blue bell-shaped flowers, adapted for poor soils. Height 1 ft. Per pkt.
s. d.
0 3

WIGANDIA

Caracasana.—Half-hardy perennial, but better treated as an annual. They are of imposing appearance, producing a fine effect when massed. Height 4 ft. 1 0

XERANTHEMUM.—Hardy annuals of easy cultivation, giving a profusion of flowers well suited for drying as Everlastings. Height 1½ to 2 ft.

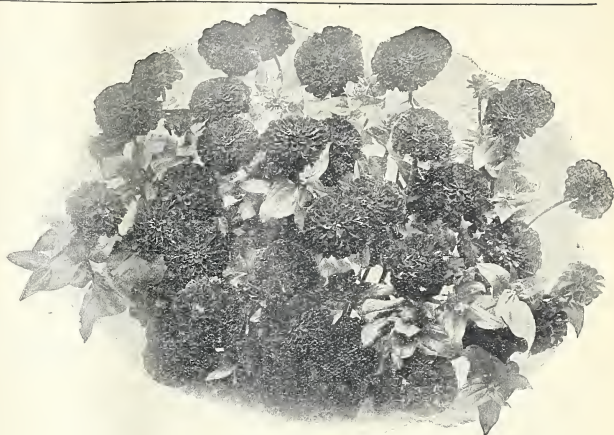

Double Purple . . . 0 3 | **Double White** . . . 0 3

ZEA (Maize).—Half-hardy annuals invaluable for sub-tropical bedding. Seed should be sown in pots and the seedlings planted out in May.

Japonica variegata (*Striped Japanese Maize*).—Beautifully striped green and white foliage. Height 6 ft. per ounce, 1/- 0 3

gigantea quadricolor.—Beautifully striped white and rose. Height 6 ft. 0 6

Gracillima (*Miniature Maize*).—Very graceful. Height 3 ft. 0 3

ZINNIA, FIRE KING.

VEITCH'S SUPERB ZINNIAS.

These attractive and decorative half-hardy annuals are most desirable plants for mixed borders or bedding purposes, and are remarkable for the profusion and duration of their flowers. The double Zinnias are exceedingly handsome, the flowers being notable for their large size, fine form, brilliancy and diversity of colour. The seed should be sown in April, a cold frame kept close being the best place for this purpose; when large enough the young plants should be pricked off in boxes or in a frame, being gradually hardened off before transferring them to their flowering quarters in May.

VEITCH'S DOUBLE, LARGE-FLOWERED.—In this effective and improved selection the perfectly-formed double flowers are of immense size and substance, being borne on strong stems, and displayed well above the foliage. The colours are most intense, and comprise now and rich shades, not to be surpassed. Per pkt.
s. d.
1 0

Veitch's Collection of 8 Large-flowered varieties, 3/-.

FIRE KING (new).—A very fine dwarf large-flowering variety; rich deep scarlet colour. Splendid for beds. 1 0

VEITCH'S DOUBLE, POMPON.—A charming variety, with small but very regularly-formed double flowers in all the most brilliant colours, useful for cutting. 1 0

Double Large-flowered.—Saved from selected double flowers, containing many fine colours. 0 6

Collection of 8 splendid double varieties, 2/-.

Double Dwarf (Darvini).—Charming small very double flowers with various and striking colours. 0 6

Double Striped or Zebra.—Produces about 50 per cent. of striped flowers of various colours; very curious and pretty. 1 0

Single.—Finest mixed, in all the most brilliant colours. 0 6

Collection of 6 splendid single varieties, 1/6.

Haageana imbricata flore pleno.—Dwarf variety, with small bright orange flowers. 1 0

GLADIOLUS COLVILLEI ALBUS (*The Bride*).—Particularly valuable for forcing, being of dwarf habit, very free flowering, and producing neat compact spikes of pure white flowers

3 6 0 6

CHOICE GLADIOLUS FOR BEDDING.

These hybrids are as hardy as the *Gandavensis* section, and bear freely-branched erect spikes of bloom, the individual flowers being of gigantic size often measuring 5 in. across, far exceeding in dimensions all previous sorts; the colours are of most brilliant and varied hues, richly spotted, and all are remarkably handsome.

6 fine named varieties	4/6
6 choice named varieties	8/-
12 fine named varieties	8/6
12 choice named varieties	15/-

This beautiful and distinct class of recent introduction embraces many brilliant shades of colour, forming fine spikes of elegant-shaped flowers.

This splendid race of hybrids is chiefly distinguished by the presence of a large blotch on the lower segments of the flower; the plants are of robust and vigorous growth, and quite hardy.

Yellow Hybrids	{ Consisting chiefly of hybrids raised in Canada of tall growth, handsome flowers and vigorous constitution.	8 6
Purple „		7 6
Choice Mixed		6 0

Lilies may be classed as the most beautiful and ornamental of all bulbous plants. The stately, graceful habit of growth, large and variously-coloured flowers, many of which are very fragrant, render them attractive subjects for greenhouse decoration and for outdoor culture. Many of the strong-growing sorts are well adapted for planting among shrubs or similar situations, as nearly all are hardy, but the bulbs should be protected from frost.

	Each—s.	d.
Auratum (<i>The Golden-rayed Lily of Japan</i>)—		
Imported bulbs	per doz., 5/-, 7/6, 10/- and 15/-	—
Extra large bulbs	1/6 and 2	0

Grandiflora. —Brilliant rich scarlet, spotted with orange	1	6
Grandiflora alba. —White, spotted in centre with crimson-lake	1	6
Grandiflora immaculata alba. —Pure white, very beautiful variety	1	6
Pavonia. —Bright red and orange, heavily spotted	1	0
Sseciosa. —Rich crimson-scarlet, very heavily spotted	1	0

A beautiful hardy plant, flowering in July and August, and producing large spikes of pendent bell-shaped white flowers.

97

DOUBLE TUBEROSES.

The flowers are pure white, perfectly double, delightfully fragrant, and invaluable for bouquets, button-holes, and wherever cut flowers are in demand. Planted from the end of December till June, a continuous supply of bloom may be had all the year round. The bulbs should be potted firmly in rich loamy soil and plunged in bottom heat, taking care the temperature does not fall below 60 degrees; water should not be given until the foliage appears, then give it freely, and grow on in a house with a uniform high temperature and moist atmosphere.

American.—Large roots per 100, 12/6; per doz., 2/- | **The Pearl.**—Selected roots per 100, 15/-; per doz., 2/6

MONTBRETIA, "Tritonia."

Most graceful showy plants of rich colour, with small Gladioli-like flowers on branched spikes about 2½ ft. high; blooming in August they succeed well in warm situations out-of-doors, and are excellent for pot culture.

NEW VARIETIES.

Per doz.
s. d.

- Prometheus.**—"The finest Montbretia yet raised, for not only has it large and brilliant flowers, but it grows with remarkable vigour, and flowers with a freedom that is sure to make it popular. The plants shown were 3 ft. 6 in. high, and the spikes were freely branched. Each flower measured 3¼ to 3½ inches across, and was of a rich orange colour, flushed and stained with crimson at the centre. AWARD OF MERIT, August 1st."—*Gardeners' Magazine* each, 1/6 16 0
- Westwick.**—Very distinct orange-red, with yellow base, and a dark circle of maroon 2/3 24 0
- Lady Hamilton.**—Fine yellow flowers, like a Watsonia in shape, flower and habit; the centre of the flower is suffused with rosy-orange when it first opens, changing gradually to apricot when fully expanded each, 1/- 9 0
- Norvic.**—A most distinct and valuable new seedling, very compact and dwarf in habit and late in flowering, stems much branched; flowers are large, yellow-stained externally with red. Height 18 in. each, 1/3 12 0
- King Edmund.**—Very handsome close spikes of rich golden yellow flowers, 3 in. across, marked with six to eight chocolate spots at the throat. Height 3 ft. each, 1/9 18 0
- Pottsii grandiflora.**—Bright red, centre golden yellow per 100, 3/- 0 6
- Crocasmiaeflora.**—Brilliant orange-scarlet 2/6 0 5
- **Bonquet Parfait.**—Yellow, shaded vermillion 3/6 0 6
- **Chrysolora.**—A beautiful free-flowering variety with large yellow flowers which when fully expanded become a nanken-yellow each, 4d. 3 6
- **Drap d'Or.**—Deep golden, shaded orange per 100, 3/- 0 6
- **Etoile de Fen.**—Vermilion-scarlet, yellow centre 4/6 0 8
- **Firework.**—Very large flowers, yellow edged red 1 0
- **George Davison.**—Large handsome golden yellow flowers, very free-flowering. AWARD OF MERIT, R.H.S. each, 4d. 3 6
- **Germania.**—This splendid variety is of very vigorous growth. The colour is a rich scarlet shading to brilliant orange with dark red throat, large and effective per 100, 10/- 1 6
- **Koh-i-noor.**—Very large handsome flower, pure orange, rich apricot base each, 9d. 7 6

TERMS OF BUSINESS.

FREE CARRIAGE.—All Garden Seeds are delivered free to any Railway Station in the United Kingdom, or are sent free by post.

Farm Seed, Potatoes, Mats, Mushroom Spawn, Tools, Sundries, &c., either alone or as part of an order, are sent carriage paid to any Railway Station in England or Wales when the total value is not less than 20/-, and to any Station in the United Kingdom when the total value is not less than 40/-.

FOREIGN ORDERS.—Seeds quoted by the packet are sent post free to any part of the World where the Parcel Post is established.

PACKAGES.—Packing is charged at the lowest possible rate, and half the amount charged is allowed on empty boxes, crates, &c., if returned within reasonable time, carriage paid and advised by post. Straw bundles are not returnable. For the assistance of Customers our labels have our name and address printed on the reverse side.

DISCOUNT.—A cash discount of five per cent. is allowed on payments made within one month from date of Invoice.

REGISTER OF HEAD GARDENERS, &c.—We have always a large number of Head Gardeners, Foremen, &c., on our books seeking situations, and we shall be pleased to place our Customers in communication with reliable men.

TERMS OF SALE.—Although every possible care is taken in the production and selection of all Seeds supplied by us, we give no warranty, express or implied, as to description, quality, productiveness, or any other matter connected with any Seeds sent cut by us; and we will not be in any way responsible for the Crops.

LONDON HOUSES AND GARDENS.—A special staff of men is kept for the Decoration of London Houses and the care of London Gardens or Squares, and a competent representative can be sent to wait on Customers at their Town Houses at any time.
